*Contemporary Issues in Higher Education* Marybeth Gasman,Andrés Castro Samayoa,2018-12-12 The latest text in the

Core Concepts in Higher Education series, this volume speaks to the complex dimensions that higher education scholars and educators need to understand about the shifting role of postsecondary education in the United States. Chapter authors clarify current issues affecting the field, and offer fresh perspectives articulating how policy, demographic, and institutional changes influence the everyday practices of those who work in higher education. This book explores macro perspectives affecting institutional decision-making and processes as well as students' perspectives on campus—from colleges' credentialing procedures to the current demographic changes in students' enrollments, to students' social identities. Guiding questions at the end of each chapter offer readers an opportunity to frame discussions in which they can engage and invite readers to consider avenues for future research and exploration. This is a valuable resource for graduate students, administrators, and researchers who seek to understand and improve the policies and contexts of higher education today.

**Chocolate Cities** Marcus Anthony Hunter, Zandria Robinson, 2018-01-16 When you think of a map of the United States, what do you see? Now think of the Seattle that begot Jimi Hendrix. The Dallas that shaped Erykah Badu. The Holly Springs, Mississippi, that compelled Ida B. Wells to activism against lynching. The Birmingham where Martin Luther King, Jr., penned his most famous missive. Now how do you see the United States? *Chocolate Cities* offers a new cartography of the United States—a “Black Map” that more accurately reflects the lived experiences and the future of Black life in America. Drawing on cultural sources such as film, music, fiction, and plays, and on traditional resources like Census data, oral histories, ethnographies, and health and wealth data, the book offers a new perspective for analyzing, mapping, and understanding the ebbs and flows of the Black American experience—all in the cities, towns, neighborhoods, and communities that Black Americans have created and defended. Black maps are consequentially different from our current geographical understanding of race and place in America. And as the United States moves toward a majority minority society, *Chocolate Cities* provides a broad and necessary assessment of how racial and ethnic minorities make and change America's social, economic, and political landscape.

The Architecture of Diplomacy Jane C. Loeffler, 1998-07 The *Architecture of Diplomacy* reveals the complex interplay of architecture, politics, and power in the history of America's embassy-building program. Through colorful personalities, bizarre episodes, and high drama this compelling story takes readers from scandalous inspection junkets by members of Congress to bugged offices at the Moscow embassy to the daring rescue of American personnel in Somalia by Marines and Navy Seals. Rigorously researched and lucidly written, *The Architecture of Diplomacy* focuses on the embassy-building program during the Cold War years, when the United States initiated a massive construction campaign that would demonstrate its commitment to its allies and assert its presence as a superpower.

*Convergence Culture* Henry Jenkins, 2008-09 “What the future fortunes of [Gramsci's] writings will be, we cannot know. However, his permanence is already sufficiently sure, and justifies the historical study of his international reception. The present collection of studies is an indispensable foundation for this.” –Eric

Hobsbawm, from the preface Antonio Gramsci is a giant of Marxian thought and one of the world's greatest cultural critics. Antonio A. Santucci is perhaps the world's preeminent Gramsci scholar. Monthly Review Press is proud to publish, for the first time in English, Santucci's masterful intellectual biography of the great Sardinian scholar and revolutionary. Gramscian terms such as "civil society" and "hegemony" are much used in everyday political discourse. Santucci warns us, however, that these words have been appropriated by both radicals and conservatives for contemporary and often self-serving ends that often have nothing to do with Gramsci's purposes in developing them. Rather what we must do, and what Santucci illustrates time and again in his dissection of Gramsci's writings, is absorb Gramsci's methods. These can be summed up as the suspicion of "grand explanatory schemes," the unity of theory and practice, and a focus on the details of everyday life. With respect to the last of these, Joseph Buttigieg says in his Nota: "Gramsci did not set out to explain historical reality armed with some full-fledged concept, such as hegemony; rather, he examined the minutiae of concrete social, economic, cultural, and political relations as they are lived in by individuals in their specific historical circumstances and, gradually, he acquired an increasingly complex understanding of how hegemony operates in many diverse ways and under many aspects within the capillaries of society." The rigor of Santucci's examination of Gramsci's life and work matches that of the seminal thought of the master himself. Readers will be enlightened and inspired by every page.

**How Racism Takes Place** George Lipsitz, 2011-03-11 How racism shapes urban spaces and how African Americans create vibrant communities that offer models for more equitable social arrangements.

**Black Towns, Black Futures** Karla Slocum, 2019-09-17 Some know Oklahoma's Black towns as historic communities that thrived during the Jim Crow era—this is only part of the story. In this book, Karla Slocum shows that the appeal of these towns is more than their past. Drawing on interviews and observations of town life spanning several years, Slocum reveals that people from diverse backgrounds are still attracted to the communities because of the towns' remarkable history as well as their racial identity and rurality. But that attraction cuts both ways. Tourists visit to see living examples of Black success in America, while informal predatory lenders flock to exploit the rural Black economies. In Black towns, there are developers, return migrants, rodeo spectators, and gentrifiers, too. Giving us a complex window into Black town and rural life, Slocum ultimately makes the case that these communities are places for affirming, building, and dreaming of Black community success even as they contend with the sometimes marginality of Black and rural America.

*Parenting in a Changing Climate* Elizabeth Bechard,2021-09-12 What's it like to wake up to the reality of climate change--while also trying to raise small children? As parents, how do we act on our values when we're already exhausted from the day-to-day challenges of parenting? After an unconventional journey to motherhood in 2016, Elizabeth Bechard found herself struggling with climate anxiety and grief. As a coach, she had also noticed a troubling trend of rising climate dread in her clients, all of whom were struggling with various forms of infertility and pregnancy loss. 'Parenting in a Changing Climate' blends intimate memoir with Bechard's experience as a coach and researcher, drawing on science from the study of climate psychology, science communication, health disparities, resilience, and behavior change. This book offers practical tools, resources, and inspiration for parents who are worried about the planet future generations will inherit and who want to find ways to cultivate resilience and take action on behalf of the children they love.

**The Future of the Internet** Jonathan Zittrain,2009-05-28 In The Future of the Internet: And How to Stop It Jonathan Zittrain explores the dangers the internet faces if it fails to balance ever more tightly controlled technologies with the flow of innovation that has generated so much progress in the field of technology. Zittrain argues that today's technological market is dominated by two contrasting business models: the generative and the non-generative. The generative models - the PCs, Windows and Macs of this world - allow third parties to build upon and share through them. The non-generative model is more restricted; appliances such as the xbox, iPod and tomtom might work well, but the only entity that can change the way they operate is the vendor. If we want the internet to survive we need to change. People must wake up to the risk or we could lose everything.

**A Desolate Place for a Defiant People** Daniel Sayers,2014-11-25 In the 250 years before the Civil War, the Great Dismal Swamp of Virginia and North Carolina was a brutal landscape—2,000 square miles of undeveloped and unforgiving wetlands, peat bogs, impenetrable foliage, and dangerous creatures. It was also a protective refuge for marginalized communities, including Native Americans, African-American maroons, free African Americans, and outcast Europeans. Here they created their own way of life, free of the exploitation and alienation they had escaped. In the first thorough examination of this vital site, Daniel Sayers examines the area's archaeological record, exposing and unraveling the complex social and economic systems developed by these defiant communities that thrived on the periphery. He develops an analytical framework based on the complex interplay between alienation, diasporic exile, uneven geographical development, and modes of production to argue that colonialism

and slavery inevitably created sustained critiques of American capitalism.
