A Monk's Guide to a Clean House and Mind Shoukei Matsumoto, 2018-01-04 Cleanliness is next to enlightenment. In this Japanese bestseller a Buddhist monk explains the traditional cleaning techniques that will help cleanse not only your house - but your soul. 'We remove dust to sweep away our worldly desires. We scrub dirt to free ourselves of attachments. We live simply and take time to contemplate the self, mindfully living each moment. It's not just monks that need to live this way. Everyone in today's busy world today needs it. The Zen sect of Buddhism is renowned for the cleanliness of its monks, but cleaning is greatly valued in Japanese Buddhism in general as a way to cultivate the mind. In this book, I introduce everyday cleaning methods typically employed in temples, while sharing what it's like to be a monk in training. This book will improve the condition not just of your own mind, but also the people around you. I hope readers will discover that cleanliness is an opportunity to contemplate oneself.'

Applying the Kaizen in Africa Keijiro Otsuka, Kimiaki Jin, Tetsushi Sonobe, 2018-08-22 At present, how to develop industries is a burning issue in Africa, where population growth remains high and economic development has thus far failed to provide sufficient jobs for many, especially young people and women. The creation of productive jobs through industrial development ought to be a central issue in steering economic activity across the continent. The authors of this book, consisting of two development economists and five practitioners, argue that the adoption of Kaizen management practices, which originated in Japan and have become widely used by manufacturers in advanced and emerging economies, is decisively the most effective first step for industrial development in Africa. This open access book discusses what Kaizen management is, why it is applicable to Africa, and why it can provide Africa with a springboard for sustainable economic growth and employment generation.

Soliloquy in Japanese and English Yoko Hasegawa, 2010 Language is recognized as an instrument of communication and thought. Under the shadow of prevailing investigation of language as a communicative means, its function as a tool for thinking has long been neglected in empirical research, vis-a-vis philosophical discussions. Language manifests itself differently when there is no interlocutor to communicate and interact. How is it similar and how does it differ in these two situations communication and thought? Soliloquy in Japanese and English analyzes experimentally-obtained soliloquy data in Japanese and in English and explores the potential utility of such data for delving into this uncharted territory. It deals with five topics in which elimination from discourse of an addressee is particularly relevant and significant. Four are derived from Japanese: the sentence-final particles *ne* and *yo*, deixis and anaphora, gendered speech, linguistic politeness; the fifth topic is the use of the second person pronoun *you* in soliloquy in English.

Waste: Uncovering the Global Food Scandal Tristram Stuart, 2009-10-26 The true cost of what the global food industry throws away. With shortages, volatile prices and nearly one billion people hungry, the world has a food problem—or thinks it does. Farmers, manufacturers, supermarkets and consumers in North America and Europe discard up to half of their food—enough to feed all the world's hungry at least three times over. Forests are destroyed and nearly one tenth of the West's greenhouse gas emissions are released growing food that will never be eaten. While affluent nations throw away food through neglect, in the developing world crops rot because farmers lack the means to process, store and transport them to market. But there could be surprisingly painless remedies for what has become one of the world's most pressing environmental and social problems. Waste traces the problem around the globe from the top to the bottom of the food production chain. Stuart's journey takes him from the streets of New York to China, Pakistan and Japan and back to his home in England. Introducing us to foraging pigs, potato farmers and food industry CEOs, Stuart encounters grotesque examples of profligacy, but also inspiring innovations and ways of making the most of what we have. The journey is a personal one, as Stuart is a dedicated freegan, who has chosen to live off of discarded or self-produced food in order to highlight the global food waste scandal. Combining front-line investigation with startling new data, Waste shows how the way we live now has created a global food crisis—and what we can do to fix it.

The Language of Feminine Beauty in Russian and Japanese Societies Natalia Konstantinovskaia, 2021-05-20 This book conducts a cross-linguistic and cross-cultural study of 'women's language' as it pertains to feminine beauty. It examines the ideological constructs of beauty and femininity in the cultures of Japan and Russia, as embodied through televised beauty ads, and relates them to the real-world language practices of Japanese and Russian women. The author traces the reciprocal connection between women's real and imagined language in the construction of ideals of beauty and femininity, revealing the complex ways women respond to ideological expectations regarding language use: assimilating, transforming, and subverting ideologized language and the assumptions implicit in it. She also demonstrates ways in which women alter the texture of language by appropriating 'masculine' language for their own purposes, shifting the meaning and correlates of linguistic items and structures. This book will be of interest to students and scholars of sociolinguistics, language and gender, cultural and media studies, and Russian and Japanese culture.

Rights for Robots Joshua C. Gellers, 2020-10-26 Bringing a unique perspective to the burgeoning ethical and legal issues surrounding the presence of artificial intelligence in our daily lives, the book uses theory and practice on animal rights and the rights of nature to assess the status of robots. Through extensive philosophical and

legal analyses, the book explores how rights can be applied to nonhuman entities. This task is completed by developing a framework useful for determining the kinds of personhood for which a nonhuman entity might be eligible, and a critical environmental ethic that extends moral and legal consideration to nonhumans. The framework and ethic are then applied to two hypothetical situations involving real-world technology—animal-like robot companions and humanoid sex robots. Additionally, the book approaches the subject from multiple perspectives, providing a comparative study of legal cases on animal rights and the rights of nature from around the world and insights from structured interviews with leading experts in the field of robotics. Ending with a call to rethink the concept of rights in the Anthropocene, suggestions for further research are made. An essential read for scholars and students interested in robot, animal and environmental law, as well as those interested in technology more generally, the book is a ground-breaking study of an increasingly relevant topic, as robots become ubiquitous in modern society. Louder and Faster Deborah Wong, 2019-09-10 A free open access ebook is available upon publication. Learn more at www.luminosoa.org. *Louder and Faster* is a cultural study of the phenomenon of Asian American taiko, the thundering, athletic drumming tradition that originated in Japan. Immersed in the taiko scene for twenty years, Deborah Wong has witnessed cultural and demographic changes and the exponential growth and expansion of taiko particularly in Southern California. Through her participatory ethnographic work, she reveals a complicated story embedded in memories of Japanese American internment and legacies of imperialism, Asian American identity and politics, a desire to be seen and heard, and the intersection of culture and global capitalism. Exploring the materialities of the drums, costumes, and bodies that make sound, analyzing the relationship of these to capitalist multiculturalism, and investigating the gender politics of taiko, *Louder and Faster* considers both the promises and pitfalls of music and performance as an antiracist practice. The result is a vivid glimpse of an Asian American presence that is both loud and fragile.

Haiku Guy David G. Lanoue, 2001-05 Perhaps the first novel to take as its subject the appreciation and crafting of haiku, this is the story of Buck-Teeth, a provincial poet and fictitious student of the Japanese classical haiku master Issa, who, in the course of his training, travels to ancient Edo and contemporary New Orleans, falls in and out of love, considers the many schools of haiku, and ultimately learns what it is to be a poet. Along the way we are offered gentle lessons on haiku and what we might put into it, how it and we got this way, and what it all might mean.

Governing Sustainable Cities Bob Evans,Marko Joas,Susan Sundback,Kate Theobald,2013-06-17 Urban governance and sustainability are rapidly becoming key issues around the world. Currently three billion people - half the population of the planet - live in cities, and by 2050 a full two-thirds of the world's population will be housed in ever larger and increasingly densely populated urban areas. The economic, social and environmental challenges posed by urbanization on such a large scale and at such a rapid pace are staggering for local, regional and national governments working towards sustainability. Solutions to the myriad problems plaguing the quest for sustainability at the city-level are equally as diverse and complex, but are rooted in the assumptions of the 'sustainability agenda', developed at the Rio Earth Summit and embodied in Local Agenda/Action 21. These assumptions state that good governance is a necessary precondition for the achievement of sustainable development, particularly at the local level, and that the mobilization of local communities is an essential part of this process. Yet until now, these assumptions, which have guided the policies and programmes of over 6000 local authorities around the world, have never been seriously tested. Drawing on three years of field research in 40 European towns and cities, *Governing for Sustainable Cities* is the first book to examine empirically the processes of urban governance in sustainable development. Looking at a host of core issues including institutional and social capacity, institutional design, social equity, politics, partnerships and cooperation and creative policy-making, the authors draw compelling conclusions and offer strong guidance. This book is essential reading for policy-makers, politicians, activists and NGOs, planners, researchers and academics, whether in Europe, North America, Australasia or transitional and developing countries, concerned with advancing sustainability in our rapidly urbanizing world.
