Steve Lehto, Jay Leno

Mopar Muscle Robert Genat, Now in paperback, this book covers Chrysler's incredible series of muscle cars. In 1955 Chrysler introduced the first of its famed 300 letter series cars. The company designed a stylish, sporty car, stuffed in one of its potent Hemi engines, and gave birth to the American muscle car. The C-300's combination of style and performance put the Mopar brand ahead of its competitors in the postwar performance race. When the Detroit performance wars began in earnest during the 1960s, Chrysler was well positioned to build the most outrageous, bodacious cars of an outrageous, bodacious era, cars like the famed Charger, Hemi Cuda, Road Runner, Superbird, and Challenger T/A. These cars dominated the dragstrips as well as the NASCAR ovals, and with color combinations guaranteed to burn out the corneas of your eyes if you stared at them directly, they ruled the streets of America; they ruled not just the streets, but the drive ins and parking lots. Nothing was cooler than Mopar muscle. Over the years these legendary Mopar muscle cars were the fastest, baddest assed, most outrageous machines to rip up American pavement. This lavishly produced book is definitely a feast for all fans of this line of cars: the photography (by David Newhardt) is absolutely stunning. Not only are the pictures big, and of the highest quality, but the thought that has gone into their composition is plain for all to see. It could be argued that given the striking nature of these cars, and the wonderful backdrops, it would be hard to go wrong, but Newhardt went the extra mile here, and it shows. The story is also very comprehensive, listing all of the cars from the line, and taking time to tell the story in a well-researched, yet caring way. It is obvious that Robert Genat knows the subject well and loves it even more. . . . This book is a must-have for all lovers of American muscle, and thanks to the sheer depth of its coverage and drop-dead-gorgeous photography, the asking price of £34.99 is something of a bargain. - Classic Car Weekly (UK)

Dodge Daytona and Plymouth Superbird Steve Lehto, 2016-01-15 In the fiercely competitive world of NASCAR, every manufacturer was looking for a competitive edge. Ford and Chrysler turned their attention to the aerodynamics of their race cars, resulting in a brief era affectionately called the Aero Wars. During the height of this competition, Chrysler and Ford produced, among

other things, cars with radically altered grilles and tail sections. Mandated by series to produce production versions, these exotic beasts became some of the most costly, creative, and collectible machines ever assembled in Detroit, whether in race trim or in stock street trim. Author Steve Lehto gives a thorough and detailed account of the history of this battle that culminated with the final wars between the Ford Talladega/Mercury Cyclone and the Dodge Daytona/Plymouth Superbird. The story of Richard Petty's defection from Plymouth, the mighty Hemi, and the creation of the street version of these cars all come to light in this all-encompassing tale of Chrysler climbing the ladder to NASCAR supremacy. Dodge Daytona & Plymouth Superbird: Design, Development, Production & Competition delivers a blow-by-blow account of the biggest races between FoMoCo and Chrysler, along with telling the rich stories of the development of these cars. If you are a fan of NASCAR, or just love outrageous muscle cars, this richly detailed and well-illustrated account of a fascinating era of performance will be a valued addition to your library.

Big-Block Mopar Performance Chuck Senatore, 1999-08-01 Hundreds of thousands of racing enthusiasts rely on this essential guide for building a race-winning, high performance big-block Mopar. Includes detailed sections on engine block preparation, blueprinting and assembly.

The Complete Book of Dodge and Plymouth Muscle Mike Mueller,

How to Build Max-Performance Mopar Big Blocks Andrew Finkbeiner, 2009 Naturally aspirated Mopar Wedge big-blocks are quite capable of producing between 600 to 900 horsepower. This book covers how to build Mopar's 383-, 400-, 413-ci, 440-ci engines to these power levels. Discussed is how to select a stock or aftermarket block for the desired performance level. The reciprocating assembly is examined in detail, so you select the right design and material for durability and performance requirements. Cylinder heads and valve train configurations are crucial for generating maximum horsepower and torque and this volume provides special treatment in this area. Camshafts and lifters are compared and contrasted using hydraulic flat tappet, hydraulic roller and solid flat tappet cams. Also, detailed engine builds at 600, 700, 800, and 900 horsepower levels provide insight and reveal what can be done with real-world component packages.

Mopar Muscle Cars, 1964-1967 R. M. Clarke, 1984-10-01

Mopar Muscle Robert Genat, 2004-10-05 These Limited Edition Leatherbound are signed by the author and hand numbered. A rare collectible for the true enthusiast! In 1955, Chrysler introduced the first of its famed 300 letter series cars. Into this stylish car they stuffed a dual-quad equipped Hemi engine rated at 300 horsepower-giving birth to the American muscle car. The 1955 C-300 created the performance wave that manufacturers would attempt to ride throughout the 1950s. When the Detroit performance wars began in earnest during the 1960s, Chrysler was ready with Max Wedge and Hemi cars that dominated the drag strips and NASCAR high banks. Throughout the 1960s, Chrysler gave its customers Road Runners, 'Cudas, R/Ts, and Charger nameplates backed by legendary Hemi and Six Pack engines. Adding to the car's muscular image were vibrant colors, functional hood scoops, and bold stripes. In the late 1960s and early 1970s, these cars attracted crowds at drive-ins and embarrassed the competition on the streets. Mopars were the baddest cars on the boulevard and have become enduring icons of the muscle car era. In the 1990s, Chrysler rekindled its muscle car fire by producing the red hot Viper. Then they stoked that fire with the sizzling Neon SRT-4 and Viper powered Ram SRT-10. After introducing the exciting new Crossfire sports car, Chrysler created an SRT-6 performance version. Chrysler then introduced the modern American muscle car with the release of its new Hemi engine packaged in the stunning 2005 Chrysler 300C and Dodge Magnum RT. For 50 years Mopar has been synonymous with performance and style. Mopar Muscle is a gorgeously illustrated tribute to these cars. It is studded with color photographs of these amazing machines and their evolution from two-and-one-half-ton

behemoths into nimble, high-performance sport compacts. Full of rich detail and stories of the personalities behind the automobiles, Mopar Muscle is a must-have for all muscle car fans. About the Author Robert Genat is an award winning author and photographer who has written over two-dozen books for Motorbooks International. A self-proclaimed gearhead, Robert has restored several muscle cars and currently drives a chopped deuce coupe on a daily basis. He and his wife, Robin, own and operate Zone Five Photo in Encinitas, California.

Challenger And 'Cuda Robert Genat, 2005 Chrysler entered the pony-car market with the capable but unlovely Barracuda in the early 1960s. The car was refined over the years, becoming a true muscle car, and a rather handsome one at that, but it wasn't until the advent of the E-body pony cars from 1970-1974-Barracudas, the Dodge Challenger, and Plymouth 'Cuda-that Chrysler became a true player in the pony-car market. This book tells the story of Chrysler's pony car series, from the advent of the original Barracuda in 1964 to the final days of the smog-motored Challengers and 'Cudas of the mid-1970s, focusing on the series' heyday in the early 1970s.

Chrysler's Motown Missile: Mopar's Secret Engineering Program in the Dawn of Pro Stock Geoff Stunkard, 2020-04-15 Relive Mopar's skunkworks racing team and its rise to dominance in this fascinating history! The drama of 1970s Chrysler Pro Stock drag racing unfolds in this new book, which focuses on the racing and technological evolution of the legendary Motown Missile and Mopar Missile racing programs from 1970 to 1977. Unequaled by any other drag racing development program, this was a huge undertaking in term of time, money, and effort. The 1970s saw great change in Detroit and in auto racing, with Pro Stock being a huge draw for fans. Chrysler racing historian and author Geoff Stunkard presents a chronological recollection, drawing from many interviews and summaries of the actual technical efforts that the factory accomplished and including both rare, unpublished technical and personal images from the team members and some of the most dramatic images taken by the sport's best photographers. From the earliest days of owner/engine builder Ted Spehar, factory engineer Tom Hoover, and driver Don Carlton, the narrative is a colorful look at the team's inner workings, programs, victories, and even defeats. Set against a backdrop of characters like Bill "Grumpy" Jenkins, "Dandy Dick" Landy, and "Dyno" Don Nicholson, Carlton's driving prowess had few equals. Indeed, called by one period scribe as a "cyborg," the likeable pilot would pay the ultimate price as a drag racing driver. From the Challengers and 'Cuda to the Demons and Colts, the book showcases the cars that made Chrysler so much a part of this racing era, as well as Ted Spehar's never-before-revealed information on the 1970s Pro Stock engine program.

Maximum Performance Jim Schild, 2017-10-10 Since the early days of racing, Chrysler, Dodge, and Plymouth have dominated drag strips and race tracks. During 1955 alone, Chrysler 300s won 37 major stock car races and clinched both the NASCAR and AAA stock car championships. Although the impressive engine options of 1950s consistently out-performed the competition, they were

a mere opening act for the extremes of performance that would be unleashed throughout the 1960s--the golden era of drag racing and factory super-performance cars. **Maximum Performance: Super Stock Drag Racing 1962-1969** details Chrysler's amazing dominance in this era. Its drivers were among drag racing's first paid professional racers, and this book covers the complete story of Mopar drag racing accompanied by historical imagery as well as contemporary photos. This is the real story behind Super Stock and Factory Experimental drag racing as told the people who lived it!--Publisher's description.

Chrysler's Turbine Car Steve Lehto, Jay Leno, 2010-10-01 Offering a behind-the-scenes look into the world of automotive research and development in the 1960s, this engaging narrative traces the birth of Chrysler's alternative "jet" car and reveals the story behind its sudden and mysterious demise. Relying on extensive research and firsthand accounts from surviving members of the turbine car program—including the metallurgist who created the exotic metals for the engine and the test driver who drove it at Chrysler's proving grounds—this chronicle documents the bold development of an automobile with a jet turbine engine. In addition to running well on virtually any flammable liquid—including kerosene, vodka, heating oil, and Chanel N°5 perfume—the pioneering engines had one fifth the number of moving parts and required less maintenance than conventional engines. Despite the fleet's amazing performance over millions of miles by test drivers, Chrysler pulled the plug on the project and crushed almost all of the cars. The reasons behind the surprising end to the jet car fleet are finally explained here.
