Policing Child Sexual Abuse Paul Bleakley, 2021-09-15 Policing Child Sexual Abuse provides a historical overview of the evolution of policing child sexual abuse in Queensland, tracing a legacy of failure (even corruption) in the decades leading up to the foundation of Task Force Argos, a branch of the Queensland Police Service created in part as a response to criticisms of police shortcomings in this area. The book uses archival material as a foundation to trace the shifting approach to policing child sexual abuse (CSA) from the 1960s, when juvenile justice first became a central focus of policing in Queensland, to the 2010s, at which point Task Force Argos made international headlines for its primary role in bringing major international CSA offenders like Shannon McCool, Benjamin Warhead Faulkner and Richard Huckle to justice. Examining archival material to pinpoint the reasons that CSA was not dealt with effectively in the past, the book shows that often these reasons were political, unrelated to the policing of CSA at all. Policing Child Sexual Abuse stands as a testament to the victims of CSA who have been failed by the system in the past. In addition, the book acts as a case study of how a police force with such a negative track record in policing this area was able to correct its path and reform its practices, to the point that it could emerge as a world leader in policing CSA. Though nominally focused on policing in one Australian state, the implications are global, with Task Force Argos's work naturally impacting on the CSA investigations of all of its partner agencies, both in Australia and internationally. Demonstrating how, even in contexts where police responses to CSA have been met with significant criticism, an opportunity still exists to reject historical failures in favour of a renewed commitment to proactive policing, this book will be of great interest to scholars of policing, historical criminology, and child sexual abuse.

**Magnetic Bubble Technology** A. H. Eschenfelder, 2012-12-06 Magnetic bubbles are of interest to engineers because their properties can be used for important practical electronic devices and they are of interest to physicists because their properties are manifestations of intriguing physical principles. At the same time, the fabrication of useful configurations challenges the materials scientists and engineers. A technology of magnetic bubbles has developed to the point where commercial products are being marketed. In addition, new discovery and development are driving this technology toward substantially lower costs and presumably broader application. For all of these reasons there is a need to educate newcomers to this field in universities and in industry. The purpose of this book is to provide a text for a one-semester course that can be taught under headings of Solid State Physics, Materials Science, Computer Technology or Integrated Electronics. It is expected that the student of anyone of these disciplines will be interested in each of the chapters of this book to some degree, but may concentrate on some more than others, depending on the discipline. At the end of each chapter there is a brief summary which will serve as a reminder of the contents of the chapter but can also be read ahead of time to determine the depth of your interest in the chapter.

**If Only They Could Talk** Bonnie Jones Reynolds, Dawn E. Hayman, 2010-03-04 Welcome to Spring Farm, where animals and people come together -- to explore their own natural ability to communicate with each other.... Something magical is happening on a small farm in upstate New York. Animals of all shapes and sizes are living side by side -- talking, listening, learning, and loving - along with caring people who have come to learn the secrets of interspecies communication. It's a gift that all of us are born with, as long as we're willing to open our hearts and minds to the gentle creatures who share our world. This is what happened at Spring Farm when two very special women gave shelter to animals that were sick or abandoned. As trust and affection grew between them, so did their capacity to exchange feelings and thoughts. Today, the miracle of Spring Farm CARES is shared through communication workshops for visitors, students, and animal lovers. So come discover the magic of Spring Farm. Humans are more than welcome.... You'll meet Ricardo the duck, who explains that he won't leave his warm nest in a nearby chimney even if the house owners disapprove...Chubby the horse, who shares her feelings of despair when her barn catches fire...Elvis the kitten, who wiggles like a rock star...Sugar the Shetland pony, who dedicates a poem to her long-lost herd...and a whole menagerie of mouse-friendly cats, loving llamas, gregarious guinea pigs, delightful dogs, and other amazing critters.
