**Mobile and Social Media Journalism** Anthony Adornato, 2017-07-13 A Practical Guide for Multimedia Journalism Mobile and Social Media Journalism is the go-to guide for understanding how today's journalists and news organizations use mobile and social media to gather news, distribute content, and create audience engagement. Checklists and practical activities in every chapter enable readers to immediately build the mobile and social media skills that today's journalists need and news organizations expect. In addition to providing the fundamentals of mobile and social media journalism, award-winning communications professional and author Anthony Adornato discusses how mobile devices and social media have changed the way our audiences consume news and what that means for journalists. The book addresses a changing media landscape by emphasizing the application of the core values of journalism—such as authentication, verification, and credibility—to emerging media tools and strategies.

*Mobile News* Andrew Duffy, Rich Ling, Nuri Kim, Edson Tandoc, Jr., Oscar Westlund, 2020-12-17 The rise of the smartphone has shifted news from fixed publication to a flow of updateable information. The chapters in this book investigate the implications for audiences, industry and society as news becomes mobile. Wherever we go, news from anywhere can reach us on our smartphones. And wherever we are, we can search up information specific to that place. News is produced by mobile journalists (MoJos) as well as

by citizens armed with smartphones, reporting breaking news from crisis zones where information is uncertain, or hyperlocal news from neighbourhoods where little happens. Mobile technology allows citizens to engage deeply with a cause or to skim headlines so they know a little about a lot of things. News is distributed on mobile networks and consumed by mobile audiences as they make their daily way through time and space coloured by their mobile devices. It is consumed in the niches of life. It intersects with place in new ways as geolocated news. It pursues us wherever we are through push notifications. And news has moved from fixed to fluid, a flow of updateable information rather than a regularly issued product. In this book, the contributors take varied viewpoints on mobility and news, its impact on what news is, how journalists produce it and how it fits into everybody's everyday life. The chapters in this book were originally published as a special issue of Digital Journalism.

**Mobile and Social Media Journalism** Anthony Adornato, 2021-07-29 Now in its second edition, Mobile and Social Media Journalism continues to be an essential resource for learning how journalists and news organizations use mobile and social media to gather news, distribute content, and engage with audiences. Merging theory and practice, the book includes checklists and practical activities in every chapter, enabling readers to immediately build the mobile and social media skills that today's journalists need and which news organizations expect. The second edition retains a

focus on journalism's core values, such as authentication, verification, and credibility, while guiding readers on how to apply them to digital media activities. The book also offers an in-depth discussion of the audience's active role in producing content, how mobile devices and social media have changed the way the audience consumes news, and what these changes mean for journalists. Updated to address the latest trends in multimedia journalism, the second edition includes two new chapters: Writing mobile-friendly web stories and The spread of fake news. This is a valuable resource for journalism students, as well as media professionals seeking to update their skills. The book also features a companion website at [www.mobileandsocialmediajournalism.com](http://www.mobileandsocialmediajournalism.com), providing online resources for students and lecturers, including video tutorials, industry news, and sample assignments. The book's Twitter account (@MobileJourn) and Facebook page ([fb.com/MobileandSocialMediaJournalism](https://fb.com/MobileandSocialMediaJournalism)) share the latest industry trends and offer tips for teaching the topic.

Mobile-First Journalism Steve Hill, Paul Bradshaw, 2018-10-10 Media publishers produce news for a full range of smart devices – including smartphones, tablets and watches. Combining theory and practice, Mobile-First Journalism examines how audiences view, share and engage with journalism on internet-connected devices and through social media platforms. The book examines the interlinked relationship between mobile technology, social media and apps, covering the entire news production process – from generating ideas for

visual multimedia news content, to skills in verification and newsgathering, and outputting interactive content on websites, apps and social media platforms. These skills are underpinned with a consideration of ethical and legal concerns involving fake news, online trolling and the economics of mobile journalism. Topics include: understanding how mobile devices, social media platforms and apps are interlinked; making journalistic content more engaging and interactive; advice on how successful news publishers have developed mobile and social media strategies; adopting an approach that is entrepreneurial and user-centered; expert interviews with journalists, academics and software developers; learning key skills to launch and develop news websites, apps and social media outputs. Mobile-First Journalism is essential reading for journalism students and media professionals and of interest to those studying on courses in social and new media.

**News in their Pockets** Ran Wei, Ven-hwei Lo, 2021-02-17 Since the debut of the iPhone in 2007, the mobile phone has become a quick, convenient, and immensely popular gateway for accessing and consuming news. With three billion mobile phone subscribers, Asian countries have led this seismic shift in news consumption. They provide a wide range of opportunities to study how, as mobile technology matures and becomes routinized, mobile news is increasingly subject to societal constraints and impositions of political power that reduce the democratic benefits of such news and call into question the application of

these technological innovations within governments and societies. *News in Their Pockets* explores the societal, technological, and user-related factors behind why and how digital-savvy college students seek news via the mobile phone across Asia's most mobile cities--Shanghai, Hong Kong, Singapore, and Taipei. Situating cross-societal comparative analyses of mobile news consumption in Asia within a digital and global context, this volume outlines the evolution of the mobile phone to its prominence in disseminating news, offers predictors of patterns in mobile news consumption, investigates user needs and expectations, and illustrates future impacts on civic engagement from mobile news consumption. By examining the interplay between game-changing and empowering communication technology and constraining social systems, *News in Their Pockets* provides the framework necessary for constructive, continuing debates over the promise and peril of digital news and exposes our underlying reasoning behind the adoption of the mobile phone as the all-in-one media of choice to stay socialized, entertained, and informed in the modern digital age.

News for a Mobile-first Consumer Paula Maurie Poindexter, 2016 The rapid adoption of mobile devices has created a new type of consumer, one who chooses smartphones and tablets over laptops and desktops, TV and radio, print newspapers, magazines, books, and landline phones. This new mobile consumer has not just forced businesses, institutions, governments, and organizations to innovate with mobile solutions; this new mobile consumer has upended the news media landscape,

challenging news organizations and journalists to produce news for consumers who have little resemblance to yesterday's newspaper readers, TV news viewers, and online news consumers. Based on two national surveys, *News for a Mobile-First Consumer* introduces a mobile consumer taxonomy comprised of three types of mobile consumers: mobile-first, mobile specialists, and mobile laggards. The demographics of these mobile consumers as well as their relationship to news and social media are explored in depth. Social media as a competitor to and platform for mobile news are also examined, and special attention is devoted to news apps from the perspective of consumers. *News for a Mobile-First Consumer* also provides insight about millennials, racial and ethnic minorities, and women, who are at the forefront of the mobile revolution but less engaged with news. To improve mobile journalism and increase news engagement, «*Essentials of Mobile Journalism*» are proposed. As the first book to explore news and consumers in the mobile sphere, this book is required reading for scholars and professionals as well as undergraduate and graduate students enrolled in journalism, communication, strategic communications, advertising, media and society, marketing, and technology courses.

**Mobile Disruptions in the Middle East** John V Pavlik, Everette E Dennis, Rachel Davis Mersey, Justin Gengler, 2018-05-08 *Mobile Disruptions in the Middle East* identifies trends in mobile media use in Qatar and the United Arab Emirates and, more broadly, explores their impact

on the nature of digital journalism. Mobility has long been an important aspect of life in the Middle East; therefore a study of this region presents a unique opportunity to examine the role of mobile media and its future directions. Basing its analysis on original research, including multiyear surveys and case studies, the book reveals patterns of audience engagement with mobile media in the Gulf area, with particular emphasis on online journalism. The research also illustrates how and to what extent media organizations are developing and delivering content uniquely designed for mobile media and consumption. Drawing on these findings, the authors look at possible developments in mobile media content strategies, including those for news content, as wearable and other emerging media forms enter the marketplace. Mobile Disruptions in the Middle East provides an important insight into a region that is both globally active and mobile-first, yet whose use of digital media is historically under-researched. As a result, the book helps to advance understanding of consumer preference for content types on mobile media, especially in relation to the transformation of journalism.

**MOJO: the Mobile Journalism Handbook** Ivo Burum, 2016

*The Mobile Media Reader* Anandam P. Kavoori, Noah Arceneaux, 2012 Portable phones are now miniature multi-media centers that can fit neatly in one's pocket, and media industries of all types are adapting content for these new platforms, or innovating entirely new forms. In the light of this explosive growth, this diverse collection of essays establishes conceptual, critical frameworks for evaluating the latest transformations of the media landscape. Some essays provide historical context, exploring older phenomena such as the CB radio, automobile radio, and hand-held video games, while others unpack the behind-the-scenes negotiations that determine what kinds of services are available to consumers of the latest technology. *The Mobile Media Reader* is a comprehensive road map, enabling both scholars and students to examine the social, cultural, and commercial implications of media that are available anywhere at any time.

The Mobile Story Jason Farman, 2014 What happens when stories meet mobiles? While many studies exist that look at the convergence of narrative and computing technologies, most of these studies consider digital storytelling within a desktop paradigm. Very few offer an analysis of narrative that is site-specific, context-aware, and within a

paradigm of pervasive and mobile computing. In this cutting-edge collection, contributors examine the ways in which mobile media alter our conceptions of reading, storytelling, and the dissemination of narratives.
