Advanced Molecular Plant Breeding D.N. Bharadwaj, 2018-10-29 This new volume provides a better understanding of molecular plant breeding in order to boost the quality of agriculture produce, to increase crop yields and to provide nutritious food for everyone by 2050. Scientists believe the challenge can be met by implementing new and improved techniques of quantitative trait inheritance in plant breeding. Integrating genomics and molecular biology into appropriate tools and methodologies can help to create genetically engineered plants, such as by using biotic and abiotic stress tolerance, molecular markers, ‘-omics’ technology, and genome editing.

Fire Ecology Henry A. Wright, Arthur W. Bailey, 1982-03-18 Regional Silviculture of the United States, 2nd Edition John W. Barrett This is the only regional silviculture text now on the market. It assesses the significant biological, physical, and economic qualities of forest regions in the continental U.S., and their effect on silviculture practices. The first chapter provides an overview of the forests of the U.S. and introduces the topic of social and institutional constraints on silviculture. Subsequent chapters each deal with a specific forest region, are written by a person intimately acquainted with the locality, and follow a regular outline to provide cohesion and facilitate regional comparisons. 1980 551 pp. Forest Ecology, 3rd Edition Stephen H. Spurr and Burton V. Barnes The growing interest and literature in this field created a need for a fresh updating of this classic text. It remains a comprehensive yet highly readable account of real world forests, including ecological aspects of successful forest management. Broad coverage embraces genetics and variation, environmental factors, site, community relations, ecosystem studies, glacial forest history, post-settlement history, composition and succession. 1980 687 pp. Wildlife Biology, 2nd Edition Raymond F. Dasmann This updated and revised edition of the standard introductory text brings together the principles of ecology and population biology and the practice of wildlife conservation and management. It presents basic information on the value and present status of wild animal life, including a history of human relationships with and attitudes toward wildlife. Examines wildlife within the context of ecosystems, indicating why single-species approaches to conservation and management often fail. 1981 212 pp.

From Art to Landscape W. Gary Smith, 2010-09-14 Garden designers face some daunting questions: How do I begin the creative process? Where can I find design inspiration? How will I know if my design is successful? If you approach these questions like an artist, with an artist’s tools and ways of looking at the world, you will be able to design gardens that combine the unique character of a place with your innermost creative spirit. You’ll make inspiring gardens that have real meaning, for yourself as well as others. In this luminous volume, landscape architect and artist W. Gary Smith explores the various means that artists use—including drawing, painting, sculpture, meditation, poetry, and dance—to create personal connections with the landscape that enrich and inform garden design. Part 1 focuses on simple techniques that anyone can use to nurture creativity, unleash the imagination, and get ideas down on paper. Part 2 shows how these techniques have shaped actual design projects—with spectacular results. Throughout, the author’s friendly and encouraging voice removes the shroud of mystery surrounding the creative process and shows how even the least artistically inclined can tap into inner resources they never knew they had. Smith’s own exuberant sketches and bold paintings illuminate the path from art to landscape. Infectiously engaging and unfailingly inspiring, this eye-opening book deserves to be read and reread by anyone who aspires to master the rich and demanding art of garden design.

Elegiac Love and Death in Vergil's Aeneid Sarah L. McCallum, 2024-01-12 Elegiac Love and Death in Vergil's 'Aeneid' poses new questions about Vergil's pervasive engagement with elegy, both amatory and funerary, throughout his final epic endeavor. A foundational discussion of elegiac experimentation in the Eclogues, Georgics, and Aeneid 1-6 explores the aesthetic and conceptual development of destructive Vergilian amor (passion). The unique emphasis of subsequent chapters on the amatory and funerary elegiac dimensions of crucial episodes in Aeneid 7-12

illuminates the intergeneric character of Vergil's martial maius opus. A detailed examination of the inter- and intratextual strands of pivotal moments in the Aeneid evinces Vergil's intense engagement with literary predecessors and contemporaries, his evolving artistic vision, and his enduring influence on subsequent Roman poets. Each chapter of this volume enhances our understanding of the generic complexity of the Aeneid, presenting revisionary readings of key episodes and transformative interpretations of its main characters.
