The contributions include pedagogical, philosophical, and empirical approaches to feelings, emotions, and moods, highlighting their fundamental importance and productivity for learning, Bildung, and education in different pedagogical institutions and fields.

Psychology of Moods Anita V. Clark,2005 A mood is defined as the prevailing psychological state (habitual or relatively temporary). It is further defined as a feeling, state or prolonged emotion that influences the whole of one's psychic life. It can relate to passion or feeling; humour; as a melancholy mood or a suppliant mood. Mood can and does affect perceived health, personal confidence, one's perceptions of the world around us and our actions based on those perceptions. Moods can and do change often although mood swings of a sharp nature may be a symptom of underlying disease. Moods may signify happiness, anger, tension, or anxiety. Chronic periods of any mood state may be an indicator of a disorder as well. This new book gathers important research from throughout the world in this rapidly changing field.

Stage Lighting Second Edition Richard E. Dunham,2018-10-16 Stage Lighting: The Fundamentals is written specifically for introductory stage lighting courses. The book begins with an examination of the nature of light, perception, and color, then leads into a conversation of stage lighting equipment and technicians. Lamps, luminaries, controls/dimming, and electricity form the basis of these chapters. The book also provides a detailed explanation and overview of the lighting design process for the theatre and several other traditional forms of entertainment. Finally, the book explores a variety of additional areas where lighting designers can find related future employment, such as concert and corporate lighting, themed design, architectural and landscape lighting, and computer animation. New for this edition: enlarged full-color illustrations, photographs, light plots and examples of lighting design; updated information on LED lighting and equipment; expanded discussion of the practical use of color as a designer; expanded discussion of psychological/perceptual effects of color; new discussion of color mixing through light sources that make use of additive mixing; expanded discussion of industry professions; expanded discussion and illustrations relating to photometrics; expanded discussion and examples of control protocols and new equipment; and updated designer profiles along with the addition of still more designer profiles.

Stage Lighting Richard E Dunham,2018-12-14 Stage Lighting: Design Applications and More builds upon the information introduced in Stage Lighting: The Fundamentals to provide an in-depth reference to a number of specialty areas of lighting design, from traditional applications such as drama, dance, and designing for different venues, to more advanced applications such as concert, corporate, film and video, virtual, and other forms of entertainment lighting. Each chapter gives the essential background, design practices, and equipment details for each specialization, so readers can make informed decisions and ask informed questions when encountering each field. The book provides insight on the latest technology and includes profiles of prolific designers, such as James Moody, Jeff Ravitz, Alan Adelman, and Paul Gregory. Stage Lighting: Design Applications and More is intended to help lighting designers translate their theatrical skills to other areas of lighting design, and provides guidance on how to take those initial steps into new ventures in their lighting careers.

United Spectrum Levi Morris,2011-02-22 To understand the unbalanced planet, we must examine nature and humanity both individually and as a whole. In United Spectrum, author Levi Morris explores the unity of nature and its relationship to human behaviors in six parts. Morris exposes our misunderstanding of reality by clarifying fundamental elements of experience, such as consciousness, thought, ego, fear, doubt, belief, and biological needs and behaviors. He examines the effects of humanity's disease, including the continuation and escalation of war, a growth economy resting on fossil fuels, overpopulation, and the destruction of the biosphere. He proposes that aspects of life considered to be humdrum can actually be viewed with a sense of awe. Additionally, his work combines fractal and Euclidean geometry with concepts like nothingness, infinity, and symmetry to show how nature is expressed. It explains the physics of electromagnetism, gravity, spacetime, and quantum mechanics as the singular beauty of nature. It also explores teaching, its limitations, and describes the relationship between life, death, duality, and unity. Capturing the essence of natural and human behaviors, United Spectrum investigates the universes unity and beauty, the reasons its misunderstood, and how this limited view affects the world.

Aesthetic and Philosophical Reflections on Mood Birgit Breidenbach,2020-04-19 This study explores the concept of Stimmung in literary and philosophical texts of the modern age. Signifying both 'mood' and 'attunement', Stimmung speaks to the categories of affective experience and aesthetic design alike. The study locates itself in the nexus between discourses on modernity, existentialism and aesthetics and uncovers the pivotal role of Stimmung in 19th- and 20th-century European narrative fiction and continental philosophy. The study first explores the philosophical and aesthetic origins and implications of Stimmung to, then, discuss its role in the narrative fiction of three key authors of modern literature: Fyodor Dostoevsky, Samuel Beckett and Thomas Bernhard. These readings demonstrate a significant shift towards an aesthetic of affective intensity and immediacy, in which the experience of the reading process takes centre stage as each author develops an aesthetic philosophy of Stimmung in their own right. Through its focus on the concept of Stimmung, the study thus unearths a fundamental link between existentialist concerns and narrative practice in modern literature.

The Intellectuals and the Flag Todd Gitlin,2007-05-15 The tragedy of the left is that, having achieved an unprecedented victory in helping stop an appalling war, it then proceeded to commit suicide. So writes Todd Gitlin about the aftermath of the Vietnam War in this collection of writings that calls upon intellectuals on the left to once again engage American public life and resist the trappings of knee-jerk negativism, intellectual

fads, and political orthodoxy. Gitlin argues for a renewed sense of patriotism based on the ideals of sacrifice, tough-minded criticism, and a willingness to look anew at the global role of the United States in the aftermath of 9/11. Merely criticizing and resisting the Bush administration will not do—the left must also imagine and propose an America reformed. Where then can the left turn? Gitlin celebrates the work of three prominent postwar intellectuals: David Riesman, C. Wright Mills, and Irving Howe. Their ambitious, assertive, and clearly written works serve as models for an intellectual engagement that forcefully addresses social issues and remains affirmative and comprehensive. Sharing many of the qualities of these thinkers' works, Todd Gitlin's blunt, frank analysis of the current state of the left and his willingness to challenge orthodoxies pave the way for a revival in leftist thought and a new liberal patriotism.

Emotion and Consciousness Lisa Feldman Barrett,Paula M. Niedenthal,Piotr Winkielman,2007-01-10 Presenting state-of-the-art work on the conscious and unconscious processes involved in emotion, this integrative volume brings together leading psychologists, neuroscientists, and philosophers. Carefully organized, tightly edited chapters address such compelling questions as how bodily responses contribute to conscious experience, whether unconscious emotion exists, how affect is transmitted from one person to another, and how emotional responses are produced in the brain. Bringing a new level of coherence to lines of inquiry that often remain disparate, the book identifies key, cross-cutting ideas and themes and sets forth a cogent agenda for future research.

Life Breaks In Mary Cappello,Rosamond Purcell,2016-10-21 Some books start at point A, take you by the hand, and carefully walk you to point B, and on and on. This is not one of those books. This book is about mood, and how it works in and with us as complicated, imperfectly self-knowing beings existing in a world that impinges and infringes on us, but also regularly suffuses us with beauty and joy and wonder. You don't write that book as a linear progression—you write it as a living, breathing, richly associative, and, crucially, active, investigation. Or at least you do if you're as smart and inventive as Mary Cappello. What is a mood? How do we think about and understand and describe moods and their endless shadings? What do they do to and for us, and how can we actively generate or alter them? These are all questions Cappello takes up as she explores mood in all its manifestations: we travel with her from the childhood tables of “arts and crafts” to mood rooms and reading rooms, forgotten natural history museums and 3-D View-Master fairytale tableaux; from the shifting palette of clouds and weather to the music that defines us and the voices that carry us. The result is a book as brilliantly unclassifiable as mood itself, blue and green and bright and beautiful, funny and sympathetic, as powerfully investigative as it is richly contemplative. “I'm one of those people who mistrusts a really good mood,” Cappello writes early on. If that made you nod in recognition, well, maybe you're one of Mary Cappello's people; you owe it to yourself to crack Life Breaks In and see for sure.
