**Nature's Compass** James L. Gould, Carol Grant Gould, 2012-04-29 The mysterious and remarkable ways that animals navigate We know that animals cross miles of water, land, and sky with pinpoint precision on a daily basis. But it is only in recent years that scientists have learned how these astounding feats of navigation are actually accomplished. With colorful and thorough detail, *Nature's Compass* explores the remarkable methods by which animals find their way both near home and around the globe. Noted biologist James Gould and popular science writer Carol Gould delve into the elegant strategies and fail-safe backup systems, the invisible sensitivities and mysterious forces, and incredible mental abilities used by familiar and rare species, as they investigate a multitude of navigation strategies, from the simple to the astonishing. The Goulds discuss how animals navigate, without instruments and training, at a level far beyond human talents. They explain how animals measure time and show how the fragile monarch butterfly employs an internal clock, calendar, compass, and map to commence and measure the two-thousand-mile annual journey to Mexico—all with a brain that weighs only a few thousandths of an ounce. They look at honey bees and how they rely on the sun and mental maps to locate landmarks such as nests and flowers. And they examine whether long-distance migrants, such as the homing pigeon, depend on a global positioning system to let them know where they are. Ultimately, the authors ask if the disruption of migratory paths through habitat destruction and global warming is affecting and endangering animal species. Providing a comprehensive picture of animal navigation and migration, *Nature's Compass* decodes the mysteries of this extraordinary aspect of natural behavior.

**Compass Roads** Jane Yolen, 2018-04 This is a book about a place. A book of poems about a place. That place is the Pioneer Valley of Massachusetts, once a prehistoric lake later dubbed Lake Hitchcock. Where the Connecticut River now meanders. A place where dinosaurs once roamed in the shale. Where Native American tribal people once lived, and white incomers clashed with them. Where farmers and trappers, and then mills became the norm. Where escaped slaves found freedom. Where the first witchcraft accusation was hurled in the New World and the first book was banned. Where a university grew out of an agricultural school, and a number of colleges (several of them of them just for women) were established. Plus stores, museums, music halls. A place where artists and artisans discovered inspiration. Where writers made a living. And poets. A whole lot of poets. Hundreds of them over the years. So, in the tradition of those poets, who sang about this place, and the other poets who hang around this place, we offer a book of 62 contemporary Valley poets and over a hundred new poems. Use it as a map to take you to the compass points of our Valley. Enjoy the poetry and the scenery together. Explore the Valley's lyrical history. Past and present.
