Climate Politics And The Climate Movement In Australia Verity Burgmann, Hans Baer, 2012-08-01 Climate change is the hottest topic of the twenty-first century and the climate movement a significant global social movement. This book examines the broad context of Australian climate politics and the place of the climate movement within it. Acting 'from above' are the most powerful forces—corporations and governments, both Labor and Coalition—with the media framing the issues. Climate movement actors 'in the middle' include the Australian Greens, major environmental and climate organisations, think-tanks, academics, public intellectuals and the union movement. Acting 'from below' are the numerous local climate action groups and various regional and national networks. This lowest level is the primary location of the climate movement; and grassroots mobilisation the source of its vitality. To advocate a safe climate and climate justice, the book ends by offering a vision for an alternative Australia based upon the principles of social equity and environmental sustainability.

**A Moving Exhibition** Antria Pelekanou,

Challenging the Boycott, Divestment and Sanctions (BDS) Movement Ronnie Fraser, Lola Fraser, 2023-02-13 Challenging the Boycott, Divestment and Sanctions (BDS) Movement focuses on the efforts to oppose antisemitism, the academic boycott, and the BDS movement. The State of Israel has faced many threats, most of them military, since it was established in 1948, but the threat posed by the NGO forum at the United Nations World Conference against Racism in Durban, South Africa, in August 2001 was different. The forum unleashed the new antisemitism which targeted the State of Israel, as well as a non-violent, civil society-based campaign based on the South African anti-apartheid campaign of the 1980s – which was to form the basis of the international Boycott, Divestment and Sanctions (BDS) movement directed at the State of Israel. Featuring case studies from the United States, Great Britain, Israel, and South Africa, each chapter of this wide-ranging volume discusses examples of opposition to the divisive BDS campaign and the proposed academic boycott of Israel over the last two decades, including the fight for formal recognition of the new antisemitism by governments and international bodies and the use of a variety of legal measures. The rise of antisemitism within academia and wider society is also examined. This book will be vital reading for students, scholars, and activists with an interest in social movements, Israel, and Middle East politics and history.

The Israeli Peace Movement Leonie Fleischmann, 2019-09-19 The Israeli peace movement has been in decline since the 2000s. In particular, the liberal Zionist groups, who call for peace for the sake of the security and continuity of Israel, have become paralysed and almost voiceless since the second Intifada. However, despite the stagnation around the Israeli-

Palestinian Peace Process, this book argues that other important groups have emerged that present new ways to challenge the status quo. These are radical groups that act in solidarity with the Palestinians and human rights organisations and whose aim is to reveal the realities of the occupation and hold the government to account. Leonie Fleishmann argues that these groups have been, and remain, the agenda setters, pushing the more moderate groups to mobilise more quickly and encouraging them to take up more confrontational ideas. Using social movements theory, and based on 50 interviews and participant observation, this book sheds light on contemporary Israeli peace activism.

*International Diplomacy and the Olympic Movement* Aaron Beacom, 2012-07-31 This book explores the relationship between diplomatic discourse and the Olympic Movement, charting its continuity and change from an historical perspective. Using the recent body of literature on diplomacy it explores the evolution of diplomatic discourse around a number of themes, in particular the increasing range of stakeholders engaged in the Olympic bid, disability advocacy and the mainstreaming of the Paralympic Games and the evolution of the Olympic boycott. The work addresses the increasing engagement of a number of non-state actors, in particular the IOC and the IPC, as indicative of the diffusion of contemporary diplomacy. At the same time it identifies the state as continuing in the role of primary actor, setting the terms of reference for diplomatic activity beyond the pursuit of its own policy interests. Its historical investigation, based around a UK case study, provides insights into the characteristics of diplomatic discourse relating to the Games, and creates the basis for mapping the future trajectory of diplomacy as it relates to the Olympic Movement.

**Fossil Capital** Andreas Malm, 2016-02-01 How capitalism first promoted fossil fuels with the rise of steam power The more we know about the catastrophic implications of climate change, the more fossil fuels we burn. How did we end up in this mess? In this masterful new history, Andreas Malm claims it all began in Britain with the rise of steam power. But why did manufacturers turn from traditional sources of power, notably water mills, to an engine fired by coal? Contrary to established views, steam offered neither cheaper nor more abundant energy—but rather superior control of subordinate labour. Animated by fossil fuels, capital could concentrate production at the most profitable sites and during the most convenient hours, as it continues to do today. Sweeping from nineteenth-century Manchester to the emissions explosion in China, from the original triumph of coal to the stalled shift to renewables, this study hones in on the burning heart of capital and demonstrates, in unprecedented depth, that turning down the heat will mean a radical overthrow of the current economic order.

**The Kurdish National Movement in Turkey** Cengiz Gunes,2013-01-11 This book provides an interpretive and critical analysis of Kurdish identity, nationalism and national movement in Turkey since the 1960s. By raising issues and questions relating to Kurdish political identity and highlighting the ideological specificity, diversity and the transformation of Kurdish nationalism, it develops a new empirical dimension to the study of the Kurds in Turkey. Cengiz Gunes applies an innovative theoretical approach to the analysis of an impressively large volume of primary sources and data drawn from books and magazines published by Kurdish activists, political parties and groups. The analysis focuses on the specific demands articulated by the Kurdish national movement and looks at Kurdish nationalism at a specific level by disaggregating the nationalist discourse, showing variations over time and across different Kurdish nationalist organisations. Situating contemporary Kurdish political identity and its political manifestations within a historical framework, the author examines the historical and structural conditions that gave rise to it and influenced its evolution since the 1960s. The analysis also encompasses an account of the organisational growth and evolution of the Kurdish national movement, including the political parties and groups that were active in the period. Bringing the study of the organisational development and growth of the Kurdish National Movement in Turkey up to date, this book will be an important reference for students and scholars of Middle Eastern politics, social movements, nationalism and conflict.

**Taiwan's Social Movements under Ma Ying-jeou** Dafydd Fell,2017-02-17 In the spring of 2014, the Sunflower Movement's three-week occupation of the Legislative Yuan brought Taiwan back to international media attention. It was the culmination of a series of social movements that had been growing in strength since 2008 and have become even more salient since the spring of 2014. Social movements in Taiwan have emerged as a powerful new actor that needs to be understood alongside those players that have dominated the literature such as political parties, local factions, Taishang, China and the United States. This book offers readers an introduction to the development of these social movements in Taiwan by examining a number of important movement case studies that focus on the post 2008 period. The return of the Kuomintang (KMT) to power radically changed the political environment for Taiwan's civil society and so the book considers how social activists responded to this new political opportunity structure. The case chapters are based on extensive fieldwork and are written by authors from a variety of disciplinary backgrounds and methodological approaches; in some cases authors combine being both academics and activists themselves. Together, the chapters focus on a number of core issues, providing the book with four key aims. Firstly, it investigates the roots of the movements and considers how to best explain their emergence. Secondly, it examines the development trajectories of these movements. Thirdly, it looks at the best way to explain their impact and

development patterns, and finally it assesses their overall impact, questioning whether they can be regarded as successes or failures. Covering a unique range of social movement cases, the book will be of interest to students and researchers interested in Taiwanese society and politics, as well as social movements and civil society.

*Playing for Change* Russell Field, 2016-01-27 For more than forty years, scholars of the history and sociology of sport and recreation have studied how, no matter the time or place, sport is always more than just a game. In *Playing for Change*, leading scholars in the field of sports studies consider that legacy and forge ahead into the discipline's future. Through essays grouped around the themes of international and North American sport, including the Vancouver and Sochi Olympic Games; access to physical activity in Canadian communities; and the role of activism and the public intellectual in the delivery of sport, the contributors offer a comprehensive examination of the institutional structures of sport, physical activity, and recreation. This book provides wide-ranging examples of cutting-edge research in a vibrant and growing field.

**Iran, the Green Movement and the USA** Hamid Dabashi, 2013-07-04 Iran, the Green Movement and the USA presents the paradox that the USA faces in dealing with Iran over its nuclear armament: negotiate, and legitimize Ahmadinejad's otherwise troubled presidency; resort to sanctions or military strikes, and altogether destroy the budding civil rights campaign of the Green Movement. Either way, as leading Iranian scholar Hamid Dabashi argues, the Islamic Republic will become even stronger. Featuring a short history of how the USA and Iran came to be in this confrontation, this elegantly written book provides the reader with a dynamic picture of the regional geopolitics and a purposeful guide to how to understand and deal with it.

**Why Occupy a Square?** Jeroen Gunning, Ilan Zvi Baron, 2014-01-10 On 25 January 2011, tens of thousands of Egyptians came out on the streets to protest against emergency rule and police brutality. Eighteen days later, Mubarak, one of the longest sitting dictators in the region, had gone. How are we to make sense of these events? Was this a revolution, a revolutionary moment? How did the protests come about? How were they able to outmaneuver the police? Was this really a 'leaderless revolution,' as so many pundits claimed, or were the demonstrations an outgrowth of the protest networks that had developed over the past decade? Why did so many people with no history of activism participate? What role did economic and systemic crises play in creating the conditions for these protests to occur? Was this really a Facebook revolution? *Why Occupy a Square?* is a dynamic exploration of the shape and timing of these extraordinary events, the players behind them, and the tactics and protest frames they developed. Drawing on social movement theory, it traces the interaction between protest cycles, regime responses and broader structural changes over the past decade. Using theories of urban politics, space and power, it reflects on the exceptional state of non-sovereign politics that developed during the occupation of Tahrir Square.

**Social Movements and Their Technologies** Stefania Milan, 2013-11-06 Now in paperback for the first time, *Social Movements and their Technologies* explores the interplay between social movements and their 'liberated technologies'. It analyzes the rise of low-power radio stations and radical internet projects ('emancipatory communication practices') as a political subject, focusing on the sociological and cultural processes at play. It

provides an overview of the relationship between social movements and technology, and investigates what is behind the communication infrastructure that made possible the main protest events of the past fifteen years. In doing so, Stefania Milan illustrates how contemporary social movements organize in order to create autonomous alternatives to communication systems and networks, and how they contribute to change the way people communicate in daily life, as well as try to change communication policy from the grassroots. She situates these efforts in a historical context in order to show the origins of contemporary communication activism, and its linkages to media reform campaigns and policy advocacy.

**Moving Data** Pelle Snickars, Patrick Vonderau, 2012 The iPhone has revolutionized not only how people communicate but also how we consume and produce culture. Combining traditional and social media with mobile connectivity, smartphones have redefined and expanded the dimensions of everyday life, allowing individuals to personalize media as they move and process constant flows of data. Today, millions of consumers love and live by their iPhones, but what are the implications of its special technology on society, media, and culture? Featuring an eclectic mix of original essays, *Moving Data* explores the iPhone as technological prototype, lifestyle gadget, and platform for media creativity. Media experts, cultural critics, and scholars consider the device's newness and usability--even its lickability--and its biographical story. The book illuminates patterns of consumption; the fate of solitude against smartphone ubiquity; the economy of the App Store and its perceived crisis of choice; and the distance between the accessibility of digital information and the protocols governing its use. Alternating between critical and conceptual analyses, essays link the design of participatory media to the iPhone's technological features and sharing routines, and they follow the extent to which the pleasures of gesture-based interfaces are redefining media use and sensory experience. They also consider how user-led innovations, collaborative mapping, and creative empowerment are understood and reconciled through changes in mobile surveillance, personal rights, and prescriptive social software. Presenting a range of perspectives and arguments, this book reorients the practice and study of media critique.

**Fractured Politics** John Crabtree, 2011 Latin American opinion surveys consistently point to Peruvian citizens' deep distrust of their elected rulers and democratic institutions. The 2011 presidential and legislative elections in Peru, along with the regional and municipal polls of the previous year, showed once again the degree of political fragmentation in contemporary Peru and the weakness of its party system. *Fractured Politics* examines the history of political exclusion in Peru, the weakness of representative institutions, and the persistence of localized violent protest. It also evaluates the contribution of institutional reforms in bridging the gap between state and society, including Peru's Law on Political Parties, administrative decentralization, and the experience of the Defensoría, or ombudsman's office. The chapters, by leading scholars of Peruvian politics, emerge from a conference, held in 2009 in Saint Antony's College Oxford. Julio Cotler, from the Instituto de Estudios Peruanos (IEP), was the keynote speaker.

*Rise of Islamic Political Movements and Parties* Kirdis Esen Kirdis, 2019-05-09 Although regarded as a single community of Islamists,

Islamic political movements utilise vastly different means to pursue their goals. This book examines why some Islamic movements facing the same socio-political structures pursue different political paths, while their counterparts in diverse contexts make similar political choices. Based on qualitative fieldwork involving personal interviews with Islamic politicians, journalists, and ideologues - conducted both before and after the Arab Spring - author Esen KirdiAY draws close comparisons between six Islamic movements in Jordan, Morocco and Turkey. She analyses how some Islamic movements decide to form a political party to run in elections, while their counterparts in the same country reject doing so and instead engage in political activism as a social movement through informal channels. More broadly, the study demonstrates the role of internal factors, ideological priorities and organisational needs in explaining differentiation within Islamic political movements, and discusses its effects on democratisation.
