Technology and Aging Alex Mihailidis, 2008 This publication presents articles on Aging-in-Place, Assistive Technology, Monitoring and Telehealth, Transportation and Mobility, and Design. The section on assistive technology (AT) represents arguably the most mature and generic aspect of technology and aging; except that AT can hardly be regarded really as a specific discipline any longer. Assistive devices and systems command an expansive gamut of technological and engineering specialties, drawing upon mechanical engineering and industrial design at one end of the field and cybernetic systems engineering and brain-computer user interfaces at the other. The largest section in the book, on monitoring and telehealth, reveals novel applications of advanced pattern recognition techniques, some of which have, up to now, found roles primarily in the military, process engineering, and financial sectors. Transportation and mobility still represents by far the largest and most commercially lucrative market segment of technology for seniors. There is however a clear trend towards synthesis of information and communication technologies (ICT) and mobility technologies, which is embodied in the latest developments of automatic collision avoidance and full or semi-autonomous navigation functions in powered mobility devices. The last section is dedicated to design issues. It is proposed that designing for the special needs market before making a design as inclusive as possible to the mainstream market is a viable alternative to the currently accepted notion of inclusive design, provided that aesthetics are appropriately addressed. To conclude, we see a social shift from institutional to home-based care, in which information communication technology based solutions now afford the possibility of aging-in-place for the many thousands of people having mild to moderate cognitive impairment.

The Siren Kiera Cass, 2016-01-26 #1 New York Times bestseller A sweeping stand-alone fantasy romance from Kiera Cass, author of the bestselling, beloved *Selection* series. Kahlen is a Siren—bound to serve the Ocean by luring humans to their watery graves with her voice, which is deadly to any human who hears it. Akinli is human—a kind, handsome boy who’s everything Kahlen ever dreamed of. Falling in love puts them both in danger... but will Kahlen risk everything to follow her heart? This star-crossed YA romance is sure to captivate readers who grew up loving *The Little*

Mermaid or fans of Jennifer Donnelly's Waterfire Saga. Originally self-published, The Siren has been completely rewritten for this edition. Don't miss The Betrothed, a glittering royal romance sure to captivate Kiera Cass's legion of loyal readers and lovers of courtly intrigue alike!

Wilde Fire Lucy Lennox,2021-04-02 Otto: Seth Walker was my first love and I always swore he'd be my last. Even after he moved away our senior year in high school, we vowed to reunite after graduation. But when he suddenly broke things off without explanation and crushed my heart, it was my turn to run. After a decade in the navy, I've finally come home ready to move on with my life as Hobie's newest firefighter. Unfortunately, the minute I set eyes on the new sheriff in town, I know I'm screwed. Hobie's top cop is none other than Seth Walker. Turns out, he's come home too. And hell if he doesn't have a lot of explaining to do. Walker: I thought I was doing the right thing when I walked away from Otto Wilde ten years ago without an explanation. I was wrong. I also thought I could come back home without having to face my past mistakes. I was wrong about that too. What I'm not wrong about: The fact that my heart catches fire every time I set eyes on the sexy man. The fact that I can't imagine my life without him. The fact that things are still just as complicated now as they were then. And the fact that I have a lot of work ahead of me if I expect to win him back. Just when things start heating up between us again, a serial arsonist strikes and suspicion falls close to home. I already lost Otto to a secret long ago but I'll be damned if I let another threaten to send our future up in smoke. Because Otto Wilde is mine, and I don't plan on ever letting him go again. Each novel in the Forever Wilde series can be read on its own or as part of the series. Fair warning, there will be nekkid man parts touching, meddling patriarchs, sweet second-chance love themes, and a dearly departed donkey named Debbie Gibson.

Working with Age J C Marquie,Paumes D Cau-Bareille,S Volkoff,2003-09-02 In the late 1990s age is a pressing concern on a scale previously unimaginable in the social sciences and caring professions. The inexorable development of the age pyramid and the quick pace of technological change has brought work and age together as inter-linked areas of study and intervention.; This text introduces current academic thinking on work and age and describes ways in which working methods, the organization of work, and innovative programmes (such as tailored training) can be introduced to reflect more accurately an intrinsic part of human life: ageing. The book encompassing physiological, psychological and social factors. The object is to define clearly diverse aspects involved in the passing of time - ageing, generational effects, experience and other marks of time. Their combined effects reveal different signs of ageing on behaviour as well as on strategies to contend with professional requirements at different stages in life.; The style of this text

makes it accessible to a non-specialist public but also opens avenues for those who wish to delve deeper into the matter to discover the state-of-the-art questions and issues being addressed in international work and age research.

Knowledge, Innovation, and Impact Andrew Sixsmith, Judith Sixsmith, Alex Mihailidis, Mei Lan Fang, 2020-12-22 This book provides researchers with a straightforward and accessible guide for carrying out research that will help them to combine good science with real-world impact. The format of this book is simple: concise chapters on key topics, examples and case studies, written in plain language that will guide researchers through the process of research-driven innovation. The book draws on the editors' experience in leading the Age-Well Network of Excellence. The aim of Age-Well is to drive innovation in the area of technology and aging. Researchers often lack the knowledge and abilities to commercialize or mobilize the outcomes of their research. Moreover, there is a lack of training and education resources suitable for the wide range of disciplines and experience that are becoming more typical. The book emphasizes the practicalities of "how to" undertake the kinds of activities that researchers should be engaging in if they are serious about achieving impact. Overall, this book will guide researchers through the process of research-driven innovation.

VANET Hannes Hartenstein, Kenneth Laberteaux, 2009-11-04 This book provides an invaluable introduction to inter-vehicular communications,

demonstrating the networking and communication technologies for reducing fatalities, improving transportation efficiency, and minimising environmental impact. This book addresses the applications and technical aspects of radio-based vehicle-to-vehicle and vehicle-to-infrastructure communication that can be established by short- and medium range communication based on wireless local area network technology (primarily IEEE 802.11). It contains a coherent treatment of the important topics and technologies contributed by leading experts in the field, covering the potential applications for and their requirements on the communications system. The authors cover physical and medium access control layer issues with focus on IEEE 802.11-based systems, and show how many of the applications benefit when information is efficiently disseminated, and the techniques that provide attractive data aggregation (also includes design of the corresponding middleware). The book also considers issues such as IT-security (means and fundamental trade-off between security and privacy), current standardization activities such as IEEE 802.11p, and the IEEE 1609 standard series. Key Features: Covers the state-of-the-art in the field of vehicular inter-networks such as safety and efficiency applications, physical and medium access control layer issues, middleware, and security Shows how vehicular networks differ from other mobile networks and illustrates the idea of vehicle-to-vehicle communications with application scenarios and with current proofs of concept worldwide Addresses current standardization activities such as IEEE 802.11p and the IEEE 1609 standard series Offers a chapter on mobility models and their use for simulation of vehicular inter-networks Provides a coherent treatment of the important topics and technologies contributed by leading academic and industry experts in the field This book provides a reference for professional automotive technologists (OEMS and suppliers), professionals in the area of Intelligent Transportation Systems, and researchers attracted to the field of wireless vehicular communications. Third and fourth year undergraduate and graduate students will also find this book of interest. For additional information please visit <http://www.vanetbook.com>

Modelling Driver Behaviour in Automotive Environments Carlo Cacciabue, 2010-04-28 This book presents a general overview of the various factors that contribute to modelling human behaviour in automotive environments. This long-awaited volume, written by world experts in the field, presents state-of-the-art research and case studies. It will be invaluable reading for professional practitioners graduate students, researchers and alike.

Beginner's Guide to Drawing Manga Chibi Girls Mosoko Miyatsuki, Tsubura Kadomaru, 2021-06-29 Expressive eyes, oversized heads and doll-like cuteness--chibi are beloved in the world of manga! Beginner's Guide to Drawing Manga Chibi Girls shows artists of all ages and abilities how to create

their own kawaii characters in six, easy-to-follow lessons. Step-by-step instructions walk you through the basics every aspiring artist needs to learn, like body proportions and facial expressions. Once you've mastered those, learn how to add different hats, hairstyles and costumes to your chibi girls or pose them in fun positions--from jumping for joy to hugging a friend. This all-in-one guide includes everything you need to start drawing these adorably exaggerated manga characters: Photo-illustrated tutorials let you look over the authors' shoulders as they create original chibi characters from scratch, right before your eyes! Before-and-after comparisons help you pinpoint mistakes and avoid common pitfalls Step-by-step progressions that help you master a range of head-to-body ratios and create charming figures that pop off the page Professional manga artists and chibi experts Mosoko Miyatsuki and Tsubura Kadomaru guide you through the drawing process and essential steps as your characters take shape. Follow along as they offer a trove of tips and examples, which help you to track and assess your progress. Before you know it, you'll be creating super cute chibi girls all on your own!

Vehicular Networks André-Luc Beylot,Houda Labiod,2013-06-12 Over the last few years vehicular networks have been receiving alot of attention from academia, industry, standardization bodies,and the various transportation agencies and departments of manygovernments around the world. It is envisaged in the next decadethat the Intelligent Transportation System (ITS) will become anessential part of our daily life. This book describes models and/oralgorithms designed to investigate evolutionary solutions toovercome important issues such as congestion control, routing,clustering, interconnection with long-term evolution (LTE) and LTEadvanced cellular networks, traffic signal control and analysis ofperformances through simulation tools and the generation ofvehicular mobility traces for network simulations. It provides an up-to-date progress report on the most significantcontributions carried out by the specialized research community inthe various fields concerned, in terms of models and algorithms.The proposals and new directions explored by the authors are highlyoriginal, and a rather descriptive method has been chosen, whichaims at drawing up complete states of the art as well as providingan overall presentation of the personal contributions brought bythe authors and clearly illustrating the advantages and limitationsas well as issues for future work. The Complete Book of Drawing Barrington Barber, 2018-01-16 What does every budding artist need to know about drawing? And what quick skills can you pick up to help you on the way? In this instructive book, Barrington Barber shows you just this, offering tips and tricks as he guides you through the fundamental aspects of drawing. Get to grips with still-life composition, draw dynamic bodies in motion, and capture the spectacular natural world. The Complete Book of Drawing is a distillation of the many skills that the aspiring artist needs to develop. As Barrington Barber knows from his many years of teaching and practising art, it is crucial for you to develop your own artistic style. And, uniquely among practical art books, this is what The Complete Book of Drawing provides. By revealing the nuances of texture, composition and perspective, this book will enable you to look at the world around you with fresh eyes.

Intelligent Transport Systems Standards Bob Williams, 2008-04 This one-stop resource provides a state-of-the-art review of intelligent transport systems, services, and supporting technologies, and updates you on the latest ITS standards governing communications, technical support, information technology, and identification technology. You find details on standards covering everything from traveler information and traffic management, to weather monitoring and emergency response.

Vehicle Safety Communications Tao Zhang, Luca Delgrossi, 2012-09-04 Provides an up-to-date, in-depth look at the current research, design, and implementation of cooperative vehicle safety communication protocols and technology. Improving traffic safety has been a top concern for transportation agencies around the world and the focus of heavy research and development efforts sponsored by both governments and private industries. Cooperative vehicle systems—which use sensors and wireless technologies to reduce traffic accidents—can play a major role in making the world's roads safer. *Vehicle Safety Communications: Protocols, Security, and Privacy* describes fundamental issues in cooperative vehicle safety and recent advances in technologies for enabling cooperative vehicle safety. It gives an overview of traditional vehicle safety issues, the evolution of vehicle safety technologies, and the need for cooperative systems where vehicles work together to reduce the number of crashes or mitigate damage when crashes become unavoidable. Authored by two top industry professionals, the book: Summarizes the history and current status of 5.9 GHz Dedicated Short Range Communications

(DSRC) technology and standardization, discussing key issues in applying DSRC to support cooperative vehicle safety. Features an in-depth overview of on-board equipment (OBE) and roadside equipment (RSE) by describing sample designs to illustrate the key issues and potential solutions. Takes on security and privacy protection requirements and challenges, including how to design privacy-preserving digital certificate management systems and how to evict misbehaving vehicles. Includes coverage of vehicle-to-infrastructure (V2I) communications like intersection collision avoidance applications and vehicle-to-vehicle (V2V) communications like extended electronic brake lights and intersection movement assist. Vehicle Safety Communications is ideal for anyone working in the areas of—or studying—cooperative vehicle safety and vehicle communications.

How to Draw Anything Anytime Kamo, 2021-08-31 Author and artist Kamo is back with her ever-popular doodles! Cute, funny and simple drawings—alongside step-by-step instructions—are sure to inspire readers of all ages to sit down and start doodling. Begin with a line or squiggle, and then turn it into a face, animal or anything else that your imagination conjures up. The point is just to draw—anytime, anywhere, anything—and, most of all, to have fun while you are doing it! With more than 1000 examples, *How to Draw Anything Anytime* includes: People of all ages Animals from sea otters to giraffes and sloths to turtles Food and drinks including coffee, popcorn, sushi and lots of other appetizing treats Transportation, whether traveling by submarine, UFO or bus Astrological signs and zodiac animals Japanese and latin alphabet lettering Clever borders for decorating edges The adorable images throughout the book provide inspiration. Whether doodling digitally or on paper, use your drawings to decorate bookmarks, office supplies, bags, cards, invitations, notebooks, mobiles, window hangings and more. Sample cartoon strips show you how to incorporate your doodles into a bigger project. Fans of Kamo's other doodle books love her instantly recognizable style. Unlike serious art books, there are no rules to follow and no classes to take. All that's needed is a free hand and a free spirit—follow your lines and see where they take you.

Proceedings of the FISITA 2012 World Automotive Congress SAE-China, FISITA, 2012-11-14 Proceedings of the FISITA 2012 World Automotive Congress are selected from nearly 2,000 papers submitted to the 34th FISITA World Automotive Congress, which is held by Society of Automotive Engineers of China (SAE-China) and the International Federation of Automotive Engineering Societies (FISITA). This proceedings focus on solutions for sustainable mobility in all areas of passenger car, truck and bus transportation. Volume 7: Vehicle Design and Testing (I) focuses on: •Vehicle Performance Development •Vehicle Integration Platformized and Universal Design •Development of CAD /CAE/CAM and CF Methods in Automotive

Practice •Advanced Chassis, Body Structure and Design •Automotive Ergonomic, Interior and Exterior Trim Design •Vehicle Style and Aerodynamic Design •New Materials and Structures Above all researchers, professional engineers and graduates in fields of automotive engineering, mechanical engineering and electronic engineering will benefit from this book. SAE-China is a national academic organization composed of enterprises and professionals who focus on research, design and education in the fields of automotive and related industries. FISITA is the umbrella organization for the national automotive societies in 37 countries around the world. It was founded in Paris in 1948 with the purpose of bringing engineers from around the world together in a spirit of cooperation to share ideas and advance the technological development of the automobile.

Intelligent Transport Systems in Europe Mike McDonald,2006 This book provides valuable insight and critical appraisal of key areas of intelligent transport systems (ITS) for land transport in Europe. ITS is becoming increasingly important as the means to improving the efficiency, safety and comfort of the transport of people and goods while at the same time helping to minimize environmental damage and the contribution of transport to global warming. The material draws on over four years of study by the ROSETTA project OCo part of the European Commission 5th Framework Program. For each of the 12 areas addressed, the book provides a vision for their application, identifies key issues yet to be addressed and the future opportunities that the timely application and advancement of ITS can bring.

Automotive Internetworking Timo Kosch,Christoph Schroth,Markus Strassberger,Marc Bechler,2012-04-09 A complete introduction to car-to-X communications networking Automotive Inter-networking will introduce a range of new network and system technologies for vehicle safety, entertainment and comfort systems currently being researched and developed. C2X networking is not only a matter of technology, but is also very closely related to policy-making about deployment. This book will provide the background on technical developments but will also discuss the potential benefits, costs and risks. Also discussed will be concepts related to application of vehicle-to-vehicle and vehicle-to-infrastructure communication technologies for various purposes such as automobile safety enhancement, vehicle user applications for comfort and convenience and efficiency along with other potential commercial applications. Application domains will build the starting point for an analysis of the requirements on suitable mobile network technology and the book will look at how well existing and new systems match these requirements. New automotive-specific technologies are presented in detail, explaining millimeter wave short range systems and special automotive network protocols. Specially designed system services and security mechanisms

are introduced and system architecture, radio spectrum use, medium access control, network protocols and security concepts and considered. Finally, the book will present the current world-wide standardization activities, deployment strategies and an outlook about the evolvement of inter-vehicle communications in the next decades. Presents a comprehensive top-down approach to the newly evolving car-to-X communications networking Provides a broad overview of all relevant C2X communication topics Written by well known experts in the field Predicts the outlook of the evolvement of inter-vehicle communications in the next decades Includes illustrations and high-level technical sketches of application domains and photographs, 3D renderings and professional graphical sketches of current prototypes

Adopting the Song of Expression: An Emotional Symphony within Mobisafe Photo Recording Privacy Safe

In a global taken by monitors and the ceaseless chatter of instantaneous interaction, the melodic beauty and mental symphony created by the published word usually diminish in to the back ground, eclipsed by the persistent noise and distractions that permeate our lives. However, located within the pages of Mobisafe Photo Recording Privacy Safe a charming fictional prize filled with raw emotions, lies an immersive symphony waiting to be embraced. Crafted by an outstanding musician of language, that interesting masterpiece conducts readers on an emotional journey, well unraveling the concealed tunes and profound affect resonating within each carefully constructed phrase. Within the depths of the emotional analysis, we will discover the book is main harmonies, analyze its enthralling publishing style, and submit ourselves to the profound resonance that echoes in the depths of readers souls.
