Fictions of Fact and Value Michael LeMahieu,2013-10-02

Fictions of Fact and Value argues that the philosophy of logical positivism, considered the antithesis of literary postmodernism, exerts a determining influence on the development of American fiction in the three decades following 1945, in what amounts to a constitutive encounter between literature and philosophy at mid-century: after the end of modernism, as it was traditionally conceived, but prior to the rise of postmodernism, as it came to be known. Two particular postwar literary preoccupations derive from logical positivist philosophy: the fact/value problem and the correlative distinction between sense and nonsense. Even as postwar writers responded to logical positivism as a threat to the imagination, their works often manifest its influence, specifically with regard to emotive or meaningless terms. Far from a straightforward history of ideas, Fictions of Fact and Value charts a genealogy that is often erased in the very texts where it registers and disowned by the very authors that it includes. LeMahieu complicates a predominant narrative of intellectual history in which a liberating postmodernism triumphs over a reactionary positivism by historicizing the literary response to positivism in works by John Barth, Saul Bellow, Don DeLillo, Iris Murdoch, Flannery O'Connor, Thomas Pynchon, and Ludwig Wittgenstein. As LeMahieu compelling demonstrates, the centrality of the fact/value problem to both positivism and postmodernism demands a rethinking of postwar literary history. A trenchantly argued study that unearths an important part of postwar literary history, Fictions of Fact and Value will interest anyone concerned with postmodernism, modernist studies, analytic philosophy, or the history of ideas.

Business Ethics from the 19th Century to Today

David George Surdam, 2020-01-29 This book combines elements of economic and business history to study

business ethics from the nineteenth century to today. It concentrates on American and British business history, delving into issues such as slavery, industrialization, firm behavior and monopolies, and Ponzi schemes. This book draws on the work of economists and historians to highlight the importance of changing technologies, religious beliefs, and cultural attitudes, showing that what is considered ethical differs across time and place.

The SAGE Handbook of Television Studies Manuel

Alvarado, Milly Buonanno, Herman Gray, Toby Miller, 2014-12-09 Genuinely transnational in content, as sensitive to the importance of production as consumption, covering the full range of approaches from political economy to textual analysis, and written by a star-studded cast of contributors - Emeritus Professor Graeme Turner, University of Queensland Finally, we have before us a first rate, and wide ranging volume that reframes television studies afresh, boldly synthesising debates in the humanities, cultural studies and social sciences... This volume should be in every library and media scholar's bookshelf. - Professor Ravi Sundaram, Centre for the Study of Developing Societies Bringing together a truly international spread of contributors from across the UK, US, South America, Mexico and Australia, this Handbook charts the field of television studies from issues of ownership and regulation through to reception and consumption. Separate chapters are dedicated to examining the roles of journalists, writers, cinematographers, producers and manufacturers in the production process, whilst others explore different formats including sport, novella and soap opera, news and current affairs, music and reality TV. The final section analyses the pivotal role played by audiences in the contexts of gender, race and class, and spans a range of topics from effects studies to audience consumption. The SAGE Handbook of Television Studies is an essential reference work for all advanced undergraduates, graduate students and academics across broadcasting, mass communication and media studies.

Reconceptualizing Deterrence Elli Lieberman, 2012 This book offers a reconceptualisation of conventional deterrence theory, and applies it to enduring rivalries in the Middle East. The work argues that many of the problems encountered in the development of deterrence theory lay in

the fact that it was developed during the Cold War, when the immediate problem it had to address was how to prevent catastrophic nuclear wars. The logic of nuclear deterrence compelled a preoccupation with the problem of stability over credibility; however, because the logic of conventional deterrence is different, the solution of the tension between credibility and stability is achieved by deference to credibility, due to the requirements of reputation and costly signaling. This book aims to narrow the gap between theory and evidence. It explores how a reconceptualization of the theory as a process that culminates in the internalization of deterrence within enduring rivalries is better suited to account for its final success: a finding that has eluded deterrence theorists for long. This interdisciplinary book will be of much interest to students of deterrence theory, strategic studies, international security, Middle Eastern studies and IR in general.

Media Today Joseph Turow, 2022-09-13 This eighth edition of Joseph Turow's pathbreaking media textbook uses convergence as a lens that puts students at the center of the profound changes in the 21st century media world. It teaches students to think critically about the role of media, and what these changes mean for their lives. The book's media systems approach helps students to look carefully at how media content is created, distributed, and exhibited in the new world that the digital revolution has created. From news media to video games and social networking to mobile platforms, it provides students with the tools they need to understand and critique the media they encounter and consume. The first part examines the media world as a

whole, while the second delves deep into key media industries, such as the movie, television, and video game industries. This new edition includes critical expanded coverage of social media, new forms of both audio and audiovisual media and international case studies, as well as updated figures, tables, and pedagogy, including key terms and further activities. Media Today is an excellent introduction to the world of media in the digital age, perfect for students seeking a solid grounding in media studies. Extensive pedagogical materials also make this a highly teachable book, well suited to the classroom. The accompanying website has also been updated with new student and instructor resources, including chapter recaps, recommended readings, and instructor's manual.
