The Global Contemporary Art World Jonathan Harris, 2017-10-02 The final installment in the critically-acclaimed trilogy on globalization and art explores the growing dominance of Asian centers of art. This book takes readers on a fascinating journey around five Asian centers of contemporary art and its myriad institutions, agents, forms, materials, and languages, while posing vital questions about the political economy of culture and the power of visual art in a multi-polar world. He analyzes the financial powerhouse of Art Basel Hong Kong, new media art in South Korea, the place of the Kochi Biennale within contemporary art in India, transnational art and art education in China, and the geo-politics of art patronage in Palestine, and he develops a highly original synthesis of theoretical perspectives and empirical research. Drawing on detailed case studies and personal insights gained from his extensive experience of the contemporary art scene in Asia, Professor Harris examines the evolving relationship between the western centers of art practice, collection, and validation and the emerging “peripheries” of Asian Tiger societies with burgeoning art centers. And he arrives at the somewhat controversial conclusion that dominance of the art world is rapidly slipping away from Europe and North America. *The Global Contemporary Art World* is essential reading for undergraduates and postgraduate students in modern and contemporary art, art history, art theory and criticism, cultural studies, the sociology of culture, and globalization studies. It is also a vital resource for research students, academics, and professionals in the art world.

Museums and Public Art? Cher Krause Knight, Harriet F. Senie, 2018-06-11 While many museums have ignored public art as a distinct arena of art production and display, others have – either grudgingly or enthusiastically – embraced it. Some institutions have partnered with public art agencies to expand the scope of special exhibitions; other museums have attempted to establish in-house public art programs. This is the first book to contextualize the collaborations between museums and public art through a range of essays marked by their coherence of topical focus, written by leading and emerging scholars and artists. Organized into three sections it represents a major contribution to the field of art history in general, and to those of public art and museum studies in particular. It includes essays by art historians, critics, curators, arts administrators and artists, all of whom help to finally codify the largely unwritten history of how museums and public art have and continue to intersect. Key questions are both addressed and offered as topics for further discussion: Who originates such public art initiatives, funds them, and most importantly, establishes the philosophy behind them? Is the efficacy of these initiatives evaluated in the same way as other museum exhibitions and programs? Can public art

ever be a “permanent” feature in any museum? And finally, are the museum and public art ultimately at odds, or able to mutually benefit one another?

The Artist's Guide to New Markets Peggy Hadden, 1998 Equally valuable to emerging and established artists, this practical guide discusses alternative means by which artists can build or expand their careers beyond the gallery market. The useful information that fills these pages includes instructions for writing proposals and selling art to clients most artists would never consider approaching. Some of the ideas are: designing stamps for the U.S. Postal Service; selling art through architects and interior designers; placing art in corporate and public settings; and gaining access to online galleries.

Radical Ritual Neil Shister, 2020-07-14 Neil Shister's book skillfully traces the evolution of Burning Man and provides rare insights into how this cultural phenomenon is changing the world. —Michael Mikel, founding board member of the Burning Man Project Written from Neil Shister's perspective as a journalist, student of American culture, and six-time participant in Burning Man, *Radical Ritual* presents the event as vitally, historically important. Shister contends that Burning Man is a significant player in the avant-garde, forging new social paradigms as liberal democracy unravels. Burning Man's contribution to this new order is postmodern, a fusion of sixties humanism with state-of-the-art Silicon Valley wizardry. Shister is not alone in his opinion. In 2018, the Smithsonian dedicated its entire Renwick Gallery, located next door to the White House, to an exhibition of Burning Man art and culture. The festival intertwines conservative and progressive ideas. On one hand it is a celebration of self-reliance, personal accountability, and individual freedom; on the other hand it is based on strong values of inclusion, consensual decision making, and centered, collaborative endeavor. In a wonderful mix of narrative storytelling and reportage, *Radical Ritual* discusses how Burning Man has impacted the art world, disaster relief, urban renewal, the utilization of renewable energy, and even the corporate governance of Google. The story concludes with the sudden death in April 2018 of Larry Harvey, now renowned as the philosophical epicenter of the movement.
