Universal Design 2016: Learning from the Past, Designing for the Future H. Petrie, J. Darzentas, T. Walsh, 2016-09-15 Universal Design is the term used to describe the design of products and environments which can be used by all people, to the greatest extent possible, without the need for adaptation or specialized design. It is not a euphemism for 'designs for people with a disability', but really is about designing to include all people, regardless of their age, ability, cultural background or status in life. However it remains the case that many designers and developers fail to understand the need for universal design and lack the skills needed to implement it. This book presents papers from the 3rd International Conference on Universal Design (UD 2016), held in York, UK, in August 2016. The theme of the conference was: learning from the past, designing for the future, and it aimed to bring together policymakers, practitioners and researchers interested in the different strands of universal design to exchange ideas and best practice, review some of the developments in universal design from the last 20 years, and formulate strategies for taking the concept of universal design forward into the future. The book is divided into two sections. Section 1: About Universal Design, and Section 2: Universal Design In Practice. The book will be of interest to all those whose work involves design, from the built environment and tangible products to communication, services and systems.

Choosing and Using Audio and Music Software Mike Collins, 2004-03-08 This comprehensive reference features all the major audio software: SONAR XL; Cubase SX; Logic Audio Platinum; Digital Performer; Nuendo; Pro Tools; Peak; Spark XL; SonicWorx; Audition (Cool Edit Pro); WaveLab; Sound Forge. If you need advice on which systems to purchase, which are most suitable for particular projects, and on moving between platforms mid-project, this book should be your one-stop reference. Mike Collins is a trainer and consultant who has been tackling these issues for years and his expert advice will save you time and money. Each section covers a specific system, providing a handy overview of its key features and benefits, including help with setup. Hints and Tips appear throughout these sections, addressing issues such as how to record drum loops using a virtual drum-machine, recording basslines and keyboard pads using virtual synthesizers, and adding strings, brass or other instruments using virtual samplers. Mike then illustrates how to convert these MIDI recordings into audio tracks to mix alongside vocals, guitars and any other real instruments. The many short tutorials provide both a source of comparison and means to get up to speed fast on any given software. Mike Collins is a music technology consultant and writer who has been making music in London's recording studios variously as a MIDI programmer, session musician, recording engineer, producer and arranger since 1981. He offers freelance Pro Tools engineering, consultancy, troubleshooting and personal tuition, as well as presenting seminars and lectures on related music technology and audio recording topics. Mike has written over 500 articles for magazines such as Macworld (UK), Pro Sound News Europe, Sound on Sound and AudioMedia, and for Electronic Musician and MIX in the USA. Mike's wide-

ranging career and experience enables him to bring excellent insight from all sides into his writing, from technical detail to creative expression. Starting out as a musician and club DJ in the 1970's, Mike moved into professional recording in the 1980's, initially as a Songwriter/Producer for EMI Records. Later he worked as a Songwriter for Chappell Music; as a Film Sound Consultant for Dolby Labs; as a Music Producer for TV recordings; and as Senior Recording Engineer and Music Technology Specialist at Yamaha's London R & D Studio. Throughout the 1990's Mike worked as a MIDI Programmer on records, films and music tours with bands such as the Shamen and film composers such as Ryuichi Sakamoto and David Arnold. Mike was Executive Consultant to Re-Pro (The Guild of Record Producers and Engineers) between 1996 and 1999 and Technical Consultant to the Music Producers Guild (MPG), contributing to the Education Group and organising and presenting Technical Seminars between 1999 and 2002. He has a BSc in Electroacoustics and an MSc in Music Information Technology.
