Multi-Processor System-on-Chip 1 Liliana Andrade, Frederic Rousseau, 2021-05-11 A Multi-Processor System-on-Chip (MPSoC) is the key component for complex applications. These applications put huge pressure on memory, communication devices and computing units. This book, presented in two volumes - Architectures and Applications - therefore celebrates the 20th anniversary of MPSoC, an interdisciplinary forum that focuses on multi-core and multi-processor hardware and software systems. It is this interdisciplinarity which has led to MPSoC bringing together experts in these fields from around the world, over the last two decades. Multi-Processor System-on-Chip 1 covers the key components of MPSoC: processors, memory, interconnect and interfaces. It describes advance features of these components and technologies to build efficient MPSoC architectures. All the main components are detailed: use of memory and their technology, communication support and consistency, and specific processor architectures for general purposes or for dedicated applications.

Local Governance in Multi-Layered Systems Matteo Nicolini,Alice Valdesalici,2023-12-12 The book provides a comprehensive analysis of local government in federations. It fills the gap in current legal research and positions local government in federal studies through the lenses of comparative law, adopting a more nuanced approach to local government. The book considers the shortcomings between the black-letter constitution and its operational rules. Whether (and how) the regime of local government is implemented is more relevant than its formal-but-ineffective recognition. The comparative survey discloses the variety local institutions take in different federal contexts. Divided into three parts, the book comprises chapters investigating local government in systems that, to various degrees, have been examined and classified as federal. Scholars throughout the world have examined the federal-local connection in aggregative federations, (the USA, Canada, Switzerland, Germany, Australia, and Austria), devolutionary ones (Belgium, Bosnia Herzegovina, Italy, Spain, the UK, Argentina, Brazil, Mexico, and the Russian Federation), as well as in federations beyond the West, where federalism-as-a-colonial-legacy has undergone a process of reinvention affecting the federal-local connection (South Africa, Ethiopia, India, Nigeria, Comoros, Democratic Republic of Congo, Nepal, Palau, Federated States of Micronesia; St. Kitts and Nevis; United Arab Emirates; and Pakistan).
