Lauren Gardner

New Seeds and Poor People Michael Lipton, Richard Longhurst, 2010-11-29 First published in 1989, this book deals with the impact of cereal production upon the Third World, specifically 'Modern Varieties' (MVs). Using evidence from plant breeding, economics and nutrition science, the authors seek to pinpoint what has been achieved, what has gone wrong and what needs to be done in future. Although the technical innovations of MVs mean more employment, cheaper food and less risk for small farmers, the reduction in crop diversity increases the risk of danger from pests and though MVs enlarge cereal stocks, many are too poor to afford them. The book concludes that technical breakthroughs alone won't solve deep-rooted social problems and that only new policies and research priorities will increase the choices, assets and power of the rural poor.

Tailored Thin Coatings for Corrosion Inhibition Using a Molecular Approach Simo Olavi Pehkonen, Shaojun Yuan, 2018-08-25 Tailored Thin Coatings for Corrosion Inhibition Using a Molecular Approach discusses the fundamentals and applications of various thin coatings for the inhibition of fouling and corrosion from a molecular perspective. It provides the reader with a fundamental understanding of why certain coatings perform better than others in a given environment. Surface analytical and electrochemical techniques in understanding the coating performance are emphasized throughout the book, providing readers with a useful reference on how to pursue a systematic corrosion inhibitor R&D program that involves the testing of coating performance using various, currently available, state-of-the-art laboratory techniques. Wherever relevant,

environmental considerations of the discussed coatings' technologies are highlighted and discussed, with current and upcoming regulatory trends put forth by different governmental organizations. Provides atomic and molecular level understanding of tailored thin coatings for corrosion inhibition Discusses key steps in corrosion, including the attachment of harmful substances to surfaces, the fouling of surfaces, and the initiation and propagation of corrosion on surfaces Written by leading experts in the field

Abhidharmakosa-Bhasya of Vasubandhu Gelong Lodro Sangpo, Bhikkhu K. L. Dhammajoti, 2012-01-01 Vasubandhu's Abhidharmakosa-Bhasya (ca. 380-390), besides its culminating achievement in streamlining the overall structure of the exposition of the preceding Abhidharma manuals, is unmatched by any of the preceding manuals in respect of its comprehensiveness-incorporating all important Vaibhasika doctrines since the time of the Abhidharma-mahavibhasa-of its excellent skill in definition and elucidation, and of its ability to clarify the difficult point involved in doctrinal disputations. Added to these qualities is its great value as a brilliant critique and insightful revaluation of all the fundamental Sar-vastivada doctrines developed up to its time. Since its appearance, it has been used as a standard textbook for the understanding of not only the Abhidharma doctrines but all the fundamental Buddhist doctrines in general. Translated into Chinese by Paramartha in 563 A.D. and by Hsuan-tsang in 651-654 A.D., Hsuan-tsang's disciple P'u-kuang tells us that in India the Abhidharmakosa-Bhasya was hailed as the 'Book of Intelligence'. In China, Japan and the Far-east, too, the Kosa has generally been highly treasured as a textbook of fundamental importance for Buddhist studies. Vasubandhu's brilliant critique of the doctrines of the Vaibhasika was answered by the equally brilliant

Samghabhadra - a contemporary staunch defender and expounder of the doctrines of the Vaibhasikas - in his masterwork, the Abhidharmanyayanusara, now extant only in Hsuan-tsang's translation (653-654 A.D.). The Sanskrit text, considered for a long time to be irremediably lost, was discovered by Rahula Samkrtyayana in 1935 in the Tibetan monastery of Ngor and was published by P. Pradhan in 1967 (1st edition).

Forgotten Men Michael Tyquin,2011-02-25 Forgotten Men is the long overdue account of the significant contribution to the Australian Army of the Australian Army Veterinary Corps in two world wars. One of the army's smallest and least recognised corps, its humble beginnings and quiet work in the background belie the crucial role of the Corps in supporting wartime operations and dealing with logistical issues never envisaged before 1915. While their place in military history is often overlooked, the men of the Australian Veterinary Corps deserve recognition. Stoic and hardworking, they unselfishly worked among the horrors of war, to provide the support needed for army units and their animals. While the Veterinary Corps reached its peak during the Great War, its role did not end when the guns fell silent in 1918. Instead, the Corps continued to support military

activities across Australia until horsepower finally gave way to mechanisation in World War II. The Corps' success in enabling the 1st Australian Imperial Force to fight in two theatres, each with its own peculiar veterinary problems, is an achievement worth recording. Doctor Michael Tyquin is a consulting historian based in Canberra. He has published extensively in the areas of Australian social, medical and military history. He is a serving member of the Australian Army Reserve which he joined as a medical assistant with the 4/19th Prince of Wales Light Horse. He is the official historian of the Royal Australian Army Medical Corps and is an Adjunct Professor at the University of Queensland's Centre for Military and Veterans' Health.
