John Edwards

Body Talk FPA Health, Merri Collier, 1994

*Multilingual Corpora in Teaching and Research* Simon Botley, Tony McEnery, Andrew Wilson, 2000 The use of corpus data in languages other than English has become increasingly important in recent years, and as a result has given rise to a growing body of research and applications in multilingual corpus linguistics. This book collects together a selection of papers which have made use of multilingual corpus data in language teaching, as well as linguistic research. The corpora described in this book include data in a variety of languages, including Swedish, Chinese, German and Italian, and the contributors include well known scholars in the fields of corpus linguistics and corpus-based language teaching.

*Multiword expressions* Manfred Sailer, Stella Markantonatou, Multiword expressions (MWEs) are a challenge for both the natural language applications and the linguistic theory because they often defy the application of the machinery developed for free combinations where the default is that the meaning of an utterance can be predicted from its structure. There is a rich body of primarily descriptive work on MWEs for many European languages but comparative work is little. The volume brings together MWE experts to explore the benefits of a multilingual perspective on MWEs. The ten contributions in this volume look at MWEs in Bulgarian, English, French, German, Maori, Modern Greek, Romanian, Serbian, and Spanish. They discuss prominent issues in MWE research such as classification of MWEs, their formal grammatical modeling, and the description of individual MWE types from the point of view of different theoretical frameworks, such as Dependency Grammar, Generative Grammar, Head-driven Phrase Structure Grammar, Lexical Functional Grammar, Lexicon Grammar.

Foreign Language and Mother Tongue Istvan Kecskes, Tunde Papp, 2000-06-01 This is the first book that discusses the effect of foreign language learning on first language processing. The authors argue that multilingual development is a dynamic and cumulative process characterized by transfer of different nature, and results in a common underlying conceptual base with two or more language channels that constantly interact with each other. Language representation and processing are discussed from a cognitive-pragmatic rather than a lexical-syntactic perspective. This required the review of several crucial issues of L2 acquisition, such as transfer, vocabulary development, conceptual fluency, and pragmatic skills. The authors also reviewed a large body of literature touching on cognitive psychology, linguistics, psycholinguistics, SLA, philosophy, and education in order to explain multilingual development and the positive effect of foreign language learning on the first language. An important read for linguists and language educators alike, this volume: \* attempts to explain multilingual development from a cognitive-pragmatic perspective, \* argues that foreign language learning has a positive effect on the development and use of mother tongue skills, \* relies on research findings of several different disciplines, \* builds on the results of quantitative research conducted by the authors, and touches on a wide range of literature.

**Language, Body, and Health** Paul McPherron, Vaidehi Ramanathan, 2011-11-30 This edited book addresses ways in which 'bodies' conceived broadly – get languaged, and ways in which ideas of 'normalcy' and 'normal' bodies are held in place and reproduced. The articles show how it is through this medium that people with ailments or 'unusual' bodies get positioned and slotted in certain ways. The present volume represents a departure from other works in at least two ways. First, it brings in discourses around bodies per se into language-related research, a realm that previous research has not directly engaged. Second, it ushers in discussions about bodies by critically addressing the language by which experiences around bodily breakdowns and ailments occur. Calling attention to a host of discourses – biomedical, societal, poststructuralist – and drawing on a variety of disciplinary perspectives, critical theories, ethnographically gathered materials, and extant data, the chapters pierce the general veil of silence that we have collectively drawn regarding how some of our most intimate body (dis)functions impact our everyday living and sense of normalcy.

*Spaces of Multilingualism* Robert Blackwood, Unn Røyneland, 2021-10-17 This innovative collection explores critical issues in understanding multilingualism as a defining dimension of identity creation and negotiation in contemporary social life. Reinforcing interdisciplinary conversations on these themes, each chapter is co-authored by two different researchers, often those who have not written together before. The combined effect is a volume showcasing unique and dynamic perspectives on such topics as rethinking of language policy, testing of language rights, language pedagogy, meaning-making, and activism in the linguistic landscape. The book explores multilingualism through the lenses of spaces and policies as embodied in Elizabeth Lanza's body of work in the field, with a focus on the latest research on linguistic landscapes in diverse settings. Taken together, the book offers a window into better understanding issues around processes of change in and of languages and societies. This ground breaking volume will be of particular interest to students and scholars in multilingualism, applied linguistics, and sociolinguistics.

**Multilingual Law** Colin D Robertson, 2016-06-17 This book introduces and explores the concept of multilingual law. Providing an overview as to what is 'multilingual law', the study establishes a new discourse based on this concept, which has hitherto lacked recognition for reasons of complexity and multidisciplinary. The need for such a discourse now exists and is becoming urgent in view of the progress being made towards European integration and the legal and factual foundation for it in multilingualism and multilingual legislation. Covering different types of multilingual legal orders and their distinguishing features, as well as the basic structure of legal systems, the author studies policy formation, drafting, translation, revision, terminology and computer tools in connection with the legislative and judicial processes. Bringing together a range of diverse legal and linguistic ideas under one roof, this book is of importance to legal-linguists, drafters and translators, as well as students and scholars of legal linguistics, legal translation and revision.

*The Invention of Multilingualism* David Gramling, 2021-06-17 Explores what multilingualism means today, in a historical moment when it is under intense discursive and technological pressure.

*Figures of Transcontinental Multilingualism* K. Alfons Knauth, Subha Chakraborty Dasgupta, 2018-02-22 This volume investigates outstanding figures and configurations of literary and cultural multilingualism on a transcontinental and on a global scale. Its first focus is on the both subcontinental and transcontinental Indies, on the oxymoronic figure of East West India and on the stirring 'relations through words' in Luso-Afro-Indian, Anglo-Indian, and Indo-European areas. The second focus is on the cross-cultural configuration of East and West shaped by some striking Sino-European and Sino-American events in early modern and modern times. A third issue concerns the glocal and globoglot 'people of paper' in a contemporary Californian town, and, lastly, the all-embracing, all-devouring ouroboros and other multi-lingual ophidians. (Series: poethik polyglott, Vol. 4) [Subject: Linguistics, Multilingualism]

Multilingualism Anat Stavans, Charlotte Hoffmann, 2015-01-15 Using a multidisciplinary approach, this book explores how multilingualism is shaped by a variety of factors such as globalisation and migration. It examines language use in a range of cultural contexts, exploring how children and adults become multilingual and the impact of multilingualism on society and identity.

**Joyce, Multilingualism, and the Ethics of Reading** Boriana Alexandrova, 2020-09-16 What if our notions of the nation as a site of belonging, the home as a safe place, or the mother tongue as a means to fluent comprehension did not apply? What if fluency were a hindrance, whilst our differences and contradictions held the keys to radical new ways of knowing? Taking inspiration from the practice of language learning and translation, this book explores the extraordinary creative possibilities, politics, and ethics of adopting a multilingual approach to reading. Its case study, James Joyce's *Finnegans Wake* (1939), is a text in equal measures exhilarating and exasperating: an unhinged portrait of European modernist debates on transculturalism and globalisation, here considered on the backdrop of current discourses on migration, race, gender, and neurodiversity. This book

offers a fresh perspective on the illuminating, if perplexing, work of a beloved European modernist, whilst posing questions far beyond Joyce: on negotiating difference in an increasingly globalised world; on braving the difficulty of relating across languages and cultures; and ultimately on imagining possible futures where multilingual literature can empower us to read, relate, and conceptualise differently.

**The Multilingual Subject** Claire Kramsch, 2013-01-10 By drawing on multiple examples of real-world language learning situations, this book explores the subjective aspects of the language learning experience.

*Multilingual Subjects* Daniel DeWispelare, 2017-05-08 Daniel DeWispelare documents how many varieties of English became sidelined as dialects as Standard English became dominant throughout an ever-expanding English-speaking world, while asserting the importance of both multilingualism and dialect writing to eighteenth-century anglophone culture.

**Multilingualism** John Edwards, 2002-11 By looking at the effect of language difference, Edwards examines the interaction of language with nationalism, politics, history, identity and education. This book unpicks this complexity and creates a multidisciplinary overview.

*Translanguaging in Science Education* Anders Jakobsson, Pia Nygård Larsson, Annika Karlsson, 2022-02-23 This edited volume explores diverse translanguaging practices in multilingual science classrooms in Hong Kong, Lebanon, Luxembourg, South Africa, Sweden and the United States. It presents novel opportunities for using students' home, first or minority languages as meaning-making tools in science education. It also invites to explore the use of language resources and other multimodal resources, such as gestures and body language. In addition, it discusses and problematizes contingent hindrances and obstacles that may arise from these practices within various contexts around the world. This includes reviewing different theoretical starting points that may be challenged by such an approach. These issues are explored from different perspectives and methodological focus, as well as in several educational contexts, including primary, middle, secondary levels, higher education, as well as in after-school programs for refugee teenagers. Within these contexts, the book highlights and shares a range of educational tools and activities in science education, such as teacher-led classroom-talk, language-focused teaching, teachers' use of meta-language, teachers' scaffolding strategies, small-group interactions, and computer-supported collaborative learning.

*Language Issues in Comparative Education II* Carol Benson, Kimmo Kosonen, 2021-01-25 This second volume of *Language Issues in Comparative Education*, following the tradition of the first, introduces the state of the field and calls attention to innovations described throughout. The chapters examine language-in-education policy change, describe implementational activities, and present strategic frameworks for research and advocacy.

*The Handbook of the Neuroscience of Multilingualism* John W. Schwieter, 2021-12-28 The definitive guide to 21st century investigations of multilingual neuroscience The *Handbook of the Neuroscience of Multilingualism* provides a comprehensive survey of neurocognitive investigations of multiple-language speakers. Prominent scholar John W. Schwieter offers a unique collection of works from globally recognized researchers in neuroscience, psycholinguistics, neurobiology, psychology, neuroimaging, and others, to provide a multidisciplinary overview of relevant topics. Authoritative coverage of state-of-the-art research provides readers with fundamental knowledge of significant theories and methods, language impairments and disorders, and neural representations, functions, and processes of the multilingual brain. Focusing on up-to-date theoretical and experimental research, this timely handbook explores new directions of study and examines significant findings in the rapidly evolving field of multilingual neuroscience. Discussions on the bilingual advantage debate, recovery and rehabilitation patterns in multilingual aphasia, and the neurocognitive effects of multilingualism throughout the lifespan allow informed investigation of contemporary issues. Presents the first handbook-length examination of the neuroscience and neurolinguistics of multilingualism Demonstrates how neuroscience and multilingualism intersect several areas of research, such as neurobiology and experimental psychology Includes works from prominent international scholars and researchers to provide

global perspective Reflects cutting-edge research and promising areas of future study in the dynamic field of multilingual neuroscience The Handbook of the Neuroscience of Multilingualism is an invaluable resource for researchers and scholars in areas including multilingualism, psycholinguistics, second language acquisition, and cognitive science. This versatile work is also an indispensable addition to the classroom, providing advanced undergraduate and graduate students a thorough overview of the field.

**Education and Migration** Prue Holmes, Richard Fay, Jane Andrews, 2020-06-04 From an international, research-led perspective, this book explores how languages are foregrounded in education in different countries and educational sectors, and among different groups of people in contexts of migration. It is concerned with the movement of people and their languages as they migrate across borders, and as languages—and their speakers—are under threat, pressure and pain, even to the point of being silenced. The contributors explore the multilingual possibilities and opportunities that these situations present. For example: where children's education is neglected because of displacement or exclusion; or in classrooms where teachers and educational leaders seek to meet the needs of all learners, including those who are new citizens, refugees, or asylum seekers. Together, the findings and conclusions emerging from these studies open up a timely space for interdisciplinary, inter-practitioner, and comparative researcher dialogue concerning languages and intercultural education in times of migration. Originating from an Arts and Humanities Research Council funded project Researching multilingually at the borders of language, the body, law and the state, this book provides readers with a natural impetus for exploring how languages and their speakers create new imaginaries and new possibilities in educational contexts and communities, as people engage with one another in and through these languages. This book was originally published as a special issue of Language and Intercultural Communication.

**Accessing Multilingual Information Repositories** Cross-Language Evaluation Forum. Workshop, Carol Peters, 2006-09-20 This book constitutes the thoroughly refereed postproceedings of the 6th Workshop of the Cross-Language Evaluation Forum, CLEF 2005. The book presents 111 revised papers together with an introduction. Topical sections include multilingual textual document retrieval, cross-language and more, monolingual experiments, domain-specific information retrieval, interactive cross-language information retrieval, multiple language question answering, cross-language retrieval in image collections, cross-language speech retrieval, multilingual Web track, cross-language geographical retrieval, and evaluation issues.

Multilingualism in Mathematics Education in Africa Anthony A. Essien, 2023-12-14 This book brings together the first book collection of African research in mathematics education in multilingual societies and chronicles current research in different linguistic contexts across the African continent, (including Algeria, Namibia, Malawi, Morocco, Rwanda, South Africa) on issues of multilingualism in mathematics education, but more importantly, it foregrounds pertinent issues for future research. With many of the authors building on earlier path-breaking African research, the book is a unique contribution of careful thinking through how linguistic diversity and multilingualism manifest in ways that differ from one geopolitical context to another. This volume is an important contribution to the growing recognition of multilingualism as the global 'linguistic dispensation' in mathematics education. It is an invitation to how we might (as an international community where more and more multilingualism is the norm rather than an exception) pay more attention to the multilingual agency and capabilities of both students and teachers in order to better harness the epistemic potential of multiple languages in contexts of language diversity in mathematics education.
