Introduction to Risk Analysis Daniel M. Byrd, C. Richard Cothorn, 2000 Written for safety and loss-control, environmental, and quality managers, this is the first comprehensive, integrated guide to developing a complete environmental risk analysis for regulated substances and processes. Unlike other books, *Introduction to Risk Analysis* looks at risk from a regulatory perspective, allowing both professionals in regulatory agencies concerned with risk—including OSHA, EPA, USDA, DOT, FDA, and state environmental agencies—and professionals in any agency-regulated industry to understand and implement the methods required for proper risk assessment. The authors examine risk and the structure of analysis. Emphasizing the predictive nature of risk, they discuss the quantitative nature of risk and explore quantitative-analysis topics, including data graphing, arithmetic thinking, risk estimating, and curve fitting. Chapters include discussions on functions, models, and uncertainties; the regulatory process; risk assessment; exposure; dosimetry; epidemiology; toxicology; risk characterization; comparative risk assessment; ecological risk assessment; risk management; and risk communication. Six in-depth case studies, an annotated bibliography, and more than 50 figures are also included.

Advanced Introduction to Environmental Impact Assessment Angus Morrison-Saunders, 2023-10-06 This updated second edition of the *Advanced Introduction to Environmental Impact Assessment* offers an up-to-date exploration of the current theory and practice of Environmental Impact Assessment (EIA), a crucial tool for evaluating and mitigating the impacts of development projects on the environment. Angus Morrison-Saunders provides an overview of the key concepts, principles, and methodologies of EIA, with a focus on recent developments, emerging trends, and best practices in the field.

Biological Processes Associated with Impact Events Charles Cockell, Christian Koeberl, Iain Gilmour, 2006-05-18 The biological effects of asteroid and comet impacts have been widely viewed as primarily destructive. The role of an impactor in the K/T boundary extinctions has had a particularly important influence on thinking concerning the role of impacts in ecological and biological changes. During the 10 and final workshop of the ESF IMPACT program during March 2003, we sought to investigate the wider aspects of the involvement of impact events in biological processes, including the beneficial role of these events from the prebiotic through to the ecosystem level. The ESF IMPACT programme (1998-2003) was an interdisciplinary effort that is aimed at understanding impact processes and their effects on the Earth environment, including environmental, geological and biological changes. The IMPACT programme has 15 member states and the activities of the programme range from workshops to short courses on topics such as impact stratigraphy, shock metamorphism, etc. The program has also awarded mobility grants and been involved in the development of teaching aids and numerous publications, including this one.

Health Data Privacy under the GDPR Maria Tzanou, 2020-11-23 The growth of data-collecting goods and services, such as ehealth and mhealth apps, smart watches, mobile fitness and dieting apps, electronic skin and ingestible tech, combined with recent technological developments such as increased capacity of data storage, artificial intelligence and smart algorithms, has spawned a big data revolution that has reshaped how we understand and approach health data. Recently the COVID-19 pandemic has foregrounded a variety of data privacy issues. The collection, storage, sharing and analysis of health-related data raises major legal and ethical questions relating to privacy, data protection, profiling, discrimination, surveillance, personal autonomy and dignity. This book examines health privacy questions in light of the General Data Protection Regulation (GDPR) and the general data privacy legal framework of the European Union (EU). The GDPR is a complex and evolving body of law that aims to deal with several technological and societal health data privacy problems, while safeguarding public health interests and addressing its internal gaps and uncertainties. The book answers a diverse range of questions including: What role can the GDPR play in regulating health surveillance and big (health) data analytics? Can it catch up with internet-age developments? Are the solutions to the challenges posed by big health data to be found in the law? Does the GDPR provide adequate tools and mechanisms to ensure public health objectives and the effective protection of privacy? How does the GDPR deal with data that concern children's health and academic research? By analysing a number of diverse questions concerning big health data under the GDPR from various perspectives, this book will appeal to those interested in privacy, data protection, big data, health sciences, information technology, the GDPR, EU and human rights law.

Ageing Well Alan D. Dangour,Emily M. D. Grundy,Astrid E. Fletcher,2007-03-12 Many current public health actions and policies aimed at older people revolve around the often prevailing view that failing health is a consequence of ageing. It is now clear that it is possible to postpone or even prevent much of the age-related decline in health that was once thought inevitable. Future policies must recognise this changing paradigm, and, using a multi-disciplinary approach, integrate fully the changing needs of older people into all areas of public policy including health, nutrition, social support, housing, and economic security. Derived from the 47th Annual Symposium of the Society for the Study of Human Biology in November 2005, Ageing Well: Nutrition, Health, and Social Interventions highlights important health and social factors affecting quality of life in older age, and reviews possible interventions aimed at the prevention or amelioration of problems that reduce the potential for ageing well. Covering a wide range of topics, contributors address the nutritional vulnerability and specific nutritional needs of older adults and confirm the necessity of appropriate diet and exercise in order to maintain both physical and cognitive health. Reminiscence, social interaction and support are highlighted as crucial for the preservation of identity, health and emotional well-being. Other chapters are concerned with socio-economic differences in the extent of age-related changes in health, resulting particularly from poor quality housing and lack of family support networks. The book includes an examination of the economic consequences for health care systems and pension schemes of ageing populations, provides insight into the methodology of evaluating the cost-effectiveness of interventions, and outlines how the minimum cost of healthy living for the 65+ population can be estimated. Bringing together the very latest information on successful ageing, Ageing Well: Nutrition, Health, and Social Interventions presents an up-to-date synthesis of the current evidence of nutrition, public health and social interventions aiming to ensure health and good quality of life in older age.
