My Fox Ate My Alarm Clock David Blaze,2017-08-30 My name is Jonah Johnson, and I'm in the 6th grade -- but please call me Joe. My whole world was made better when I met a talking fox. I'm about to find out how Fox got the ability to walk and talk like humans. But before I can, we have to avoid a whole new enemy that wants to take Fox away. Oh, and Fox teaches a squirrel, opossum, rabbit, and raccoon how to fart!

**All My Love, Moe** Theresa Mosier Larson,2015-02-28 In May of 1951, at the age of thirty-two, Art "Moe" Mosier was deployed to Taipei, Formosa, for an eighteen-month tour during the Korean War with the Army. Married just twenty months, he left his wife, Jean, and his eleven-month-old daughter behind in Wisconsin until his return in September of 1952. In *All My Love*, author Theresa Mosier Larson, the youngest of Moe and Jean's children, shares a collection of letters her father wrote home while stationed in what is now known as Taiwan. In his correspondence, Moe expresses thoughts and feelings about his job in a foreign country and the loneliness of being separated from his family during a time of war. Written in a time before computers and the internet, Moe's letters show insight into one man's integrity as he seeks to stay in touch with his family across the world.

**Reclaiming Conversation** Sherry Turkle,2016-10-04 "In a time in which the ways we communicate and connect are constantly changing, and not always for the better, Sherry Turkle provides a much needed voice of caution and reason to help explain what the f\*\*\* is going on." —Aziz Ansari, author of *Modern Romance* Renowned media scholar Sherry Turkle investigates how a flight from conversation undermines our relationships, creativity, and productivity—and why reclaiming face-to-face conversation can help us regain lost ground. We live in a technological universe in which we are always communicating. And yet we have sacrificed conversation for mere connection. Preeminent author and researcher Sherry Turkle has been studying digital culture for over thirty years. Long an enthusiast for its possibilities, here she investigates a troubling consequence: at work, at home, in politics, and in love, we find ways around conversation, tempted by the possibilities of a text or an email in which we don't have to look, listen, or reveal ourselves. We develop a taste for what mere connection offers. The dinner table falls silent as children compete with phones for their parents' attention. Friends learn strategies to keep conversations going when only a few people are looking up from their phones. At work, we retreat to our screens although it is conversation at the water cooler that increases not only productivity but commitment to work. Online, we only want to share opinions that our followers will agree with – a politics that shies away from the real conflicts and solutions of the public square. The case for conversation begins with the necessary conversations of solitude and self-reflection. They are endangered: these days, always connected, we see loneliness as a problem that technology should solve. Afraid of being alone, we rely on other people to give us a sense of ourselves, and our capacity for empathy and relationship suffers. We see the costs of the flight from conversation everywhere: conversation is the cornerstone for democracy and in business it is good for the bottom line. In the private sphere, it builds empathy, friendship, love, learning, and productivity. But there is good news: we are resilient. Conversation cures. Based on five years of research and interviews in homes, schools, and the workplace, Turkle argues that we have come to a better understanding of where our technology can and cannot take us and that the time is right to reclaim conversation. The most

human—and humanizing—thing that we do. The virtues of person-to-person conversation are timeless, and our most basic technology, talk, responds to our modern challenges. We have everything we need to start, we have each other. Turkle's latest book, *The Empathy Diaries* (3/2/21) is available now.

*Epilog* Clifford D. Simak, 2023-07-11 A volume of eleven stories from the Hugo Award-winning science fiction author that explore inner space, future worlds, and the peculiar lives of robots. One of the twentieth century's most pioneering science fiction authors, Clifford D. Simak had a special fondness for robots. Not only did these thinking machines represent the boundless possibilities of technology, they also had the potential to bring—in his words—"the kindness and the courage that I thought were needed in the world." The stories in this volume offer a variety of Simak's unique robot visions. In "Lulu," a robot built for planetary exploration takes on a female identity, causing unforeseen challenges for her three-man crew. An examination of an unknown planet reveals the celestial body to be a single, gigantic computer whose origins and purpose are a mystery, in "Limiting Factor." And in the title story, Simak returns to his longest-running robot character, Jenkins, who reflects on all that has come and gone one last time. Each story includes an introduction by David W. Wixon, literary executor of the Clifford D. Simak estate and editor of this ebook.
