*Integrated Food Safety and Veterinary Public Health* Sava Buncic, 2006 The importance of food safety for human health has been widely recognized. The safety of foods of animal origin is particularly relevant because the large majority of foodborne diseases come from poultry, eggs, meat, milk and dairy products and fish. This textbook covers an integrated approach to this type of food production, hygiene and safety and shows how it results in concurrent benefits to animal well being, human health, protection of the environment and socioeconomics.

**Conserving Words** Daniel J. Philippon, 2004 Conserving Words looks at five authors of seminal works of nature writing who also founded or revitalized important environmental organizations: Theodore Roosevelt and the Boone and Crockett Club, Mabel Osgood Wright and the National Audubon Society, John Muir and the Sierra Club, Aldo Leopold and the Wilderness Society, and Edward Abbey and Earth First! These writers used powerfully evocative and galvanizing metaphors for nature, metaphors that Daniel J. Philippon calls “conserving” words: frontier (Roosevelt), garden (Wright), park (Muir), wilderness (Leopold), and utopia (Abbey). Integrating literature, history, biography, and philosophy, this ambitious study explores how “conserving” words enabled

narratives to convey environmental values as they explained how human beings should interact with the nonhuman world.
