Janasz offers also the 'Transformative Literacy' for designing sustainable urban mobility systems of the future. Inclusive Transport Hans Jeekel, 2018-10-29 Inclusive Transport: Fighting Involuntary Transport Disadvantages offers readers profound and multifaceted insights into transportation and social equity, guiding transportation and urban studies researchers, planners, and policy makers in evaluating potential solutions to this complex issue. It considers discrimination and its societal consequences, providing a needed perspective on who is left out of transportation planning, and why. The book is systematically divided into 2 parts, Part A is problem oriented and explores the main problems to the transportation disadvantaged; accessibility and affordability. It looks at the consequences of non-accessibility, the problems non-car owners face, and the interplay between housing and transportation; Part B is policy oriented and analyses how current policies tend to forget transport disadvantages. It looks at pragmatic solutions for transport disadvantaged and ends with a design for inclusive transport, being a more radical approach combining sustainability challenges, people's behaviours and emotions, creating more just and equitable mobility. Synthesizes academic research and narratives on transport disadvantage and the transport disadvantaged, linking the research with current mobility policies and practices Connects the fight on transport disadvantages with sustainable and smart mobility strategies and looks into car sharing, ride sharing and individualising public transport while de-individualizing car use Has an extensive usage of data, figures, and examples from around the world, and inspiring mobility plans and policies

In 1981, when Donald Appleyard's Livable Streets was published, it was globally recognized as a groundbreaking work, one of the most influential urban design books of its time. It is essential reading for those who influence future directions in city and transportation planning. Incorporates the most current empirical research on urban transportation and land use practices that support the need for more livable communities Includes recent case studies from around the world on successful projects, campaigns, programs, and other efforts Contains new coverage of vulnerable populations

If Cars Could Walk Ger Duijzings,Tauri Tuvikene,2023-07-14 In the last twenty-five years, the explosive rise of car mobility has transformed street life in postsocialist cities. Whereas previously the social fabric of these cities ran on socialist modes of mobility, they are now overtaken by a culture of privately owned cars. If Cars Could Walk uses ethnographic cases studies documenting these changes in terms of street interaction, vehicles used, and the parameters of speed, maneuverability, and cultural and symbolic values. The altered reality of people's movements, replacing public transport, bicycles and other former 'socialist' modes of mobility with privatized mobility reflect an evolving political and cultural imagination, which in turn shapes their current political reality.
