Special Events Joe Goldblatt,1997 This unique text offers a comprehensive study of the special events field, which is burgeoning over into many management sub-fields. Widely varied types of events are spawning a demand for new and innovative thinking and definitive management styles, and Goldblatt paints a clear perspective on how the industry has developed and keeps an ear to the ground as to the future picture. Real-life case studies (war stories), carefully interwoven into the text to strengthen and expand concepts, are followed by a concise author's comment called lesson learned. The progression of each chapter is guided by highlighted boxes, clearly illustrated figures, and color photographs (lending clarity and inspiration in a field where presentation is key). A summary section at the end of each chapter reemphasizes critical points and provides the reader with an

invaluable big picture perspective.

Introduction to Opto-mechanical Design Daniel Vukobratovich,Suzanne M. Vukobratovich,1999

Atherothrombosis and Coronary Artery Disease Valentin Fuster,Eric J. Topol,Elizabeth G. Nabel,2005 Written by the world's foremost authorities, this volume provides comprehensive coverage of current approaches to the prevention, diagnosis, and management of atherothrombosis and its coronary and noncoronary complications. This edition has been thoroughly updated, sharply focused on clinical information, and trimmed to one manageable volume. Coverage begins with a review of risk factors and prevention, emphasizing lipid abnormalities, hypertension, smoking, diabetes, and obesity. Subsequent sections examine the pathogenesis of atherosclerosis, markers and imaging, acute coronary syndromes, chronic stable angina, and noncoronary atherothrombosis. Clinical presentations, medical management, and the latest interventional strategies are included.

Events Management Glenn Bowdin,William O'Toole,Johnny Allen,Rob Harris,Ian McDonnell,2006-03-15 Events Management second edition provides an introduction to the principles and practices associated with planning, managing and staging events. The book: * Introduces the key concepts of event planning and management * Discusses the key components for staging an event, and covers the whole process from creation to evaluation * Examines the

events industry within its broader business context * Provides an effective guide for producers of events * Contains learning objectives and review questions to consolidate learning Now in its second edition, this successful text has been fully revised and updated to include new case studies and chapters on event tourism, project management of events, strategic marketing, and issues and trends. It is full of real-life case studies which illustrate key concepts and place theory in a practical context. Examples include the Edinburgh International Festival, Glastonbury Festival, Vodafone Ball, MTV Awards, Notting Hill Carnival, T in the Park and the Daily Mail Ideal Home Show. Events Management is the must-have introductory text providing a complete A-Z of the principles and practices associated with planning, managing and staging events. Events Management is supported by a website (<http://em.worldofevents.net>) which includes updates, downloadable figures from the book and an online 'history of events', together with links to websites and other resources for both students and lecturers.
