Patent Landscape Report - Hydrogen fuel cells in transportation World Intellectual Property Organization, 2022 Over the next decade, transforming the transportation sector to put it on a Net Zero pathway will require a combination of technological innovation, government and corporate decision-making, and adapted customer behavior. Reducing greenhouse gas emissions by transportation, a sector responsible for almost 24 percent of direct carbon dioxide emissions from fuel combustion is crucial. This WIPO Patent Landscape Report provides early observations on patenting activity together with complementary information from online news, press releases and corporate financial reporting in the field of hydrogen fuel cells in transportation.

The Korean Automotive Industry, Volume 1 A. J. Jacobs, 2021-12-10 In 1962, South Korea assembled just 1,100 new automobiles. By 1996, this total had soared to 2,812,714. What explains this remarkable growth? The answer is complex, and involves a combination of a supportive State, timely technology alliances, a skilled but historically low-paid workforce, aggressive pricing, savvy entrepreneurs, and fortuitous circumstances. Despite this amazing ascent, comparatively little has been written about the Korean auto industry in English. In the first of a two-volume set, this 11-chapter book seeks to help fill this void by providing in-depth examinations of all six of Korea's automakers from their beginnings through 1996. Uniquely written from the perspective of industry analysts at the time (without knowledge of the Asian Fiscal Crisis), the book should prove informative to practitioners, scholars, and students interested in automotive history, international political economy, Asian studies, and more. *Korea Money* , 1997

Strategy and Strategists James Cunningham, Brian Harney, 2012-03-29 Importantly, this stimulating text:

Kenya Gazette , 2005-10-07 The Kenya Gazette is an official publication of the government of the Republic of Kenya. It contains notices of new legislation, notices required to be published by law or policy as well as other announcements that are published for general public information. It is published every week, usually on Friday, with occasional releases of special or supplementary editions within the week.

Competing Chinese and Foreign Firms in Swelling Chinese Economy Tetsuo Abo, 2010 In the rapid growth of the Chinese economy as the world's factory and market, while this process has been supported by foreign companies, local Chinese companies have also emerged in the brief span of about 10 years to become major players. This is an extremely rare case in the world history and recently even among the BRICs and the NIEs. One cannot help but wonder what strategic positions foreign firms have adopted to cope with the extraordinary, fierce challenges they have had to face from local Chinese firms. A workshop discussed and illuminated the corporate activities and competitive and cooperative strategies of both Chinese and foreign firms from the perspective of Japanese, European, US and Asian firms.

Regulating FinTech in Asia Mark Fenwick,Steven Van Uytsel,Bi Ying,2020-07-28 This book focuses on Fintech regulation in Asian, situating local developments in broader economic, regulatory and technological contexts. Over the last decade, Fintech – broadly defined as the use of new information technologies to help financial institutions and intermediaries compete in the marketplace – has disrupted the financial services sector. Like other 21st century technological developments, Fintech is a global phenomenon that plays out in local economic, political and regulatory contexts, and this dynamic interplay between global trends and local circumstances has created a complex and fast-changing landscape. Diverse stakeholders (most obviously incumbent financial service providers, tech start-ups and regulators) all pursue a competitive edge against a background of profound uncertainty about the future direction and possible effects of multiple emerging technologies. Compounding these difficulties are uncertainties surrounding regulatory responses. Policymakers often struggle to identify appropriate regulatory responses and increasingly turn to policy experimentation. Such issues add to the challenges for the various actors operating in the Fintech space. This situation is particularly fluid in Asia, since many jurisdictions are seeking to establish themselves as a regional hub for new financial services.

Valuation Rajesh Kumar, 2015-11-05 *Valuation: Theories and Concepts* provides an understanding on how to value companies that employ non-standard accounting procedures, particularly companies in emerging markets and those that require a wider variety of options than standard texts provide. The book offers a broader, more holistic perspective that is perfectly suited to companies and worldwide markets. By emphasizing cases on valuation, including mergers and acquisition valuation, it responds to the growing expectation that students and professionals must generate comprehensive perspectives based on thorough investigations and a library of valuation theories. Readers will gain a better understanding of the development of complete analyses, including trend analysis of financial parameters, ratio analysis, and differing perspectives on valuation and strategic initiatives. Case studies include stock market performance and synergies and the intrinsic value of the firm are compared with offer price. In addition, full data sets for each chapter are available online. Provides an understanding on how to value companies that employ non-standard accounting procedures, particularly companies in emerging markets Gives readers the ability to compare the intrinsic value of the firm with the offer price Showcases a variety of valuation techniques and provides details about handling each part of the valuation process Each case has data in excel spreadsheets for all companies, and data sets for each chapter are available online
