Casey Stoner

Pushing the Limits Casey Stoner, 2013-10-24 Showing anything is possible when determination meets talent, two-time World MotoGP champion Casey Stoner shares his incredible journey from Queensland toddler with an extraordinary ability on a motorbike, to his decision to retire at twenty-seven with nothing left to prove. For the first time, he tells of his early family life, the development of his riding skills and why his parents decided to sell everything and travel from Australia to Europe to chase the dream and support his aim to become World Champion when he was only fourteen years old. As fearless with his opinions as he is on the racetrack, Casey includes all the highs and lows of his life so far: the real reason he left for Europe so young, his thoughts on racing as it stands today, the riders' hierarchy, the politics of racing, the importance of family, his battle with illness and why he decided to turn his back on a multimillion-dollar contract when he was still winning. And he will let us in on some of the new goals he has set for himself. **PUSHING THE LIMITS** is a unique and remarkable account of self-sacrifice and tenacity to succeed against the odds, the uplifting story of a young Australian who took on the world on his terms, his way ... and won.

Media Management and Live Experience Alex Connock, 2024-04-03 Global and authoritative, this textbook maps modern, live experience media, the categories that thrive on real-time engagement and human connection – even in the age of synthetic content, AI and the Metaverse. Sports and sports betting, festivals, comedy, concerts, tours and theme parks are covered – plus theatre, trade events, conventions, museums and galleries, and immersive media. Live media events included are Burning Man, Glastonbury, the Indian Premier League, the English Premier League, Olympics, NBA and Bundesliga – plus sell-out Taylor Swift tours, the World Cup, Super Bowl, Ryder Cup and Formula One. Business models in this media category start with ticketing and advertising – now amplified with ecommerce, affiliate marketing, subscription and gambling transactions. Deep dives ask: Why is Saudi Arabia investing billions into golf and football? Why is standup comedy big in Nigeria? How are Broadway and the West End evolving? What do immersive technologies like Abba Voyage and the MSG Sphere offer for the future? With class questions, a quiz, summaries and slides for each chapter, this is a guide and course structure for anyone at university level or in industry studying the media, music, entertainment, events, exhibitions, sports, social media or gambling industries.

Live to Ride Wayne Johnson, 2010-06-15 Live to Ride is pure adrenaline—a full-throttle exploration of motorcycles that pushes to the limit, with heart-pounding accounts of riding the greatest bikes of all time, all over the world. “Live to ride, ride to live.” For many motorcycle riders, these words express life's guiding principle. Just take a look at the patch emblazoned on the jackets of legions of riders. Whether they're roaring down an empty highway on two wheels at an insane speed, hopping on for a few mind-boggling loops of motocross, joining in the “rolling thunder” of a veritable outlaw motorcycle club, or just cruising on a Harley on a Sunday afternoon, motorcyclists of all stripes share a common love of the freedom that is riding. Wayne Johnson, a lifelong motorcycle-lover and acclaimed writer, takes us around the globe and onto the terrain where the most extreme, thrilling forms of riding happen. Johnson shows where it all began more than a hundred years ago when the first motorcycle evolved from the bicycle and lands us on the track today with some of the world's highest-paid athletes— professional motorcycle road racers. From there we go inside radically different competitions like the vertigo-inspiring “Widowmaker Hillclimb” and the fastest land racing on the planet at the Bonneville Salt Flats. Johnson also offers an inside look at the legendarily secretive culture of biker clubs with firsthand accounts of his own wild rides with an outlaw club. In every one of

these venues, you aren't just passing through as an observer—you are on a bike, racing across new and undiscovered country, the horizon your only destination. If you have ever wondered what it's like to climb on a motorcycle and feel its engine roar to life, or have actually done it and felt the rush of flying off into the wild blue yonder, or have simply been intrigued by this iconic part of American culture and history, hold on tight for this irresistible, one-of-a-kind journey into motorcycling.

Entertainment Computing - ICEC 2004 Matthias Rauterberg, 2004-08-23 The advancement of information and communication technologies (ICT) has enabled broad use of ICT and facilitated the use of ICT in the private and personal domain. ICT-related industries are directing their business targets to home applications. Among these applications, entertainment will differentiate ICT applications in the private and personal market from the office. Comprehensive research and development on ICT - applications for entertainment will be different for the promotion of ICT use in the home and other places for leisure. So far engineering research and development on entertainment has never been really established in the academic communities. On the other hand entertainment-related industries such as the video and computer game industries have been growing rapidly in the last 10 years, and today the entertainment computing business outperforms the turnover of the movie industry. Entertainment robots are drawing the attention of young people.

The event called RoboCup has been increasing the number of participants year by year. Entertainment technologies cover a broad range of products and services: movies, music, TV (including upcoming interactive TV), VCR, VoD (including music on demand), computer games, game consoles, video arcades, gaming machines, the Internet (e. g. , chat rooms, board and card games, MUD), intelligent toys, edutainment, simulations, sport, theme parks, virtual reality, and upcoming service robots. The field of entertainment computing focuses on users' growing use of entertainment technologies at work, in school and at home, and the impact of this technology on their behavior. Nearly every working and living place has computers, and over two-thirds of children in industrialized countries have computers in their homes as well.

The Economics of Professional Road Cycling Daam Van Reeth, Daniel J. Larson, 2015-09-29 Over the past decade, a growing body of academic literature on the economics of road cycling has been amassed. This book is the first volume to bring together a majority of the academic research and knowledge on the economics and management of professional road cycling. Each chapter treats a particular economic aspect of the sport, from organizational structure to marketing, labor, game theory, and competitive balance. By discussing the existing research and complementing it with the newest concepts, ideas and data on professional road cycling, this book sets an agenda for further academic research while providing insights for all stakeholders in cycling: governments, cycling's governing bodies, team managers, race organizers, sponsors, media. Furthermore, the unique characteristics of the sport of cycling explored within this text inform broader management and industrial organization research, as they extend analyses of team labor, broadcast revenue generation, and sponsorship financing models. This book is equally of interest to academic researchers, students studying sports economics, and policy makers, such as race organizers, team managers, and sponsors.

Deep Learning for Coders with fastai and PyTorch Jeremy Howard, Sylvain Gugger, 2020-06-29 Deep learning is often viewed as the exclusive domain of math PhDs and big tech companies. But as this hands-on guide demonstrates, programmers comfortable with Python can

achieve impressive results in deep learning with little math background, small amounts of data, and minimal code. How? With fastai, the first library to provide a consistent interface to the most frequently used deep learning applications. Authors Jeremy Howard and Sylvain Gugger, the creators of fastai, show you how to train a model on a wide range of tasks using fastai and PyTorch. You'll also dive progressively further into deep learning theory to gain a complete understanding of the algorithms behind the scenes. Train models in computer vision, natural language processing, tabular data, and collaborative filtering Learn the latest deep learning techniques that matter most in practice Improve accuracy, speed, and reliability by understanding how deep learning models work Discover how to turn your models into web applications Implement deep learning algorithms from scratch Consider the ethical implications of your work Gain insight from the foreword by PyTorch cofounder, Soumith Chintala

Handbook of Research on Transmedia Storytelling, Audience Engagement, and Business Strategies Hernández-Santaolalla, Víctor, Barrientos-Bueno, Mónica, 2020-04-24 As media evolves with technological improvement, communication changes alongside it. In particular, storytelling and narrative structure have adapted to the new digital landscape, allowing creators to weave immersive and enticing experiences that captivate viewers. These experiences have great potential in marketing and advertising, but the medium's methods are so young that their potential and effectiveness is not yet fully understood. Handbook of Research on Transmedia Storytelling, Audience Engagement, and Business Strategies is a collection of innovative research that explores transmedia storytelling and digital marketing strategies in relation to audience engagement.

Highlighting a wide range of topics including promotion strategies, business models, and prosumers and influencers, this book is ideally designed for digital creators, advertisers, marketers, consumer analysts, media professionals, entrepreneurs, managers, executives, researchers, academicians, and students.

Leathered John Hopkins, 2021-09-02 Injury. Adrenaline. Addiction. These are the things that fuelled one man's race to international stardom as he pushed boundaries and took life on and off the bike to the limits. Starting out as a talented youth riding the desert tracks of California, his reckless nature and incredible talent earned him a position in the rarefied world of professional motorcycle racing. Despite the success in his professional life, his personal life was crumbling around him - John was battling with depression and temptation, which began to threaten his career, health and marriage, ultimately bringing him to a life of alcoholism, addiction and even smuggling. In his remarkable memoir, one of the world's most renowned riders takes us on a raw and unique journey to the extremes of fast living. John 'Hopper' Hopkins is an icon for motorsport fans worldwide. He won't let anything hold him back. He has broken almost every bone in his body (twice), suffered a bleed on the brain, and had a finger amputated... yet he continued to race. Finally, at the age of 35 - with his latest crash at Brands Hatch in 2017 putting him in rehab for two years - he decided to hang up his helmet. **Leathered** tells the incredible story of an unparalleled career. From bone-crunching injuries and alcohol-fuelled antics to the breakdown of his marriage, it unveils the true stories behind the lurid headlines.

web the molar volume of a gas from avogadro s law the volume is directly proportional to the number of moles the important point to keep in mind is that n can be moles of any gas since one mole always contain 6 02 10²³ molecules and one molecule of any gas at the same temperature will have the same kinetic energy based on this principle it is found
