Kohei Arai, Supriya Kapoor, Rahul Bhatia

Disrupting Mobility Gereon Meyer, Susan Shaheen, 2017-01-04

This book explores the opportunities and challenges of the sharing economy and innovative transportation technologies with regard to urban mobility. Written by government experts, social scientists, technologists and city planners from North America, Europe and Australia, the papers in this book address the impacts of demographic, societal and economic trends and the fundamental changes arising from the increasing automation and connectivity of vehicles, smart communication technologies, multimodal transit services, and urban design. The book is based on the Disrupting Mobility Summit held in Cambridge, MA (USA) in November 2015, organized by the City Science Initiative at MIT Media Lab, the Transportation Sustainability Research Center at the University of California at Berkeley, the LSE Cities at the London School of Economics and Politics and the Innovation Center for Mobility and Societal Change in Berlin.

HCI in Mobility, Transport, and Automotive Systems

Heidi Krömker, 2019-07-10 This book constitutes the refereed proceedings of the First International Conference on HCI in Mobility, Transport, and Automotive Systems, MobiTAS 2019, held as part of the 21st International Conference on Human-Computer Interaction, HCII 2019, in Orlando, FL, USA in July, 2019. The 1274 full papers and 209 posters presented at the HCII 2019 conferences were carefully reviewed and selected from 5029 submissions. The papers cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The papers in this volume are organized in the following topical sections: interaction in autonomous and semiautonomous vehicles; driving experience; and mobility and transport.

Tourism, Public Transport and Sustainable Mobility C.

Michael Hall, Diem-Trinh Le-Klähn, Yael Ram, 2017-02-03 This book offers a comprehensive global examination of the relationship

between public transport and tourism as well as exploring other sustainable transport modes. It offers a unique view by analysing tourism through the public transport lens and vice versa. The volume provides an account of how the public transport experience can be improved for tourists so that its value can be maximised and a greater number of people can be encouraged to shift modes. It features a wide range of case studies and examples showing how the tourism industry, as well as regional economies, communities and the environment, benefit when public transport is widely used by tourists. The book will be of interest to researchers and students in the fields of tourism and transport as well as destination marketing organisations and tourism, transport and urban planners.

A Comprehensive Guide to Enterprise Mobility Jithesh Sathyan, Anoop N., Navin Narayan, Shibu Kizhakke Vallathai, 2016-04-19 Although enterprise mobility is in high demand across domains, an absence of experts who have worked on enterprise mobility has resulted in a lack of books on the subject. *A Comprehensive Guide to Enterprise Mobility* fills this void. It supplies authoritative guidance on all aspects of enterprise mobility-from technical aspects and applications to

Inventing Mobility for All Andreas Herrmann, Johann Jungwirth, 2022-04-26 *Inventing Mobility For All: Mastering Mobility-as-a-Service with Self-Driving Vehicles* describes Mobility-as-a-Service and explains the impact of this mobility concept on social and societal life as well as on people's travel behavior.

T-Kit 14 - Value-based learning in mobility projects Snežana

Bačlija Knoch, Sérgio Gonçalves, Susie Nicodemi, 2022-05-18

Promote value -based education in general and in learning mobility in the youth field in particular. Learning mobility in the youth field is increasingly recognised and present in European programmes and in the activities and initiatives supported by the European Union, the Council of Europe and other institutions. Providing a meeting place for people from different environments and communities, learning-mobility programmes draw attention to values, trigger reflections on them and stimulate questioning and critical examination. If prepared and facilitated well, these experiences can contribute to preparing and supporting young people and adult learners to be active in society and to be agents of change. This T-Kit has been written by and is for facilitators of learning, to help start their thinking process about an important, but also complex, topic. It aims to promote value-based education in general: to explain it and, with practical examples related to specific values, show how it can be used. It is framed within the current policy framework of the Council of Europe and the European Union, including their youth-mobility programmes. The T-Kit should be understood through a holistic learning and non-formal education approach: the combination of theory, background information, examples and some practical ideas should help to initiate reflection from the relatively new angle of value-based education in learning mobility in the youth field. Value-based learning is not neutral, and neither is the T-Kit – Value-based learning in mobility projects. It is rooted in a set of values that it explores, promotes and encourages action based on them. To support this process, the T-Kit is divided into two parts: one conceptual and one practical. The conceptual part lays the foundation for value-based learning in mobility, while the practical part encompasses concrete activities and “thought provokers”, which address the dilemmas and questions that can arise when implementing activities.

Enterprise Mobility Strategy & Solutions Rakesh Patel, 2014-09-24 Do you know that organizations and IT

departments scramble to devise a good strategy for enterprise mobility? Surprisingly, only half of them have well-defined mobile strategies, confirms a recent survey of over six hundred companies by IBM. Now this is where a handbook for enterprise mobility can be instrumental for CIOs, CTOs, and IT decision-makers who look for creating robust enterprise mobile strategies and solutions. This book shares some of the practical cases related with enterprise mobility, which will be relevant and resourceful for enterprises seeking to get through their own obstacles and setbacks. It is divided into four major sections comprised of following: 1. The Mobility Revolution 2. Enterprise Mobility in the Workplace 3. The Scope of Enterprise Mobility 4. Other Aspects of Enterprise Mobility These sections further unfold into thirteen chapters. This book should also help you explore and understand the key aspects like mobile device management (MDM), BYOD, and mobile security. Precisely, it could be no less than a handbook for CIOs, CTOs, and organizations who want to enable enterprise mobility effectively.

Deskbound Kelly Starrett, Glen Cordoza, 2016-04-26 Sitting can wreak havoc on your health, and not just in the form of minor aches and pains. Recent studies show that too much sitting contributes to a host of diseases—from obesity and diabetes to cancer and depression. The typical seated office worker suffers from more musculoskeletal injuries than those workers who do daily manual labor. It turns out that sitting is as much an occupational risk as is lifting heavy weights on the job. The facts are in: sitting literally shortens your life. Your chair is your enemy, and it is murdering your body. In this groundbreaking new book, Dr. Kelly Starrett—renowned physical therapist and author of the New York Times and Wall Street Journal bestseller *Becoming a Supple Leopard*—unveils a detailed battle plan for surviving our chair-centric society. *Deskbound* provides creative solutions for reducing the amount of time you spend perched on your backside, as well as strategies for transforming your desk into a dynamic,

active workstation that can improve your life. You will learn how to:

- Easily identify and fix toxic body positions
- Eradicate back, neck, and shoulder pain
- Mitigate carpal tunnel syndrome forever
- Organize and stabilize your spine and trunk
- Walk, hinge, squat, and carry with peak skill
- Perform daily body maintenance work using fourteen mobility templates for resolving pain and increasing range of motion

Whether your goal is to maximize your performance in or out of the workplace, lose weight, or simply live pain-free, Deskbound will work for you. It is a revolutionary cure for death-by-desk.

Sustainable Mobility for Island Destinations Theocharis

Tsoutsos, 2022 This open access book presents the findings of the CIVITAS DESTINATIONS project regarding the link between mobility and tourism in urban areas and the complications tourists face in becoming more sustainable. It integrates the tourist mobility needs and the associated fluctuation impacts in the design of mobility solutions in order to enforce the accessibility, attractiveness, efficiency and sustainability of transport services and infrastructure for both residents and tourists in island cities such as Rethymno, Crete, and Valetta, Malta. Sustainable Mobility for Island Destinations contains contributions from highly experienced academics, engineers, and planners in the area of sustainable tourism, mobility services, and smart solutions design companies assisting: the change of the mind set in insular and tourism areas; the adoption of green mobility systems and services; and monitoring the environmental benefits to assist towards the Climate Change. It explores the challenges tourists face, such as the seasonal fluxes in transport usage, the pressures of tourism to provide aesthetic green spaces, and the space issues of being an island in relation to economic potential and infrastructure construction. The book suggests areas for future research, and implementation of innovative systems and policies. It will be of interest to academics, planners, decision makers, and environmentalists.

Biochemical and Immuno-Histochemical Analysis of APP-Processing and Amyloid Pathology in Single and Multiple Transgenic Mice as Models for Alzheimer's Disease

Tom V. Dooren, 2006-09

ECAI 2020 G. De Giacomo, A. Catala, B. Dilkina, 2020-09-11 This book presents the proceedings of the 24th European Conference on Artificial Intelligence (ECAI 2020), held in Santiago de Compostela, Spain, from 29 August to 8 September 2020. The conference was postponed from June, and much of it conducted online due to the COVID-19 restrictions. The conference is one of the principal occasions for researchers and practitioners of AI to meet and discuss the latest trends and challenges in all fields of AI and to demonstrate innovative applications and uses of advanced AI technology. The book also includes the proceedings of the 10th Conference on Prestigious Applications of Artificial Intelligence (PAIS 2020) held at the same time. A record number of more than 1,700 submissions was received for ECAI 2020, of which 1,443 were reviewed. Of these, 361 full-papers and 36 highlight papers were accepted (an acceptance rate of 25% for full-papers and 45% for highlight papers). The book is divided into three sections: ECAI full papers; ECAI highlight papers; and PAIS papers. The topics of these papers cover all aspects of AI, including Agent-based and Multi-agent Systems; Computational Intelligence; Constraints and Satisfiability; Games and Virtual Environments; Heuristic Search; Human Aspects in AI; Information Retrieval and Filtering; Knowledge Representation and Reasoning; Machine Learning; Multidisciplinary Topics and Applications; Natural Language Processing; Planning and Scheduling; Robotics; Safe, Explainable, and Trustworthy AI; Semantic Technologies; Uncertainty in AI; and Vision. The book will be of interest to all those whose work involves the use of AI technology.

Mobility Data Chiara Renso, Stefano Spaccapietra, Esteban Zimányi, 2013-10-14 Mobility of people and goods is essential in the global economy. The ability to track the routes and patterns

associated with this mobility offers unprecedented opportunities for developing new, smarter applications in different domains. Much of the current research is devoted to developing concepts, models, and tools to comprehend mobility data and make it manageable for these applications. This book surveys the myriad facets of mobility data, from spatio-temporal data modeling, to data aggregation and warehousing, to data analysis, with a specific focus on monitoring people in motion (drivers, airplane passengers, crowds, and even animals in the wild). Written by a renowned group of worldwide experts, it presents a consistent framework that facilitates understanding of all these different facets, from basic definitions to state-of-the-art concepts and techniques, offering both researchers and professionals a thorough understanding of the applications and opportunities made possible by the development of mobility data.

Smart Mobility - Connecting Everyone Barbara

Flügge,2017-04-03 This book presents a comprehensive overview of various aspects of mobility and transportation to be smart and seamless. It provides basic principles and trends of smart mobility as well as international examples. The topic of this work is especially interesting as the future of human centered and business triggered ecosystems is increasingly dependent on the coordination capabilities of all participating and influencing members to manage transportation needs. Even more the fulfillment of the right to mobility for individual and cargo related mobility asks for mobility enablement in a predictive, digital and intermodal manner. Therefore, this book is useful not only for decision makers in several positions but also for people who are interested in trends of transportation and mobility.

Regulating App-based Mobility Services Rex Deighton-

Smith,2021 App-based mobility services have brought large consumer benefits by expanding choice and improving service quality, as well as driving down consumer prices and creating new jobs. At the same time, the rapid growth of these new services has

given rise to concerns about a range of actual or potential negative impacts, and poses new challenges for policy makers and regulators. This Going Digital Toolkit note identifies key issues and principles that policy makers should consider when regulating app-based mobility services. It also discusses the key regulatory dynamics affecting the markets for ridesourcing, e-scooters and shared bicycles. The Annex provides case studies of the regulation of these services and identifies key lessons from this experience.

The Mobility Forum ,2014

Intelligent Systems and Applications Kohei Arai,Supriya Kapoor,Rahul Bhatia,2020-08-25 The book Intelligent Systems and Applications - Proceedings of the 2020 Intelligent Systems Conference is a remarkable collection of chapters covering a wider range of topics in areas of intelligent systems and artificial intelligence and their applications to the real world. The Conference attracted a total of 545 submissions from many academic pioneering researchers, scientists, industrial engineers, students from all around the world. These submissions underwent a double-blind peer review process. Of those 545 submissions, 177 submissions have been selected to be included in these proceedings. As intelligent systems continue to replace and sometimes outperform human intelligence in decision-making processes, they have enabled a larger number of problems to be tackled more effectively. This branching out of computational intelligence in several directions and use of intelligent systems in everyday applications have created the need for such an international conference which serves as a venue to report on up-to-the-minute innovations and developments. This book collects both theory and application based chapters on all aspects of artificial intelligence, from classical to intelligent scope. We hope that readers find the volume interesting and valuable; it provides the state of the art intelligent methods and techniques for solving real world problems along with a vision of the future research.

Paradigm Shift in Urban Mobility Tomasz Janasz,2017-11-30

Tomasz Janasz demonstrates that digital technologies and new mobility concepts can lead to a reduction of the automobiles in urban areas by a factor of 10. The book features two vivid case studies of such digital mobility concepts: TwoGo by SAP and smexx. The author proposes six prototypes of business models for 'Shared Automobility Services'. Janasz offers also the 'Transformative Literacy' for designing sustainable urban mobility systems of the future. The author elaborates on the socio-political patterns of urban mobility by presenting the case of the City of Basel (Switzerland). He proposes the framework of 'Integrated Sustainable Urban Mobility' to explain how to overcome car dependence in cities.

Technologies for Smart Cities Yuri A. Vershinin, Fedor Pashchenko, Cristina Olaverri-Monreal, 2022-08-18 This book gives readers an overview about technologies that are useful for developments related to Smart Cities. Some technologies are already available, such for example, as smart meters for electricity and gas in buildings. But there are possibilities to incorporate existing devices into wider networks with other smart devices that currently operate independently. This in turn will considerably improve the reduction of the energy consumption in buildings, reduction of emission pollutions in cities and improvement of the well-being of people. The other objective of this book is to introduce readers to new technologies which are not yet implemented in areas related to the efficient functioning of cities. For example, areas related to Intelligent Transport Systems are mostly developed for the optimization of the traffic flow, reduction of accidents on roads, improvement of the safety of drivers and related to road transportation problems. The rapid advances in Blockchain technologies are also covered.
