Introduction to Mortgages and Mortgage Backed Securities Richard K. Green, 2013-11-21 In *Introduction to Mortgages & Mortgage Backed Securities*, author Richard Green combines current practices in real estate capital markets with financial theory so readers can make intelligent business decisions. After a behavioral economics chapter on the nature of real estate decisions, he explores mortgage products, processes, derivatives, and international practices. By focusing on debt, his book presents a different view of the mortgage market than is commonly available, and his primer on fixed-income tools and concepts ensures that readers understand the rich content he covers. Including commercial and residential real estate, this book explains how the markets work, why they collapsed in 2008, and what countries are doing to protect themselves from future bubbles. Green's expertise illuminates both the fundamentals of mortgage analysis and the international paradigms of products, models, and regulatory environments. Written for buyers of real estate, not mortgage lenders Balances theory with increasingly complex practices of commercial and residential mortgage lending Emphasizes international practices, changes caused by the 2008-11 financial crisis, and the behavioral aspects of mortgage decision making

Home Equity and Reverse Mortgages Harlan J Accola, 2018-01-05 In this unorthodox retirement book, *Home Equity and Reverse Mortgages: The Cinderella of the Baby Boomer Retirement*, Harlan J. Accola is frank about the current state of retirement planning. As baby boomers reach the prime of their lives, they find themselves faced

with new challenges. Ten thousand baby boomers retire per day, but there simply is not enough money to go around. If you want to have a fun and prosperous retirement, you are going to have to get creative. This is not your father's-- or your grandfather's retirement! Creative doesn't mean foolish- but it does mean different than what you have been thinking and what you have been told by conventional wisdom. This book is counterintuitive. The advice that Accola offers is guidance gleaned from over twenty years in the industry and collaboration with several financial planning experts and researchers referred to liberally throughout the book. The clear conclusion of the overwhelming evidence in the research shows that most people should get a reverse mortgage as soon as they are eligible at age 62- not 82 or 92 when they run out of money. Accola also understands the psychological barrier that arises when the reader hears the term reverse mortgage. He asks, If what you thought you knew about home equity and reverse mortgages was wrong, when would you want to know? He warns that the longer it takes you or your family to find the truth, the more dangerous it is. He attests to the stability and efficiency of a reverse mortgage and teaches the reader how to safely and profitably use one of the largest assets you have stored in your net worth- home equity. Accola covers the following in the entertaining Cinderella fairy tale format: The scary landscape ahead for millions of unsuspecting Baby Boomers The basics of creating liquidity from your home equity The psychology behind accepting or rejecting reverse mortgages The importance of planning ahead and buying an umbrella before it starts to rain. Real and immediate action steps that will help you get the most out of your retirement In this easy-to-understand and fun guide, Accola presents step by step how to properly use home equity so you can

enjoy the fourth quarter of your life and still leave a planned legacy for the next generation.

is a print on demand edition of a hard to find
publication. The surge in mortgage foreclosures
that began in late 2006 and continues today was
initially driven by deterioration in the

originations to 34%. The non-prime market

contracted sharply in mid-2007, in response to increasing defaults and foreclosures for these loans. This report: (1) provides info. on the performance of non-prime loans through 12/31/09; (2) examines how loan and borrower characteristics and economic conditions influenced the likelihood of default of non-prime loans; and (3) describes the features of data on non-prime loan performance and borrower characteristics.
