Frances Lomas Feldman

Covert Wars and Breakaway Civilizations Joseph P. Farrell,2012-12-05 Oxford-educated historian Joseph P. Farrell really delivers in this latest addition to his best-selling book series on suppressed technology, Nazi survival and postwar hidden conflicts. His customary meticulous research and sharp analysis blow the lid off of a worldwide web of nefarious financial and technological control few people even suspect exists. Farrell delves into the creation of a breakaway civilization by the Nazis in South America and other parts of the world. He discusses the advanced technology that they took with them at the “end” of World War II and the psychological war that they waged for decades against America and NATO. He shows how the breakaway civilization has created a huge system of hidden finance with the involvement of the Vatican Bank (among others), and how NATO established a large covert warfare network and political slush fund. He investigates the secret space programs currently sponsored by the breakaway civilization and the current militaries in control of planet Earth. Farrell includes a fascinating discussion of “emulational” technologies (those that can manipulate acts of god/nature, like earthquakes and storms) from the standpoint of the culture of “full spectrum dominance” and the culture of “plausible deniability”-yes, there are plans for mass destruction that can never be traced back to their real source. Farrell also discusses the historical origin of the breakaway civilization with the continuing airship mystery; incredibly bold counterfeiting operations; and the nexus of spy satellites, nuclear weapons and UFOs. He includes plenty of astounding accounts, documents and speculation on the amazing alternative history of hidden conflicts, secret super-finance and technology.

Spam Finn Brunton,2015-01-30 What spam is, how it works, and how it has shaped online communities and the Internet itself. The vast majority of all email sent every day is spam, a variety of idiosyncratically spelled requests to provide account information, invitations to spend money on dubious products, and pleas to send cash overseas. Most of it is caught by filters before ever reaching an in-box. Where does it come from? As Finn Brunton explains in Spam, it is produced and shaped by many different populations around the world: programmers, con artists, bots and their botmasters, pharmaceutical merchants, marketers, identity thieves, crooked bankers and their victims, cops, lawyers, network security professionals, vigilantes, and hackers. Every time we go online, we participate in the system of spam, with choices, refusals, and purchases the consequences of which we may not understand. This is a book about what spam is, how it works, and what it means. Brunton provides a cultural history that stretches from pranks on early computer networks to the construction of a global criminal infrastructure. The history of spam, Brunton shows us, is a shadow history of the Internet itself, with spam emerging as the mirror image of the online communities it targets. Brunton traces spam through three epochs: the 1970s to 1995, and the early, noncommercial computer networks that became the Internet; 1995 to 2003, with the dot-com boom, the rise of spam's entrepreneurs, and the first efforts at regulating spam; and 2003 to the present, with the war of algorithms—spam versus anti-spam. Spam shows us how technologies, from email to search engines, are transformed by unintended consequences and adaptations, and how online communities develop and invent governance for themselves.

All the Money in the World Laura Vanderkam,2013-05-28 The universal lament about money is that there is never enough. We spend endless hours trying to figure out ways to stretch every dollar and kicking ourselves whenever we spend too much or save too little. For all the stress and effort we put into every choice, why are most of us unhappy about our finances? According to Laura Vanderkam, the key is to change your perspective. Instead of looking at money as a scarce resource, consider it a tool that you can use creatively to build a better life for yourself and the people you care about. Drawing on the latest happiness research as well as the stories of dozens of real people, Vanderkam offers a contrarian approach that forces us to examine our own beliefs, goals, and values.

Moneyland Oliver Bullough,2018-09-06 A SUNDAY TIMES BESTSELLER PRESENTER OF THE BBC RADIO 4 SERIES 'HOW TO STEAL A TRILLION' SHORTLISTED FOR THE ORWELL PRIZE 2019 SUNDAY TIMES BUSINESS BOOK OF THE YEAR AN ECONOMIST POLITICS AND CURRENT AFFAIRS BOOK OF THE YEAR A DAILY MAIL AND TIMES BOOK OF THE YEAR 'You cannot understand power, wealth and poverty without knowing about Moneyland.' Simon Kuper, New Statesman 2019: democracy is eating itself, inequality is skyrocketing, the system is breaking apart. Why? Because in 1962, some bankers in London had an idea that changed the world. That idea was called 'offshore'. It meant that, for the first time, thieves could dream big. They could take everything. Join investigative journalist Oliver Bullough on a journey into the hidden world of the new global kleptocrats. See the poor countries where public money is stolen and the rich ones where it is laundered and invested. Watch the crooks at work and at play, and meet their respectable, white-collar enablers. Learn how the new system works and begin to see how we can tackle it.

Sustainable Urban Development Reader Stephen M. Wheeler,Timothy Beatley,2014-10-03 Building on the success of its second edition, the third edition of the Sustainable Urban Development Reader provides a generous selection of classic and contemporary readings giving a broad introduction to this topic. It begins by tracing the roots of the sustainable development concept in the nineteenth and twentieth centuries, before presenting readings on a number of dimensions of the sustainability concept. Topics covered include land use and urban design, transportation, ecological planning and restoration, energy and materials use, economic development, social and environmental justice, and

green architecture and building. All sections have a concise editorial introduction that places the selection in context and suggests further reading. Additional sections cover tools for sustainable development, international sustainable development, visions of sustainable community and case studies from around the world. The book also includes educational exercises for individuals, university classes, or community groups, and an extensive list of recommended readings. The anthology remains unique in presenting a broad array of classic and contemporary readings in this field, each with a concise introduction placing it within the context of this evolving discourse. The Sustainable Urban Development Reader presents an authoritative overview of the field using original sources in a highly readable format for university classes in urban studies, environmental studies, the social sciences, and related fields. It also makes a wide range of sustainable urban planning-related material available to the public in a clear and accessible way, forming an indispensable resource for anyone interested in the future of urban environments.

Cowrie Shells and Cowrie Money Bin Yang,2018-12-07 Originating in the sea, especially in the waters surrounding the low-lying islands of the Maldives, *Cypraea moneta* (sometimes confused with *Cypraea annulus*) was transported to various parts of Afro-Eurasia in the prehistoric era, and in many cases, it was gradually transformed into a form of money in various societies for a long span of time. Yang provides a global examination of cowrie money within and beyond Afro-Eurasia from the archaeological period to the early twentieth century. By focusing on cowrie money in Indian, Chinese, Southeast Asian and West African societies and shell money in Pacific and North American societies, Yang synthesises and illustrates the economic and cultural connections, networks and interactions over a *longue durée* and in a cross-regional context. Analysing locally varied experiences of cowrie money from a global perspective, Yang argued that cowrie money was the first global money that shaped Afro-Eurasian societies both individually and collectively. He proposes a paradigm of the cowrie money world that engages local, regional, transregional and global themes.
