

Mongolia Economic Forum 10

Tobias Bleicker

Mongolia's Economic Prospects Matthias Helble, Hal Hill, Declan Magee, 2020-06-01 This publication examines Mongolia's recent economic development and outlines reforms that would help the country take advantage of its many opportunities. Mongolia is rich in natural resources and, although landlocked, is well-placed to boost trade with its two giant neighbors. The country needs to diversify its economy beyond mining, enhance economic stability, and increase employment. To maximize Mongolia's potential the government can improve macroeconomic management, enhance the skill base, and provide hard and soft infrastructure to promote trade and efficient logistics. Governance and institutional reforms are also crucial. The government will need to continue to drive reforms so that they are well implemented and deliver the intended change.

Mongolia and Northeast Asian Security Alicia J. Campi, Jagannath Panda, 2021-08-26 This book assesses Mongolia's position in the security calculus of Northeast Asia and presents the policy outlooks of major powers vis-a-vis the region, including the United States, Japan, China, Russia, and India. Ground-breaking and modernistic in its approach, the book treats the often marginalised and landlocked small power state of Mongolia as a critical regional actor, particularly with regards to managing ties with encircling major powers Russia and China and assist in engaging the nuclear state of North Korea through dialogue mechanisms. This compilation of chapters by distinguished scholars explores Mongolia in the Northeast Asian geographical space within the context of three major themes: nuclear proliferation, environmental security, and socio-economic and civilisational conflicts. The book provides a multidisciplinary and multinational approach to Mongolia's role in the region's strategic landscape. It moves the regional security discussion beyond major power politics, North Korea's denuclearisation, and the impasse on the Korean Peninsula to discuss and analyse other underappreciated challenges facing the region. Considering Mongolia's role in achieving peace and stability in the neighbourhood, the book will be a valuable resource for researchers and readers in International Relations, Political Science, and Asian Studies.

Mongolia International Monetary Fund. Asia and Pacific Dept, 2019-09-17 This Selected Issues paper aims to take stock of key challenges and propose recommendations on how to address them. Mongolia has taken important steps to address these challenges, but more should be done to tackle remaining gaps and ensure effective enforcement. Improving governance is a crucial step for Mongolia to achieve sustainable and inclusive growth. In order to substantially reduce corruption, a stronger anti-corruption framework should be accompanied by governance reforms across a range of state functions. On rule of law, the Worldwide Governance Indicators (WGI) place Mongolia above peers in Asia but below regional averages, indicating room for improvement. Although Mongolia has developed a legal framework since the transition to a market economy, observers point out that there are often loopholes and unintended consequences. Weak revenue administration can undermine fiscal sustainability while uneven enforcement of tax rules can damage the investment climate. State-owned enterprises would benefit from better governance, particularly given their central role in output and potential for creating fiscal liabilities.

The global competitiveness report 2009-2010 Klaus Schwab, 2009

Ten Years to Midnight Blair H. Sheppard, 2020-08-04 "Shows how humans have brought us to the brink and how humanity can find solutions. I urge people to read with humility and the daring to act." –Harpal Singh, former Chair, Save the Children, India, and former Vice Chair, Save the Children International In conversations with people all over the world, from government officials and business leaders to taxi drivers and schoolteachers, Blair Sheppard, global leader for strategy and leadership at PwC, discovered they all had surprisingly similar concerns. In this prescient and pragmatic book, he and his team sum up these concerns in what they call the ADAPT framework: Asymmetry of wealth; Disruption wrought by the unexpected and often problematic consequences of technology; Age disparities--stresses caused by very young or very old populations in developed and emerging countries; Polarization as a symptom of the breakdown in global and national consensus; and loss of Trust in the institutions that underpin and stabilize society. These concerns are in turn precipitating four crises: a crisis of prosperity, a crisis of technology, a crisis of institutional legitimacy, and a crisis of leadership. Sheppard and his team analyze the complex roots of these crises--but they also offer solutions, albeit often seemingly counterintuitive ones. For example, in an era of globalization, we need to place a much greater emphasis on developing self-sustaining local economies. And as technology permeates our lives, we need computer scientists and engineers conversant with sociology and psychology and poets who can code. The authors argue persuasively that we have only a decade to make headway on these problems. But if we tackle them now, thoughtfully, imaginatively, creatively, and energetically, in ten years we could be looking at a dawn instead of darkness.

Economic Dependence of Mongolia on Minerals Yoshitaka Hosoi, Tuvshintugs Batdelger, Khashchuluun Chuluundorj, 2022-11-09 This book is a compass for resource rich-developing countries, taking Mongolia as a case study. Policy aspects of the development of the mining sector in developing countries such as Mongolia and its impact on the economy and society are reviewed. The book deals with specific industry policies and challenges identified by policy makers, its characteristics and policy recommendations moving forward with an emphasis on the importance of evidence-based policy making (EBPM). It begins with the country's development strategy and the role of the mining industry, highlighting the fact that major strategic and policy documents still suffer from ambiguity and clear guidance as well as gaps in policy directions. The book also highlights the need for policy makers to improve transparency initiatives. Authors emphasize transparency or lack thereof in mining contracts, taxation, trading, and marketing and provide specific policy recommendations and alternative policy actions. The macroeconomic and social impact of the mining sector and the role of foreign direct investment is also discussed. Particularly, utilizing in-house economic analytical tools, the role and impact of resource revenue management policy in Mongolia is evaluated. Further, the impact of mining projects on the livelihood of local households as well as the importance of obtaining a social license to operate is discussed. This monograph is recommended for readers who want an in-depth comprehensive understanding of the mining sector, EBPM, and key lessons learned in managing natural resources in Mongolia.

Global Trends 2040 National Intelligence Council, 2021-03 The ongoing COVID-19 pandemic marks the most significant, singular global disruption

since World War II, with health, economic, political, and security implications that will ripple for years to come. -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

Historical Dictionary of Mongolia Alan J. K. Sanders,2017-08-25 This fourth edition of Historical Dictionary of Mongolia covers the people and organizations that brought Mongolia from revolution and oppression to independence and democracy, and its current unprecedented level of national wealth and international growth. This is done through a chronology, an introduction, appendixes, and an extensive bibliography. The dictionary section has over 1,200 cross-referenced entries on important personalities, politics, economy, foreign relations, religion, and culture. This book is an excellent resource for students, researchers, and anyone wanting to know more about Mongolia.

Subjective Lives and Economic Transformations in Mongolia Rebecca M. Empson,2020-06-01 Almost 10 years ago the mineral-rich country of Mongolia experienced very rapid economic growth, fuelled by China's need for coal and copper. New subjects, buildings, and businesses flourished, and future dreams were imagined and hoped for. This period of growth is, however, now over. Mongolia is instead facing high levels of public and private debt, conflicts over land and sovereignty, and a changed political climate that threatens its fragile democratic institutions. *Subjective Lives and Economic Transformations in Mongolia* details this complex story through the intimate lives of five women. Building on long-term friendships, which span over 20 years, Rebecca documents their personal journeys in an ever-shifting landscape. She reveals how these women use experiences of living a 'life in the gap' to survive the hard reality between desired outcomes and their actual daily lives. In doing so, she offers a completely different picture from that presented by economists and statisticians of what it is like to live in this fluctuating extractive economy.

Competitiveness and Private Sector Development: Central Asia 2011

Competitiveness Outlook OECD,The World Economic Forum,2011-06-10 This Central Asia Competitiveness Outlook examines the key policies that would increase

competitiveness in Central Asia and reduce dependence on the natural resource sector.

The Report: Mongolia 2014 Oxford Business Group, 2014-05-23 Since the country's transition from communism two decades ago, the Mongolian economy has experienced rapid liberalisation. Sectors including ICT and insurance are expanding quickly and, while the mining sector has been responsible for making Mongolia a rising star in the global economy, there is great potential for further growth in all economic sectors. Politically stable and rich with natural resources, Mongolia has emerged as a bellwether for investor confidence in recent years. The 2013 commercialisation of the Oyu Tolgoi gold and copper mine is helping to diversify Mongolia's mineral exports away from coal, while the government is working to improve the investment environment by adopting the new Investment Law, among other measures. Challenges do exist, however, from the long harsh winters that slow construction to the difficulty of connecting the sparsely populated nation through ICT and transport systems. In response, the government has partnered with the private sector on a number of fronts in order to promote economic diversification and competitiveness.

Decentralization, Local Governance, and Local Economic Development in Mongolia Asian Development Bank, 2021-08-01 This publication presents an empirical assessment of Mongolia's system of decentralized governance and the extent to which it translates into the actual and practical working environment for subnational and local governments. It focuses on the roles of subnational and local governments in providing public services and promoting local economic development.

Introduction to Mongolia Gilad James, PhD, Mongolia is a landlocked country located in East Asia, bordered by Russia to the north and China to the south, east, and west. It has a population of around three million people, with the majority residing in the capital city of Ulaanbaatar. Mongolia is renowned for its vast steppes, rural landscape, and nomadic culture. The country is also rich in natural resources, including copper, gold, coal, and oil. Mongolia is a culturally diverse country, with a rich history that dates back thousands of years. Its early nomadic tribes were ruled by various empires, including the Xiongnu, Turkic Khaganate, and Mongol Empire. The latter, led by Genghis Khan, was one of the largest empires in history, stretching from Eastern Europe to Asia. Mongolia has since undergone significant political and economic changes, with a transition to democracy in the 1990s following decades of Soviet-style socialist governance. Today, Mongolia remains a unique destination for travelers seeking to experience its rugged landscapes and traditional way of life.

Tourism and Opportunities for Economic Development in Asia Ordóñez de Pablos, Patricia, Aung, Zeyar Myo, 2017-01-25 The growing market of tourism in Asian countries has caused significant changes to the economy, transportation, and safety for citizens. With the ubiquity of tourism, there is now an increasing need for resources to assist in the challenges that arise. *Tourism and Opportunities for Economic Development in Asia* is a key resource on the priorities, challenges, and strategies in the globalized economy of the Asian tourism market. Highlighting multidisciplinary studies on cultural tourism, gastronomy, and hospitality management, this publication is an ideal reference source for academicians, researchers, politicians,

policy makers, and information technology directors actively involved in the tourism industry.

Historical Dictionary of Mongolia Alan Sanders,2003-04-09 This edition offers detail on the history of the Mongol Empire.
