Andrea Casale, Graziano Mario Valenti, Michele Calvano, Alfonso Oliva, Mia Tsiamis

Munich Joachim Fischer, 2005 Munich is a city that enjoys contradicting itself. Full of old-world charm, it is also one of the most modern and prosperous cities in Germany, one that combines natural splendor with bustling modern efficiency. It is also a beautiful city whose blend of ancient and modern architecture coexists with a lively contemporary cultural scene. Munich's cultural and economic importance has created an environment that fosters innovation. The evidence can be found in the many new post-modern architectural landmarks profiled in this authoritative little guide. Several of the city's newest and most interesting governmental, residential, and commercial buildings are covered. Color photographs and a site map are included for easy use by tourists and professionals alike. Joachim Fischer has run his own communication and design company since 1990. He edited Cool Restaurants Berlin (3-8238-4585-3) published by teNeues last fall. Another title in teNeues' authoritative architecture and design series Showcases buildings erected in Munich during the last few years by means of short profiles accompanied by color photographs and a site map 200 colour photos

From the Room to the City Bruno Krucker, Stephen Bates, Simon Burko, 2022-07-21 A novel presentation of the European city structure based on the example of Munich. Over a period of ten years, as part of their joint teaching at the Technical University of Munich, British architect Stephen Bates and his Zurich-based colleague Bruno Krucker explored, investigated, and analyzed the Bavarian capital in collaboration with their students. The resulting in-depth study evaluates the city's building history and ideas for its future in detail and is now being presented in the form of a highly attractive compendium. This richly illustrated book takes a close look at the European city in general, using Munich as an example. Its features are illuminated through a variety of means: atmospheric photographs, precise plans, drawings, images of models, and texts reveal the multilayered and complex character of the place with all its particularities, coincidences, and intentions. Like many other European cities, Munich has also been subject to incisive changes, whether through planned expansions, infrastructural developments, or war damage. This volume highlights how big plans and visions have often remained piecemeal, bound up with the paradigms of a generation, yet precisely because of this, they have proven to be unmistakable elements that shape Munich even until today. Moreover, individual new structures have resulted in continuous changes to the character of Munich's streets and demonstrate that the unfinished and unplanned are just as much a part of a city's beauty.

Architectural Guide, Germany Winfried Nerdinger, Cornelius Tafel, 1996-01-01 Whether it be Calatrava's elegant bridges in Seville or Barcelona, Peter Zumthor's beautiful thermal baths in Vals, Switzerland, Dominique Perrault's Bibliotheque Nationale in Paris, or Tadao Ando's museum building on the island Naoshima, these are just a few structures which have been celebrated around the world, making their architects household names. In the 20th century, we have seen striking buildings scatter our town-scapes, awe-inspiring skyscrapers shape our skylines, and beautiful bridges span our rivers. Growing numbers of people are becoming aware of the architectural environment around them and are taking an interest in the issues which are at the heart of our built surroundings. The Birkhauser Architectural Guides provide a handy overview to the greatest - and latest - buildings in the 20th century. Each volume is devoted to one country or group of countries, and the contents are organised by provinces and towns. Full addresses and information on the architect, the building itself, in addition to a general overview of the architectural scene in the given country are presented. Available are guides to Germany, Switzerland, the Netherlands, Benelux, France, Japan, and Spain at the special low price of \$18.

Germany's Other Modernity Leif Jerram, 2014-07-10 This book is about what it meant to build a city in Germany at the turn of the twentieth century. It explores the physical spaces and mental attitudes that shaped lives, restructured society and conditioned beliefs about the past and

expectations for the future in the crucial German generations that formed the young Reich, fought the Great War and experienced the Weimar Republic. Focusing on ordinary buildings and the way they shaped ordinary lives, this study shows how material space could influence the lives of citizens, from the ways the elderly slept at night to the economy of the city as a whole. It also shows how we integrate the spaces and places of our lives into our explanations of politics, culture and economics. It is aimed at those who want to understand urban modernity, Wilhelmine and Weimar Germany, the use of space in social policy and politics and the design of cities.

Pamphlet Architecture 28: Augmented Landscapes Mark Smout, Laura Allen, Smout Allen, 2007-04-19 SmoutAllen propose that the features of the landscape provide design opportunities for shaping and augmenting the landscape. The book presents five projects that respond to the way in which man has augmented landscape through architecture and infrastructure.

The Edifice Complex Deyan Sudjic, 2006-11-28 A provocative look at architecture-exceptionally intelligent and original (Jonathan Yardley, The Washington Post Book World) Deyan Sudjic-probably the most influential figure in architecture you've never heard of - argues that architecture, far from being auteur art, must be understood as a naked expression of power. From the grandiose projects of Stalin and Hitler to the theme park excess of today's presidential libraries, Sudjic goes behind the scenes of history's great manipulators of building propaganda-and exposes Rem Koolhaas, Frank Gehry, and other architects in a disturbing new light. This controversial book is essential reading for all those interested in the power of architecture-or the architecture of power. * A Washington Post Book World Best Book of the Year

Earth's Magnetism in the Age of Sail A. R. T. Jonkers, 2003-05-21 Jonkers explores these early efforts both for what they reveal about the history of science and navigation and as a unique record of the actual changes in the Earth's magnetic field. The result, a combination of science and history, will appeal to a broad audience of specialists as well as general readers.--BOOK JACKET.

Sverre Fehn Christian Norberg-Schulz, Gennaro Postiglione, 1997 This comprehensive monograph presents fifty projects from throughout the four decades of Fehn's career. Featured are such important works as the Archbishopric Museum of Hamar, the Glacier Museum in Fjaerland, and the Aukrust Museum in Alvdal, all in Norway. Also included are a number of houses and several competition projects, both built and unbuilt. Each of the works in this volume is illustrated with extensive photography, presentation drawings, and Fehn's signature sketches. Complementing the architectural projects are essays by Francesco Dal Co, Christian Norberg-Schulz, and Gennaro Postiglione, which present an analytic portrait of the architect's career, and an anthology of writings by Fehn and critics.

Radical Classicism David Watkin, 2006 Often described as Prince Charles's favorite architect, Quinlan Terry is at home in every traditional style, from Classical Greek to Roman, Gothic to Renaissance, and Baroque to Neo-classical. With intense new interest in classical design, there is a high demand for a compilation of Terry's work, a volume that showcases the ideas and creations of one of the world's most daring traditionalist designers. At the pinnacle of his career--this year's winner of the Driehaus Prize, classical architecture's highest honor--Quinlan Terry is one of the most celebrated practitioners of the form and also perhaps the most radical. Radical Classicism contains hundreds of lavish color illustrations and thirty of Terry's designs, including state rooms at #10 Downing Street, a library and residential building at Cambridge University, a cathedral in Essex, a church in Bishopsgate, four buildings in Williamsburg, Va., townhouses in London, and ten large country houses in England, Germany, and the U.S. Buildings featured include Juniper Hill in Buckinghamshire; Ionic Villa, Corinthian Villa, and Regency Villa in Regents Park, London; Abercrombie House in Kentucky; Latourette Farm, New Jersey; Highland Park House, Dallas, Texas.

Dubai, the City as Corporation Ahmed Kanna, 2011 The politics of space and culture in Dubai in the first decade of the twenty-first century.

Representing the State Wolfgang Sonne, 2003 Wolfgang Sonne examines the relationship between urban design and politics in five major capital

cities, all of which underwent comprehensive planning at the beginning of the twentieth century: Washington, Berlin, Canberra, New Delhi and the World Centre of Communication, a proposed international capital of peace. With more than 150 illustrations, this book explores the evolution of the ambitious urban design schemes of the period and the difficulty in integrating architecture with the political ideals it endeavours to represent. Book jacket.

The City Andrew Lees, 2015 *The City: A World History* tells the story of the rise and development of urban centers from ancient times to the twenty-first century. It begins with the establishment of the first cities in the Near East in the fourth millennium BCE, and goes on to examine urban growth in the Indus River Valley in India, as well as Egypt and areas that bordered the Mediterranean Sea. Athens, Alexandria, and Rome stand out both politically and culturally. With the fall of the Roman Empire in the West, European cities entered into a long period of waning and deterioration. But elsewhere, great cities—among them, Constantinople, Baghdad, Chang'an, and Tenochtitlán—thrived. In the late Middle Ages and the Early Modern period, urban growth resumed in Europe, giving rise to cities like Florence, Paris, and London. This urban growth also accelerated in parts of the world that came under European control, such as Philadelphia in the nascent United States. As the Industrial Revolution swept through in the nineteenth century, cities grew rapidly. Their expansion resulted in a slew of social problems and political disruptions, but it was accompanied by impressive measures designed to improve urban life. Meanwhile, colonial cities bore the imprint of European imperialism. Finally, the book turns to the years since 1914, guided by a few themes: the impact of war and revolution; urban reconstruction after 1945; migration out of many cities in the United States into growing suburbs; and the explosive growth of megacities in the developing world.

Mediterranean Culture John L. Myres, 2014-01-30 Originally published in 1943, this book presents the content of the Frazer Lecture in Social Anthropology for that year, which was delivered by John L. Myres at Cambridge University. This book will be of value to anyone with an interest in anthropology and Mediterranean culture.

The Central Railroad of New Jersey Gustav Kobbé, 2022-10-27 This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Writing Spaces C. Greig Crysler, 2003-09-02 *Writing Spaces* examines some of the most important discourses in spatial theory of the last four decades, and considers their impact within the built environment disciplines. The book will be a key resource for courses on critical theory in architecture, urban studies and geography, at both the graduate and advanced undergraduate level.

Twists, Tilings, and Tessellations Robert J. Lang, 2017-12-22 *Twists, Tilings, and Tessellation* describes the underlying principles and mathematics of the broad and exciting field of abstract and mathematical origami, most notably the field of origami tessellations. It contains folding instructions, underlying principles, mathematical concepts, and many beautiful photos of the latest work in this fast-expanding field.

Beaches, Ruins, Resorts Waleed Hazbun, 2008 Despite being viewed as a dangerous region to visit, leisure travel across the Middle East has thrived even in the post-9/11 era. In *Beaches, Ruins, Resorts*, Waleed Hazbun investigates this overlooked industry to show how tourism is shaping the economic development and international relations of the region in dramatic ways. Hazbun tells the new and surprising story of how the draw of

glittering beaches, luxury hotels and resorts, and sightseeing at ancient ruins impact the Arab world--promoting both economic globalization and political authoritarianism.
