Chemistry in Context Bradley D. Fahlman,Kathleen Purvis-Roberts,John S. Kirk,Resa M. Kelly,Patrick L. Daubenmire,2024 Climate change. Water contamination. Air pollution. Food shortages. These and other global issues are regularly featured in the media. However, did you know that chemistry plays a crucial role in addressing these challenges? A knowledge of chemistry is also essential to improve the quality of our lives. For instance, faster electronic devices, stronger plastics, and more effective medicines and vaccines all rely on the innovations of chemists throughout the world. With our world so dependent on chemistry, it is unfortunate that most chemistry textbooks do not provide significant details regarding real-world applications. Enter Chemistry in Context-the book that broke the mold. Since its inception in 1993, Chemistry in Context has focused on the presentation of chemistry fundamentals within a contextual framework--

The Alien Communication Handbook Brian S. McConnell,2021-10-18 Scientists have been searching for signals from extraterrestrial civilizations since Frank Drake's first radio survey in 1960. But what would actually happen if SETI's search succeeds? Is there any way we could even make sense of the signal we receive? Written by an expert in communication systems and translation technology, this book explores the science of interstellar communication. It explains how this process may unfold, how an ET communication link would work, the types of information it could convey and how professionals, amateurs and ordinary people like you would participate in the effort to understand what another civilization has to say. Along the way, the book introduces readers to many aspects of modern-day communication systems and computing. Featured as well are dozens of illustrations, photos and real-world examples, rounding out this compelling foray into the mechanics of interstellar communication. "Scientists, policy makers, and all interested in the likely future discovery of alien life will want to read this book." - Steven J. Dick, Former NASA Chief Historian
