*Housing Shock* Hearne, Rory,2020-06-03 The unprecedented housing and homelessness crisis in Ireland is having profound impacts on Generation Rent, the wellbeing of children, worsening wider inequality and threatening the economy. Hearne contextualises the Irish housing crisis within the broader global housing situation by examining the origins of the crisis in terms of austerity, marketisation and the new era of financialisation, where global investors are making housing unaffordable and turning it into an asset for the wealthy. He brings to the fore the perspectives of those most affected, new housing activists and protesters whilst providing innovative global solutions for a new vision for affordable, sustainable homes for all.

History of Technology Volume 28 Ian Inkster,2009-03-31 Technical standards have received increasing attention in recent years from historians of science and technology, management theorists and economists. Often, inquiry focuses on the emergence of stability, technical closure and culturally

uniform modernity. Yet current literature also emphasizes the durability of localism, heterogeneity and user choice. This collection investigates the apparent tension between these trends using case studies from across the nineteenth and twentieth centuries. The History of Technology addresses tensions between material standards and process standards, explores the distinction between specifying standards and achieving convergence towards them, and examines some of the discontents generated by the reach of standards into 'everyday life'. Includes the Special Issue By whose standards? Standardization, stability and uniformity in the history of information and electrical technologies

**What's Wrong With My Mouse?** Jacqueline N. Crawley,2007-05-11 Dr. Jacqueline N. Crawley, author of the First and Second Editions of What's Wrong with My Mouse? Behavioral Phenotyping of Transgenic and Knockout Mice,continues to field calls and e-mails from molecular geneticists who ask:

how do I run behavioral assays to find out what's wrong with my mouse? Turn to What's Wrong with My Mouse? to discover the wealth of mouse behavioral tasks and to get the guidance you need to select the best methods and necessary controls. Chapters are organized by behavioral domain, including measurements of general health, motor functions, sensory abilities, learning and memory, feeding and drinking, reproductive, social, emotional, and reward behaviors in mutant mice. Throughout the chapters, new behavioral tasks and new research discoveries have been added, bringing the Second Edition up to date with the latest science. In addition, the Second Edition includes two new chapters: Neurodevelopment and Neurodegeneration discusses mouse behavioral tasks relevant to neurodevelopmental diseases, such as mental retardation and autism, and to neurodegenerative diseases, such as Alzheimers, Parkinsons, Huntingtons, and amyotrophic lateral sclerosis. Putting It All Together recommends strategies for optimizing a battery of behavioral phenotyping tests to address your specific hypotheses about gene functions. The final chapter, The Next Generation, examines new and emerging technologies. Throughout the book, the use of

behavioral testing equipment is illustrated with photographs, diagrams, and representative data. Examples of behavioral tasks successfully applied to transgenic and knockout mouse models are provided, as well as references to the primary literature and step-by-step methods protocols. These features, along with a comprehensive index, listings of database and vendor websites, and an extensive list of references, make this book a valuable and practical resource for students and researchers.

*Swing, that Modern Sound* Kenneth J. Bindas, 2001 How America invented swing, how swing energized America. It was for stage bands, for dancing, and for a jiving mood of letting go. Throughout the nation swing resounded with the spirit of good times. The swing era was America's segue into modernity. But this pop genre, for a decade America's favorite, arose during the worst of times, the Great Depression. From its peak in the 1930s until bebop, rhythm and blues, and country swamped it after World War II, swing defined an American generation and measured America's musical heartbeat. In its heyday swing reached a mass audience of very disparate individuals and united them. They

perceived in the tempers and tempos of swing the very definition of modernity. What fed the music? And, in turn, what did the music feed? What social structures encouraged swing's creation, acceptance, and popularity? This book analyzes the cultural and historical significance of swing and tells how and why swing achieved its audience, unified its fans, defined its generation, and, after World War II, fell into decline. As it examines the role of race, class, and gender in the creation of this music, this book tells how the genre came to symbolize the modernist revolution taking place in America. The author was associate professor of history at Kent State University, Trumbull Campus, in Warren, Ohio, and the author of *All of This Music Belongs to the Nation: The WPA's Federal Music Project and American Society, 1935-1939*.

**Discipline and Punish** Michel Foucault,2012-04-18 A brilliant work from the most influential philosopher since Sartre. In this indispensable work, a brilliant thinker suggests that such vaunted

reforms as the abolition of torture and the emergence of the modern penitentiary have merely shifted the focus of punishment from the prisoner's body to his soul.

**Danger and Risk as Challenges for HRM Benjamin Bader,Tassilo Schuster,Michael**

Dickmann,2020-12-30 Questions related to managing people in hostile environments have become more central on the agenda of business leaders and HR professionals in multinational corporations (MNCs). This is due to developments such as the increase of terrorism or the political instability in many regions. In consequence, research on the role of HR in hostile environments has increased, though it can still be considered in its early stages. **Danger and Risk as Challenges for HRM: Managing People in Hostile Environments** adds to this emerging field of research by investigating the management of people in hostile environments from conceptual as well as empirical perspectives. It delivers an essential and comprehensive overview and gives deep insight into this highly relevant topic from leading authors in the field. This book will be of great value to scholars and researchers interested in the role of human resource management (HRM) in hostile environments, people

management in companies in conflict-affected areas and to those interested in new grounds in HR Research. The chapters in this book were originally published as a special issue of the International Journal of Human Resource Management.

Her Own Worth Eerika Koskinen-Koivisto, 2014 In this study, I examine the life narrative of a female factory labourer, Elsa Koskinen (née Kiikkala, born in 1927). I analyze her account of her experiences related to work, class and gender because I seek to gain a better understanding of how changes in these aspects of life influenced the ways in which she saw her own worth at the time of the interviews and how she constructed her subjectivity. Elsa's life touches upon many of the core aspects of 20th-century social change: changes in women's roles, the entrance of middle- class women into working life, women's increasing participation in the public sphere, feminist movements, upward social mobility, the expansion of the middle class, the growth of welfare and the appearance of new technologies. What kind of trajectory did Elsa take in her life? What are the key narratives of her life? How does her narrative negotiate the shifting cultural ideals of the 20th century? A life story, a

retrospective evaluation of a life lived, is one means of constructing continuity and dealing with the changes that have affected one's life, identity and subjectivity. In narrating one's life, the narrator produces many different versions of her/him self in relation to other people and to the world. These dialogic selves and their relations to others may manifest internal contradictions. Contradictions may also occur in relation to other narratives and normative discourses. Both of these levels, subjective meaning making and the negotiation of social ideals and collective norms, are embedded in life narratives. My interest in this study is in the ways in which gender and class intersect with paid labour in the life of an ordinary female factory worker. I approach gender, class and work from both an experiential and a relational perspective, considering the power of social relationships and subject formations that shape individual life at the micro-level. In her narratives Elsa discusses ambivalence related to gendered ideals, social class, and especially the phenomenon of social climbing as well as technological advance. I approach Elsa's life and narratives ethnographically. The research material was acquired in a long-standing interview process and the analysis is based on reflexivity of the

dialogic knowledge production and contextualization of Elsa's experiences. In other words I analyze Elsa's narratives in their situational but also socio-cultural and historical contexts. Specific episodes in one's life and other significant events constitute smaller narrative entities, which I call micro-narratives. The analysis of micro-narratives, key dialogues and cultural ideals embedded in the interview dialogues offers perspectives on experiences of social change and the narrator's sense of self.

Guide for the Care and Use of Laboratory Animals National Research Council, Division on Earth and Life Studies, Institute for Laboratory Animal Research, Committee for the Update of the Guide for the Care and Use of Laboratory Animals, 2011-01-27 A respected resource for decades, the Guide for the Care and Use of Laboratory Animals has been updated by a committee of experts, taking into consideration input from the scientific and laboratory animal communities and the public at large. The Guide incorporates new scientific information on common laboratory animals, including aquatic species, and includes extensive references. It is organized around major components of animal use: Key concepts of animal care and use. The Guide sets the framework for the humane care and use of

laboratory animals. Animal care and use program. The Guide discusses the concept of a broad Program of Animal Care and Use, including roles and responsibilities of the Institutional Official, Attending Veterinarian and the Institutional Animal Care and Use Committee. Animal environment, husbandry, and management. A chapter on this topic is now divided into sections on terrestrial and aquatic animals and provides recommendations for housing and environment, husbandry, behavioral and population management, and more. Veterinary care. The Guide discusses veterinary care and the responsibilities of the Attending Veterinarian. It includes recommendations on animal procurement and transportation, preventive medicine (including animal biosecurity), and clinical care and management. The Guide addresses distress and pain recognition and relief, and issues surrounding euthanasia. Physical plant. The Guide identifies design issues, providing construction guidelines for functional areas; considerations such as drainage, vibration and noise control, and environmental monitoring; and specialized facilities for animal housing and research needs. The Guide for the Care and Use of Laboratory Animals provides a framework for the judgments required in the management of animal

facilities. This updated and expanded resource of proven value will be important to scientists and researchers, veterinarians, animal care personnel, facilities managers, institutional administrators, policy makers involved in research issues, and animal welfare advocates.

What is Colonialism? Patrick Colm Hogan, 2023-11-30 What is Colonialism? develops a clear and rigorous account of what colonialism is and how it works. It draws on and synthesizes recent work in cognitive science, affective science, and social psychology, along with Marxism and related forms of analysis. Hogan begins with some fundamental conceptual distinctions, such as the degree to which a group shares beliefs, dispositions, and skills versus the degree to which they share identification with a category. Building on these distinctions, he defines colonialism in terms of political, economic, and cultural autonomy, clarifying the nature of culture and autonomy particularly. He goes on to articulate an invaluable systematic account of the varieties of colonialism. The final chapters outline the motives of imperialists, differentiating these from their ideological rationalizations, and sketching the harms caused by colonialism. The book concludes by considering when, or if, one can achieve a genuinely postcolonial condition. Hogan illustrates these analyses by examining influential literary works—by European writers (such as Joseph Conrad) and by non-Europeans (such as Athol Fugard, Kamala Markandaya, and Wole Soyinka). This accessible and informative volume is the ideal resource for

students and scholars interested in colonialism and empire.

**My Vancouver Dance History** Peter Dickinson,2020-08-20 In the past decade, Vancouver dance has received tremendous acclaim nationally and internationally, as witnessed by the success of

choreographer Crystal Pite and a rejuvenated Ballet BC. But this is only part of a vibrant and diverse story of contemporary movement practices in the city. In *My Vancouver Dance History* Peter Dickinson crafts an embodied narrative that focuses on his critical and creative collaborations with nine Vancouver-based dance artists and companies. Mixing interview excerpts with fieldwork descriptions of studio research and performance analysis, Dickinson draws on ten years of close observation to delve into the individual histories of select members of this community, while also relating the cumulative story of Vancouver dance production and performance as it has unfolded in the past decade. The voices of other invested participants interpolate this rich history, and chapters are interspersed with a series of movement intervals that reflect key moments in Dickinson's history as a spectator, scholar, and collaborator. In innovative ways, Dickinson suggests that when we pay attention to the larger social topography of dance practice - the sites that give rise to it, the labour that goes into it, and the professional friendships it engenders - we can properly understand dance's contributions to civic life.
