Materials for Chemical Sensing Thiago Regis Longo Cesar Paixão,Subrayal Medapati Reddy,2016-11-23

This book covers new materials used as analytical devices for increasing the interactions between the development of new analytical devices and materials science. The authors describe how different types of materials such as polymers, self-assembled layers, phthalocyanines, and nanomaterials can further enhance sensitivity and promote selectivity between analytes for different applications. They explain how continuing research and discussion into materials science for chemical sensing is stimulating the search for

different strategies and technologies that extract information for these chemical sensors in order to obtain a chemical fingerprint of samples.

Calixarenes and Beyond Placido Neri, Jonathan L. Sessler, Mei-Xiang Wang, 2016-08-12 Contributions featuring the chemistry and applications of a family of macrocyclic compounds collectively known as 'calixarenes' are presented in this edited volume. The arsenal of structures based on calixarenes provides tools which are effective in numerous areas of supramolecular chemistry. The Editors have compiled a timely volume which contains up to date, high calibre contributions from a large number of international authors. A broad perspective on the progress and future of calixarene chemistry is presented. Aimed at students and researchers active in Supramolecular Chemistry.

Wedded Strangers Lynn Visson, 2001 Russian-American marriages reflect many of the same issues and problems of other inter-cultural marriages, but at the same time face some unique challenges. Since the publication of the first edition of *Wedded Strangers* in 1998, the number of these mixed couples has soared. Improved relations between the countries have brought hundreds of Russians to the U.S., while Americans continue to travel to Russia for business, study and tourism. Dozens of dating and marriage agencies in the two countries are busy matching Russians with Americans. The Internet, chat rooms, e-mail, and list servers for Russian-American couples and for people seeking spouses have revolutionized romance. Further, the end of the Soviet Union has eased travel restrictions, heartbreak over denied visas, and harassment of these couples. In response to these factors and to the hundreds of letters, phone calls and e-mails that poured in from couples who read the first edition and wanted to share their own stories, Dr.

Visson has expanded Wedded Strangers with new material, including a chapter on marriages resulting from the phenomenal growth of agencies and Internet sites which introduce American men to Russian women. Another chapter deals with contemporary young couples who choose to live in both Russia and the U.S. A third chapter is devoted to the results of these marriages: a new generation of Russian-American children. The author shows how the couples differ in their attitudes toward raising children and explores the hopes and frustrations of these families.

Contemporary Entrepreneurship Dieter Bögenhold,Jean Bonnet,Marcus Dejardin,Domingo Garcia Pérez de Lema,2016-03-17 This book presents the current state-of-the-art in all major and upcoming areas of entrepreneurship research. Thousands of scholars around the world are currently working to broaden our understanding of the entrepreneurial phenomenon. The disciplines involved are numerous, as are the topics of interest, with substantial efforts to enhance the existing knowledge. This book is specifically designed to facilitate high-level, high-intensity discussions and fruitful exchanges between scholars involved in entrepreneurship research. The articles address a variety of topics ranging from self-employment, technology, growth patterns and job creation, and success and failure rates, to historical, conceptual and comparative international approaches. “This book takes entrepreneurship beyond the individual, size of the venture, entrepreneurial personality, and looks at entrepreneurship as a long term complex process that is heterogeneous, content dependent with an emphasis on innovation and growth. A must read for individuals interested in entrepreneurship, today and in the future, on a domestic and global basis.” – Robert D. Hisrich, Director – Walker Center and Garvin Professor of Global Entrepreneurship, Thunderbird School of Global Management “Entrepreneurship is perhaps not just the most multifaceted but also the most important concept of the modern socio-economic disciplines. This book makes an invaluable contribution in this fascinating area: it presents a multifaceted socio-economic examination of the impact of entrepreneurship for growth.” – Roy Thurik, Erasmus School of Economics in Rotterdam and Montpellier Business School

Fluorescent Chemosensors for Ion and Molecule Recognition Anthony W. Czarnik, American Chemical Society. Meeting, 1993 From an August 1992 symposium in Washington, D.C., 13 papers report on research into developing fluorescent chemosensors for devices to monitor several critical parameters of blood composition in real time. They aim at opening communication between the clinicians and researchers who want such devices and the scientists and engineers who could develop them. Among the topics are the synthesis and study of crown ethers with alkali- metal-enhanced fluorescence, the tunable fluorescence of some macrocyclic anthracenophanes, and fluorescent probes in studies of proteases. Emmanuel's Book Pat Rodegast, Judith Stanton, 2011-03-23 Here is the revealing underground classic, a work that stands beside the Seth books as a delightful and invaluable guide to our inner spirit and our outer world. Emmanuel speaks to us through Pat Rodegast and shares his wisdom and insights on all aspects of life. Beautifully written and illustrated, Emmanuel's Book I is to be treasured, enjoyed and passed on to a friend. Emmanuel says: The gifts I wish to give you are my deepest love, the safety of truth, the wisdom of the universe and the reality of God . . . The issue of whether there is a Greater Reality or not, for me at least, has been settled. I know that there is. So I will speak to you from the knowing that I possess. Ram Dass, in the introduction, says: Being with Emmanuel one comes to appreciate the vast evolutionary context in which our lives are being lived . . . And at each moment we are at just the right place in the journey. As Emmanuel points out, 'Who you are is a necessary step to being who you will be.'

Topics in Fluorescence Spectroscopy Joseph R. Lakowicz, 1994-11-30 Time-resolved fluorescence spectroscopy is widely used as a research tool in biochemistry and biophysics. These uses of fluorescence have resulted in extensive knowledge of the structure and dynamics of biological macromolecules. This information has been gained by studies of phenomena that affect the excited state, such as the local environment, quenching processes, and energy transfer. Topics in Fluorescence Spectroscopy, Volume 4:

Probe Design and Chemical Sensing reflects a new trend, which is the use of time-resolved fluorescence in analytical and clinical chemistry. These emerging applications of time-resolved fluorescence are the result of continued advances in laser detector and computer technology. For instance, photo-multiplier tubes (PMT) were previously bulky devices. Miniature PMTs are now available, and the performance of simpler detectors is continually improving. There is also considerable effort to develop fluorophores that can be excited with the red/near-infrared (NIR) output of laser diodes. Using such probes, one can readily imagine small time-resolved fluorometers, even hand-held devices, being used for doctor's office or home health care.
