Social - Local - Mobile Gerrit Heinemann,Christian Gaiser,2014-11-20 In the future, shopping will be greatly influenced by a combination of localization issues, mobile internet at the point of sale, and use of social networks. This book focuses on the 'SoLoMo synergies' that arise from this paradigm shift in future shopping, which also promises new and effective marketing options for traditional retailers. It also reflects the current status of research and business practice, analyzing the basic factors of SoLoMo in detail. The importance of Location-based Services (LBS) is elaborated and analyzed in an empirical study using a market based case of kaufDA - a leading German online shopping network. The evidence shows that customers see LBS as an attractive tool and are prepared to change their buying behavior. Though LBS is still in its early stages and its professional longevity remains to be seen, it also promises tremendous potential for the future.

Pedal Power Roy Sinclair,2014-08-15 An inspirational travel book describing stunning bicycle journeys around the world. In a bold attempt to combat inevitable dotage, Roy Sinclair set off to discover the world (more correctly, selected parts of it) by pedal power. In doing so, frequently accompanied by his Japanese partner, he experienced people of different cultures and languages in a way that might otherwise have been impossible. Inspired by a former New Zealand prime minister, he set off to ride the length of Japan (the first New Zealander to do so) in an effort to have a World Peace Bell gifted to his country. A meeting with a Wanaka winemaker, whose great grandfather held an early record for the Lands End to John o'Groats journey on a penny farthing, had Roy and his partner setting off to pedal the length of Britain. And on the whim of a pub yarn, he pedalled off to a famous monastery in the French Chartreuse mountains to discover the source of a centuries-old liver-punishing liqueur. Sometimes opinionated and more often unashamedly biased, his world discovered by pedal power is one we all will want to journey through. His compelling stories of overseas bicycle rides are woven amongst those of the country he loves most - New Zealand. Includes 20 maps of the routes travelled.

Penetration Testing with BackBox Stefan Umit Uygur,2014-02-20 This practical book outlines the steps needed to perform penetration testing using BackBox. It explains common penetration testing scenarios and gives practical explanations applicable to a real-world setting. This book is written primarily for security experts and system administrators who have an intermediate Linux capability. However, because of the simplicity and user-friendly design, it is also suitable for beginners looking to understand the principle steps of penetration testing.
