Moods of the Ohio Moons Merrill C. Gilfillan, 1991 For almost thirty years, Merrill Gilfillan has written outdoor columns devoted primarily to describing and creating moods about the world of nature. These columns are informed by a rural background and field notes from more than sixty years of outdoor experience. In Gilfillan's words, Observation is more of the mind than of vision; our attitude is the secret of original observation. I choose the subjective approach to outdoor enjoyment. I did this after training in zoology and twenty years of field work as a wildlife biologist....We should learn to seek our own original 'view' of what we observe....The scientific method is necessary to gain facts, but the manner in which one experiences the facts is what will determine their final value to the individual and, perhaps, to society. Moods of the Ohio Moons is the product of this subjective method of observation, balanced with scientific knowledge and intended to encourage readers to explore their own individual appreciation and understanding of nature. Twelve essays, one for each month, relate incidents and events--weather, diagnostic events, vegetation and wildlife, agriculture, trends of land use, and the wild harvest--that contribute to the mood of the time. As Gilfillan demonstrates, each month has its mood established primarily by nature and only secondarily by humans.

Rethinking Education for a Global, Transcultural World Encarna Soriano, 2015-04-01 The global networking promoted by technology, globalization and migration that are occurring at a large scale, requires school systems that develop in the students new types of skills, based on the ability to understand the world and its problems and instill a sense of responsibility and cooperation to enhance the resolution of

the great problems of mankind. Rethinking education is essential in a global, transcultural, changing and communicated world. Throughout the book *Rethinking Education for a Global, Transcultural World* is argued and analyzed how to build relationships between the school and society, and the possibilities of transcending the barriers in different national contexts: Chile, Israel, Mexico, Morocco, Poland, and Spain. The main goal we want to achieve with the contributions made in the book is to know how education systems and schools in different countries respond to the social changes caused by globalization, migration and new communication technologies. The authors are professors of different scientific disciplines and different faiths, cultures and points of view, living the realities described in the chapters and thinking from these realities how to improve and how should be the education in a global, challenging and ever-changing world. We stress the importance of this book and its implications in the education of children and youth and in the preparation of teachers. For this reason, this is a book designed for teachers of primary and secondary schools, parents, principals, supervisors, university teachers who prepare school teachers, university students and those who want to know and think about education in a global and intercultural world and new forms of communication to face learning, whether at local or at world level. The mission of all is continue building education, and to facilitate this work in this book are presented contributions and recommendations of professionals around the world that will allow the reader to know, analyze, understand and appreciate the importance of education to prepare students to function with open and critical thinking in a global world. The chapters do not offer a panacea, but offer many ideas on how, through education, prepare citizens for a global and transcultural society.

The Teacher Toolkit Guide to Memory Ross Morrison McGill, 2022-06-09 'This book is Masterful, Evidence-based, Memorable, Operational, Readable, and the best book for You on memory.' Professor John Hattie Teacher Toolkit Guides transform the theory of education into practical ideas for your classroom. From Ross Morrison McGill, bestselling author of Mark. Plan. Teach. 2.0, this book unpicks the research behind how learners retain and recall information. It provides evidence-based strategies for improving memory in the classroom. Cleverly designed with infographics, charts and diagrams, The Teacher Toolkit Guide to Memory provides clear, visual explanations of how memory works, including short-term and long-term memory, working memory, semantic memory and episodic memory. Ross presents a wealth of original ideas for incorporating this theory into day-to-day classroom practice, with proven methods for aiding knowledge retention and testing recall, to boost learning, support revision and motivate pupils. Breaking down the key theories of cognitive load, cognitive apprenticeship and brain plasticity in an easy-to-digest format, this is the perfect guide for teachers looking to understand how to improve memory and how they can maximise their impact in the classroom. Each book in the Teacher Toolkit Guides series explores a key principle of teaching and learning, and offers research-based techniques to transform classroom practice. Every book includes a bespoke version of Ross's renowned Five Minute Lesson Plan, as well as ready-to-use templates and worked examples. Supported by infographics, charts and diagrams, these guides are a must-have for any teacher, in any school, and at any level.

Alcohol, Tobacco, and Firearms Tim McLoughlin,2022-03-01 An enthralling collection of short fiction and nonfiction that draw upon McLoughlin's three-decade career in the criminal justice system. A wistful Irish sensibility and memories from a 30-year career as a peace officer in the New York City criminal justice system haunt this solid collection...With spare prose, McLoughlin creates memorable vignettes of urban life. Fans of Kent Anderson's *Liquor, Guns & Ammo* will want to check this out. --Publishers Weekly *Alcohol, Tobacco, and Firearms* couldn't be more New York. Tim McLoughlin drops a ton of big-city knowledge and wisdom, rich in lived-in detail, with humor that's hard as the sidewalk. --John Strausbaugh, author of *City of Sedition* In *Alcohol, Tobacco, and Firearms*, Tim McLoughlin draws upon his three-decade career in the criminal justice system with his characteristic wit and his fascination with misfits and malfeasance. A lifetime immersed in New York City feeds short stories that evoke a landscape of characters rife with personal arrogance and misjudgment; and nonfiction essays about toeing the line when the line keeps disappearing. An opioid-addicted catsitter electronically eavesdrops on his neighbors only to hear devastating truths. A degenerate gambler stakes his life on a long shot because he sees three lucky numbers on the license plate of a passing car. In the nonfiction essays, we learn that the system plays a role in supporting vice, as long as it gets a cut. Altar boys compete to work weddings and funerals for tips in the shadow of predatory priests. Cops become robbers, and a mob boss just might be a civil rights icon. McLoughlin shines a light on worlds that few have access to. A recurring theme in his urban, often New

York—centric work is chronic displacement, people standing still in a city that is always changing. These are McLoughlin's ghosts, these casualties of progress, and he holds them dear and celebrates them.

The Memory and Processing Guide for Neurodiverse Learners Alison Patrick, 2020-06-18 Armed with the wealth of understanding and strategies in this guide, students will discover how they can learn best, to make studying and revision more effective (and less stressful). Packed with simple, tried and tested strategies and workarounds, this study guide for supporting kids and teens who learn differently (such as those with ADHD, dyslexia, dyspraxia or ASD) explains what memory and processing issues are, and how to work around them. Written by a tutor and specialist with years of experience of working with students with learning differences, this book enables the student to understand the best ways they learn and the reasons behind this. Unpacking processing speed, sensory processing, metacognition, and executive functioning, including working memory, this uniquely relatable and empowering study guide will provide students with the self-understanding they need to manage exams and academic tasks at school with confidence and peace of mind.

Bipolar, Not So Much: Understanding Your Mood Swings and Depression Chris Aiken, James Phelps, 2017-01-17 Approaching depression as a complex disorder with many different facets rather than all-or-nothing. Depression confuses the mind, strips away hope, and causes people to blame themselves for an illness they never asked for. This book presents a revolutionary new understanding of the concept of depression and offers readers skills and strategies to manage it. No longer is this a one-size-fits-all diagnosis, and antidepressants are no longer the one-size-fits-all treatment. Mood disorders are now seen to form a

spectrum of problems, from common depression on one end to full bipolar disorder on the other. In between these extremes are multitudes of people who are on the middle of the mood spectrum, and this book is for them. The first part of the book helps readers answer the question, “Where am I on the mood spectrum?” By laying the foundation for understanding this spectrum, Aiken and Phelps highlight the key distinctions that define unipolarity, bipolarity, hypomania, mania, and depression. Readers will be able to discern which definition best fits their experience, and use this understanding to learn which treatment methods will work best. The authors also empower readers to look beyond antidepressants. They walk readers through new medications for the mood spectrum, and offer a guide to non-medication treatments that anyone can use on their own, from diet and lifestyle changes to natural supplements. The book also discusses other innovative technologies that can aid in recovery, including dawn simulators, mood apps, and blue-light filters. This thoughtful and beneficial book will offer readers skills and strategies, as well as hope, in the face of debilitating mental challenges.

Leading with empathy Lilli Höch-Corona, 2020-12-15 Talking about feelings is on everyone's lips. This should be decisive for the economy of the future, promote corporate culture, enable New Work and bind employees. - But how? How can you give feelings a place without them taking up too much space? How can you work with groups in such a way that there is a clear structure and diversity is taken into account as well? Conduct clarification discussions so that lasting results are achieved? This book presents twelve methods for working with the Gefühlsmonster Cards. From communication with groups and teams to self-management to a tool for clarification discussions and performance reviews, each with examples and clearly

structured instructions for use. Lilli Höch-Corona has been working as a mediator, coach and trainer for more than 20 years. Her passion lies in reaching an understanding. For this purpose she developed the Gefühlsmonster Cards in 1996. Since then, a variety of methods have been developed around this instrument, which make talking about feelings both easier and more effective. The Gefühlsmonster Cards are available in stores or as an online application on the author's homepage.

International Perspectives on Reminiscence, Life Review and Life Story Work Faith

Gibson, 2018-11-21 Examining recent research and practice on reminiscence, life review and life story work, this book offers critical accounts of the rapidly growing and extensive global literature, and highlights the continuing relevance and effectiveness of these therapeutic methods. The book includes examples of international practical projects, involving people of all ages, life circumstances, and levels of physical and cognitive functioning. Contributions from contemporary practitioners and researchers give a nuanced appraisal of the methods of engagement and creativity arising from the purposeful recall of our personal pasts. Chapters include reviews of technology, ethical issues including end of life care, working with people with mental health conditions, and working with people with dementia.

Disruptive Mood Argyris Stringaris, Eric Taylor, 2015-03-05 A practical guide to understanding and treating children and adolescents prone to extreme levels of angry outbursts, *Disruptive Mood: Irritability in Children and Adolescents* is based on the very latest research and theory. Providing both a clinical and

scientific perspective on irritability in children, this book is a timely look at recent developments in the field. Abnormal states of anger are a common reason for referral to child health services, and cause concern in clinics, schools, and families. Misdiagnosis and treatment can stem from a lack of understanding of the mechanisms involved in high levels of anger in children, and *Disruptive Mood: Irritability in Children and Adolescents* provides clear guidance on the development of abnormal states of anger, their consequences for later development, and how to assess and make differential diagnoses between them. A useful resource for clinical practice, this book is concise and accessible, and offers tools for evaluating treatments. *Disruptive Mood: Irritability in Children and Adolescents* is designed for practitioners involved in child and adolescent mental health and education and researchers who need an introduction to this complex field.

How To Diagnose and Treat Mood Disorders Steven T. Griggs, Ph.D., 2018-07-01 I've been a practicing psychologist in an outpatient setting for over thirty-three years. I run into the same conditions or issues almost every day (addictions, anxiety, ADHD/learning disabilities, assertiveness, children's and teen behaviors, forgiveness, procrastination, guilt, relationships, divorce, self-esteem AND... mood disorders). This webpage contains information about my last ebook-- mood disorders. If you're reading this, either you or someone you know may have one. This ebook will tell you exactly how to figure this out and what to do. Here's what's in it: Lots of vignettes--snippets of what people describe as mood fits, or mood episodes. These are little stories, primarily about depression or Bipolar disorder--the two BIG moods that are also the most common. Statistics--how many people have mood disorders? Which ones? Definitions: Ever wonder what's the difference between emotion, feeling, mood and affect? What's normal? I have a scale, my way

of thinking about moods based on over three decades of working with clients in an outpatient setting. There are symptom lists for all of them, and from where you are on the scale, the diagnoses. Easy. Symptoms of anxiety. This is sometimes thought of as a mood, sometimes as a symptom accompanying moods, depending... What moods are not, some examples of overlapping diagnostic categories and how they differ from primary mood disorders. I drill down to the specifics of each mood problem. There are eight kinds of depression and three kinds of Bipolar, plus some sub-bipolar types. Ever thought of what causes mood problems? There are physical and psychological causes. I cover them in common language. What about treatment? I go through exactly what I do in the office. I look at genetics, long-and short term psychological history, substance use (including alcohol), diet, sleep, medical conditions, medication side-effects, social supports. I tell you how to think about each. Therapy? The best models, like CBT and DBT. Unique to this ebook is the next section on Related Findings. There are 40 studies that give you more ways to think about and to handle moods--many of them are surprising. All of them are helpful. The next section is on Herbs. There are many that do the same thing as medication, only with less side effects. They're also cheaper, more available and you don't have to go through your doctor, insurance company or pharmacy. Herbs work on moods and anxiety. Next is a section on supplements. Same idea--lots of things to try that you can regulate. Science has validated many of these, just like herbs. Of course, there's also a section on medication. Herbs and supplements don't always work, so here's a list of the meds that are commonly used, for which moods, why and how they work and their potential side effects. But wait...there's more. Recent research has uncovered many alternative treatments, especially for depression. I describe seven. For those

researchers among you, there's a lengthy Bibliography so you can look up my original sources. Lastly, there's a section for Quotes, which I really like. This provides a more human and poetic element, a personal touch when thinking about moods. Most of the pop-psychology books are too long. I've boiled down the concepts in these books into clear, manageable steps. I've made this as easy to understand as is humanly possible, combining what I've read with what I've learned from clients. Like my other ebooks, this one has no fat. Think of it as a Cliffs Notes publication. It's sort of a quick read (about an hour or two). I have to explain a few new terms, because there are new ideas and the terms you probably already know are put together in new ways. The theory I espouse is different from standard behavior change books and is very simple to understand. That's the point of an ebook.

Manic Minds Lisa M. Hermsen, 2011-11-22 From its first depictions in ancient medical literature to contemporary depictions in brain imaging, mania has been largely associated with its Greek roots, to rage. Prior to the nineteenth century, mania was used interchangeably with madness. Although its meanings shifted over time, the word remained layered with the type of madness first-century writers described: rage, fury, frenzy. Even now, the mental illness we know as bipolar disorder describes conditions of extreme irritability, inflated grandiosity, and excessive impulsivity. Spanning several centuries, *Manic Minds* traces the multiple ways in which the word mania has been used by popular, medical, and academic writers. It reveals why the rhetorical history of the word is key to appreciating descriptions and meanings of the manic episode. Lisa M. Hermsen examines the way medical professionals analyzed the manic condition during the nineteenth and twentieth centuries and offers the first in-depth analysis of

contemporary manic autobiographies: bipolar figures who have written from within the illness itself.

Model-Based Systems Engineering A. Wayne Wymore, 1993-04-05 Model-Based Systems Engineering explains the fundamental theories behind model-based systems and the considerations involved in applying theory to the design of real systems. The book begins by presenting terms used in systems engineering and introducing the discrete system and its components. The remainder of the text explains topics such as the mathematical theory of system coupling, the homomorphic relationship between systems, the concept of system mode, the mathematical structure of T3SD system requirements, and the implications of that structure for T3SD system design. Appendices include a short bibliography, detailed definitions of all examples discussed in the text, a list of all notations used, and an index. Model-Based Systems Engineering is an excellent text for engineering students, and an invaluable reference for engineers and scientists.

Emerging Technologies in Healthcare Suzanne Moss Richins, 2015-05-14 Recent changes in healthcare delivery as mandated by the Patient Protection and Affordable Care Act are forcing providers to focus on technology as a way to improve the health of the population, while engaging patients and encouraging them to take accountability for maintaining their own health. Swipe, Scan, Shop Kate Schaefer, 2021-03-11 Successful fashion merchandising, branding and communication start with satisfyingly sensory and interactive shopping experiences. With Kate Schaefer's beautifully illustrated and practical book, learn how retailers create these experiences to connect with shoppers, enhance the retail experience, and achieve brand loyalty. With company highlights from brands

such as Amazon Go, FIT:MATCH and Sephora, Swipe, Scan, Shop shows how fashion retailers are embracing the omnichannel retail experience, by using virtual and augmented reality, beacon technologies and facial recognition, among others. As shoppers become more dependent on digital devices as part of their shopping experience, visual merchandisers are adapting by incorporating mobile tech to tell a story, alert shoppers of product locations and inventory levels, and allow for the customization of products and sharing with friends. With a companion website that includes resources and links to further information and videos discussed in the book, this practical guide shows how to inform, entice, and engage customers by incorporating social technology throughout the shopping experience.

Mood and Human Performance Andrew Michael Lane, 2007 Situations that are perceived to be personally important typically evoke intense mood states and emotions; individuals will try to control mood states and emotions, and mood and emotions influence our thoughts and behaviours. Providing the sound knowledge base is a driving factor behind a great deal of the ensuing research and forms the content of many of the chapters of this book. The book covers many aspects of mood in performance settings. Chapters focus on the nature of mood, the validity of mood measures and applied research. Theoretical issues on the nature of mood and a conceptual model of mood-performance relationships in sport is reviewed. Chapters include research on relationships between mood and performance, motivation, coping strategies, personality, eating attitudes, humour, and emotional intelligence. Mood responses to intense exercise, extreme environments, aqua-massage, and interventions to enhance mood are also covered. Each chapter provides recommendations for future research.

Theo's Mood Maryann Cocca-Leffler, 2013-09-01 The Best Children's Books of the Year 2014, Bank Street College On Mood Monday, students describe their moods after the weekend. But Theo doesn't know what to say because he has a new baby sister and is feeling so many emotions all at once. It's Mood Monday and Miss Cady's class is sharing how they feel after the weekend. But Theo doesn't know whether he's in a good mood or a bad mood. He has a new baby sister, and he isn't just happy like Eric who got a new bike or sad like April who lost her dog. As Theo's classmates discuss all their feelings, he realizes he's not in a good mood or a bad mood—he's both those things!
