Moodies Moodle Doodle,2019-11-17 While it's nice to track your mood each day to gain self-awareness, it's even nicer if you can take control and manipulate your moods. In this 190 page mood tracking journal, you will track your daily moods in a most simplified fashion, but you won't stop at tracking. You're going to take a deep dive inside of you to find out what has triggered your bad mood. Then you're going to try to find the reasons and emotions behind your trigger. This journal will prompt you to give reasons for your feelings and then to challenge your feelings with logic. Are you feeling anxious? Worried? Worthless? Shamed? Why? Once you become self-aware of your negative thought process, you're going to embark on a positive thought process by staying mindful of the reality, of the truth of the situation. And then, to drag yourself completely out of your negativity, from your negative emotions, you will commit to taking positive action. So, is this a mood tracker journal? Yes. But it's also a mood changing, life changing sort of journal!

You Are Not My Big Brother Renee Pittman,2012-10-07 Reviewed as an excellent book for understanding the advanced technology applied to reportedly 300,000 or more victims of human experimentation within the USA and millions globally, Targeted for every reason under the Sun.In Book Two of the Mind Control Technology book series, the author details personal experiences surrounding abuse and victimization by military and law enforcement, et. al., using real-time surveillance, drones, and highly advanced, patented, influence technology on her covertly hoping to substantiate allegations. When the manipulative effort failed, resulting in this explosive tell-all book, the physical and psychological effort escalated as attempts to prevent publication and the author's living Hell around the clock by non-ionizing radiation beamed both inside and outside her home and 24/7 tracking around the clock.It appears that those involved in covert technology testing and spearheading The Program was attempting to make good on the promise, by repeated threats, that if she did not stop publication she would suffer the consequences. And, the consequences could be deployed by approval from one of the approximately 120 state-of-the-art fusion centers across our country today, connected to military bases nationwide, unseen or detectable to the human eye, or as close as official set-ups at neighboring locations. Little known today, various advanced, highly perfected technologies are being used globally such as patented Synthetic Telepathy also known as the Hearing Voices effect, mind-reading, consciousness-altering, dream

manipulation, etc., along with the capability of subliminal message carrying through communication towers, portable systems, and devices, and satellites and drones. The technological arsenal of today consists of technology that can manipulate thoughts, create visual holograms, or even stimulate a person sexually, electromagnetically, a new form of covert, legalized, terrorism, miles away through a supercomputer terminal. It appears that Big Brother's 1984 technocratic agenda has come of age by handheld, portable, land, sea, and space-based technologies and the weapon system first publicized during the Reagan era of the '80s as the Strategic Defense Initiative then fondly called Star Wars as an exemplified platform using a wide array of advanced weapon concepts, including lasers, particle beams. Pittman's truthful revelations and honesty placed her in a unique position, which so many fear because of ongoing unawareness of covert set-ups prior to the targeting. By revealing tactics that start human experimentation, then pointing the finger you can become expendable.

The Cyborg Experiments Joanna Zylińska, 2002-08-13 The Cyborg Experiments analyzes the challenges posed to corporeality by technology. Taking as their starting point the work of the highly influential performance artists Orlan and Stelarc, the essays in this timely and important collection raise a number of questions in relation to new conceptions of embodiment, identity and otherness in the age of new technologies: Has the body become obsolete? Does transgender challenge traditional ideas of agency? Have we always been cyborgs? In addition to highlighting the playful character of digital aesthetics, the contributors investigate ethical issues concerning the ownership of our bodies and the experiments we perform on them. In this way the book explores how humanism, and ideas of the human, have been placed under increasing scrutiny as a result of new developments in science, media and communications. Contributors: John Appleby, Rachel Armstrong, Fred Botting, Julie Clarke, Gary Hall, Chris Hables Gray, Meredith Jones, Orlan, Mark Poster, Jay Prosser, E. A. Scheer, Zdzisław Słota, Stelarc, Scott Wilson, Joanna Zylińska>
