The Cambridge Handbook of Applied Perception Research Robert R. Hoffman,Peter A. Hancock,Mark W. Scerbo,Raja Parasuraman,James L. Szalma,2015-01-26 The Cambridge Handbook of Applied Perception Research covers core areas of research in perception with an emphasis on its application to real-world environments. Topics include multisensory processing of information, time perception, sustained attention, and signal detection, as well as pedagogical issues surrounding the training of applied perception researchers. In addition to familiar topics, such as perceptual learning, the Handbook focuses on emerging areas of importance, such as human-robot coordination, haptic interfaces, and issues facing societies in the twenty-first century (such as terrorism and threat detection, medical errors, and the broader implications of automation). Organized into sections representing major areas of theoretical and practical importance for the application of perception psychology to human performance and the design and operation of human-technology interdependence, it also addresses the challenges to basic research, including the problem of quantifying information, defining cognitive resources, and theoretical advances in the nature of attention and perceptual processes.

Mobile First Luke Wroblewski,2011 Our industry's long wait for the complete, strategic guide to mobile web design is finally over. Former Yahoo! design architect and cocreator of Bagcheck Luke Wroblewski knows more about mobile experience than the rest of us, and packs all he knows into this entertaining, to-the-point guidebook. Its data-driven strategies and battle tested techniques will make you a master of mobile-and improve your non-mobile design, too!

The Synthesizer Mark Vail,2014-01-22 Electronic music instruments weren't called synthesizers until the 1950s, but their lineage began in 1919 with Russian inventor Lev Sergeyevich Termen's development of the Etherphone, now known as the Theremin. From that point, synthesizers have undergone a remarkable evolution from prohibitively large mid-century models confined to university laboratories to the development of musical synthesis software that runs on tablet computers and portable media devices. Throughout its history, the synthesizer has always been at the forefront of technology for the arts. In The Synthesizer: A Comprehensive Guide to Understanding, Programming, Playing, and Recording the Ultimate Electronic Music Instrument, veteran music technology journalist, educator, and performer Mark Vail tells the complete story of the synthesizer: the origins of the many forms the instrument takes; crucial advancements in sound generation, musical control, and composition made with instruments that may have become best sellers or gone entirely unnoticed; and the basics and intricacies of acoustics and synthesized sound. Vail also describes how to successfully select, program, and play a synthesizer; what alternative controllers exist for creating electronic music; and how to stay focused and productive when faced with a room full of instruments. This one-stop reference guide on all things synthesizer also offers tips on encouraging creativity, layering sounds, performance, composing and recording for film and television, and much more.

The Teaching of Instrumental Music Richard Colwell,Michael Hewitt,2015-08-20 This book introduces music education majors to basic instrumental pedagogy for the instruments and ensembles most commonly found in the elementary and secondary curricula. This text focuses on the core competencies required for teacher certification in instrumental music. The first section of the book focuses on essential issues for a successful instrumental program: objectives, assessment and evaluation, motivation, administrative tasks, and recruiting and scheduling (including block scheduling). The second section devotes a chapter to each wind instrument plus percussion and strings, and includes troubleshooting checklists for each instrument. The third section focuses on rehearsal techniques from the first day through high school.

Musical Instruments in the 21st Century Till Bovermann,Alberto de Campo,Hauke Egermann,Sarah-Indriyati Hardjowirogo,Stefan Weinzierl,2016-12-09 By exploring the many different types and forms of contemporary musical instruments, this book contributes to a better understanding of the conditions of instrumentality in the 21st century. Providing insights from science, humanities and the arts, authors from a wide range of disciplines discuss the following questions: · What are the conditions under which an object is recognized as a musical instrument? · What are the actions and procedures typically associated with musical instruments? · What kind of (mental and physical) knowledge do we access in order to recognize or use something as a musical instrument? · How is this knowledge being shaped by cultural conventions and temporal conditions? · How do algorithmic processes 'change the game' of musical performance, and as a result, how do they affect notions of instrumentality? · How do we address the question of instrumental identity within an instrument's design process? · What properties can be used to differentiate successful and unsuccessful instruments? Do these properties also contribute to the instrumentality of an object in general? What does success mean within an artistic, commercial, technological, or scientific context?

HCI International 2020 - Posters Constantine Stephanidis,Margherita Antona,2020-07-15 The three-volume set CCIS 1224, CCIS 1225, and CCIS 1226 contains the extended abstracts of the posters presented during the 21st International Conference on Human-Computer Interaction, HCII 2020, which took place in Copenhagen, Denmark, in July 2020.* HCII 2020 received a total of 6326 submissions, of which 1439 papers and 238 posters were accepted for publication in the pre-conference proceedings after a careful reviewing process. The 238 papers presented in these three volumes are organized in topical sections as follows: Part I: design and evaluation methods and tools; user characteristics, requirements and preferences; multimodal and natural interaction; recognizing human psychological states; user experience studies; human perception and cognition. -AI in HCI. Part II: virtual, augmented and mixed reality; virtual humans and motion modelling and tracking; learning technology. Part III: universal access, accessibility and design for the elderly; smartphones, social media and human behavior; interacting with cultural heritage; human-vehicle interaction; transport, safety and crisis management; security, privacy and trust; product and service design. *The conference was held virtually due to the COVID-19 pandemic. The chapter "Developing an Interactive Tabletop Mediated Activity to Induce Collaboration by Implementing Design Considerations Based on Cooperative Learning Principles" is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

Preparing for Life in a Digital Age Julian Fraillon,John Ainley,Wolfram Schulz,Tim Friedman,Eveline Gebhardt,2014-12-13 Ability to use information and communication technologies (ICT) is an imperative for effective participation in today's digital age. Schools worldwide are responding to the need to provide young people with that ability. But how effective are they in this regard? The IEA International Computer and Information Literacy Study (ICILS) responded to this question by studying the extent to which young people have developed computer and information literacy (CIL), which is defined as the ability to use computers to investigate, create and communicate with others at home, school, the workplace and in society. The study was conducted under the auspices of the International Association for the Evaluation of Educational Achievement (IEA) and builds on a series of earlier IEA studies focusing on ICT in education. Data were gathered from almost 60,000 Grade 8 students in more than 3,300 schools from 21 education systems. This information was augmented by data from almost 35,000 teachers in those schools and by contextual data collected from school ICT-coordinators, school principals and the ICILS national research centers. The IEA ICILS team systematically investigated differences among the participating countries in students' CIL outcomes, how participating countries were providing CIL-related education and how confident teachers were in using ICT in their pedagogical practice. The team also explored differences within and across countries with respect to relationships between CIL education outcomes and student characteristics and school contexts. In general, the study findings presented in this international report challenge the notion of young people as "digital natives" with a self-developed capacity to use digital technology. The large variations in CIL proficiency within and across the ICILS countries suggest it is naive to expect young people to develop CIL in the absence of coherent learning programs. Findings also indicate that system- and school-level planning needs to focus on increasing teacher expertise in using ICT for pedagogical

purposes if such programs are to have the desired effect. The report furthermore presents an empirically derived scale and description of CIL learning that educational stakeholders can reference when deliberating about CIL education and use to monitor change in CIL over time.

Universal Access in Human-Computer Interaction. Design Approaches and Supporting Technologies Margherita Antona,Constantine Stephanidis,2020-07-10 This two-volume set of LNCS 12188 and 12189 constitutes the refereed proceedings of the 14th International Conference on Universal Access in Human-Computer Interaction, UAHCI 2020, held as part of the 22nd International Conference, HCI International 2020, which took place in Copenhagen, Denmark, in July 2020. The conference was held virtually due to the COVID-19 pandemic. The total of 1439 papers and 238 posters have been accepted for publication in the HCII 2020 proceedings from a total of 6326 submissions. UAHCI 2020 includes a total of 80 regular papers which are organized in topical sections named: Design for All Theory, Methods and Practice; User Interfaces and Interaction Techniques for Universal Access; Web Accessibility; Virtual and Augmented Reality for Universal Access; Robots in Universal Access; Technologies for Autism Spectrum Disorders; Technologies for Deaf Users; Universal Access to Learning and Education; Social Media, Digital Services, eInclusion and Innovation; Intelligent Assistive Environments.

Fundamentals of Nursing Care Marti Burton,David Smith,Linda J. May Ludwig,2018-10-30 Text Think like a Nurse Connection boxes illustrate how to apply theory to practice in key areas: Clinicals - A&P - Patient Teaching - Real World Nursing - People & Places - Knowledge - Lab/Diagnoses - Delegation/Supervision. Step-by-step procedures for over 120 skills make every concept easy to grasp. Post Conference boxes follow each skill, summarizing what students have learned and describing the possible reactions of both patient and nurse. Critical-thinking questions hone skills and thought processes for clinical success. Geriatric content throughout familiarizes students with this patient demographic. Davis Edge Over 2,000 NCLEX-style questions that align to Fundamentals of Nursing Care with page references Comprehensive rationales for both correct and incorrect answers to promote in-depth understanding Test-taking tips to prepare students for exams and build their confidence All different question types, including those that students struggle with like alternate-format, select all that apply (SATA), prioritization and ordered response Responsive design for access from laptop, tablet, and mobile devices

Outcome Measures for Effective Teamwork in Inpatient Care Melony E. Sorbero,2008 This report presents the final results from the teamwork outcome measures study. The purpose of this study was to identify a set of measures for each of three clinical areas. The measures would represent important patient safety or quality-of-care outcomes that can be expected to be affected by changes in health care teamwork effectiveness (referred to here as teamwork-relevant outcomes). This work addresses one step in the process of moving from teamwork training to teamwork practices that improve outcomes of care¿identifying outcomes that are most likely to be affected as teamwork practices improve in an implementing organization. Study components discussed in the report include the methods used for selecting and testing candidate measures, findings from a literature search that informed the measure selection process, the measures identified by clinical experts as representing teamwork sensitive outcomes, and results of the testing of a subset of these measures on the administrative data of the DoD health system.

Medical Surgical Nursing Care Karen M. Burke,Priscilla T LeMone,Elaine Mohn-Brown,Linda Eby,2013-10-03 Medical Surgical Nursing Care 3e has an even stronger focus on the professional Practical nursing program and is a key component in the LPN/LVN series at Pearson. It has a clear and readable writing style, it provides a strong foundation for understanding common disorders that affect adults. Opening units of the book focus on concepts, issues, and foundational knowledge. The units that follow focus on common diseases and disorders organized by body system. Each unit begins with review of the system's structure and function, nursing assessment, and commonly used diagnostic tests for disorders of that system. To facilitate learning, disorder-specific content follows a consistent pattern, beginning with discussion about the disorder, its risk factors, causes, effects on the body, manifestations, and possible complications. Because nurses are integral members of the healthcare team, interdisciplinary care sections include nursing implications for medications, nutritional therapies, surgery and other treatments, including complementary therapies. Each disorder concludes with nursing care, including priorities of care, health promotion, assessment, nursing care measures, and a section addressing continuity of care to home or the community. This text provides more depth in common disease processes, their treatment, and related nursing care. Although organized by body systems for clarity, the book retains a nursing focus throughout. Rationales are provided for nursing interventions to help the student understand the "why," not just the "what."

Implementing the Framework for Teaching in Enhancing Professional Practice Charlotte Danielson,Darlene Axtell,Bernadette Cleland,Candi McKay,2009 With its clear definition of the elements of good teaching, the framework for teaching, designed by Charlotte Danielson, is used by educators around the world for professional preparation, recruitment and hiring, mentoring and induction, professional development, and performance appraisal. This action tool can guide you in applying the framework in your own classroom or school and strengthening your professional practice with proven strategies. Broken down into the different domains, components, and elements of the framework, each section provides examples of best practices for the higher levels of performance, followed by a variety of tools that teachers can adapt and incorporate into their instruction. Self-assessments at the domain and component levels help you analyze your own practice. And the activities for each element can be used in your planning or with students, helping you develop the techniques that strengthen your practice. Whether you use the tools on your own or with colleagues in a study group or professional learning community, implementing the framework for teaching can help you become a better teacher. Charlotte Danielson is also founder of the Danielson Group.

Remediation in Medical Education Adina Kalet,Calvin L. Chou,2013-11-26 Remediation in medical education is the act of facilitating a correction for trainees who started out on the journey toward becoming excellent physicians but have moved off course. This book offers an evidence-based and practical approach to the identification and remediation of medical trainees who are unable to perform to standards. As assessment of clinical competence and professionalism has become more sophisticated and ubiquitous, medical educators increasingly face the challenge of implementing effective and respectful means to work with trainees who do not yet meet expectations of the profession and society. Remediation in Medical Education: A Mid-Course Correction describes practical stepwise approaches to remediate struggling learners in fundamental medical competencies; discusses methods used to define competencies and the science underlying the fundamental shift in the delivery and assessment of medical education; explores themes that provide context for remediation, including professional identity formation and moral reasoning, verbal and nonverbal learning disabilities, attention deficit disorders in high-functioning individuals, diversity, and educational and psychiatric topics; and reviews system issues involved in remediation, including policy and leadership challenges and faculty development.

Higher Education and Lifelong Learning Hans Schuetze,Maria Slowey,2013-01-11 Responding to the emerging needs of lifelong learners arguably represents one of the most fundamental challenges facing higher education systems of the countries of the developing world. At the start of the new century the concept of Lifelong Learning may indeed be counted as one of the the key organising concepts underlying public policy in many countries. The interpretation of the concept, however, remains highly contested. This timely book throws new light on the dramatic changes taking place in higher education through an exploration of the participation of non-traditional students in ten countries. Among others, the following areas are explored: * the complex reality behind the statistics on participation in higher education in five European countries (Austria, Germany, Ireland, Sweden and the United Kingdom), North America, Japan, Australia and New Zealand * contrasting perceptions of lifelong learning * changing patterns of participation by adults in higher education * national and institutional policies and innovations to accommodate non-traditional students and new forms of study * conclusions for policy, practice and research

Higher Education for Lifelong Learners will be of interest to academics, researchers and students involved with higher education, lifelong learning, and comparative education as well as policy makers, educational managers and administrators. The contributions reveal a remarkable transformation in the student body and in the way learners pursue their studies, highlighting the international impact of increasing marketisation and differentiation on the nature of the higher education accessible to potential lifelong learners.

IoT Technologies for HealthCare Rossitza Goleva,Nuno Ricardo da Cruz Garcia,Ivan Miguel Pires,2021-02-20 This book constitutes the proceedings of the 7th International Conference on Internet of Things (IoT) Technologies for HealthCare, HealthyIoT 2020, held in Viana do Castello, Portugal, in December 2020. Due to Covid-19 pandemic the conference was held virtually. The IoT as a set of existing and emerging technologies, notions and services can provide many solutions to delivery of electronic healthcare, patient care, and medical data management. The 12 revised full papers presented were carefully reviewed and selected from 27 submissions. The papers are grouped in topics on physical data tracking wearables, applications and systems; psychological data tracking wearables, applications and systems; scenarios and security.

Advances in Human-computer Interaction H. Rex Hartson,Deborah Hix,1988 The author uses this series to try to fight the information overload experienced during the 1980s and 1990s. Its concentration is on surveying important areas, providing an overview of recent advancements, and surveying interesting specific design or development projects to show how the state of the art is being carried out. Essays by specialists that speculate on important trends in the field, are also included.
