**International Education: How Did We Get Here?** , Michael B. Smithee, Ed.D. Syracuse University (retired), Smithee Associates, LLC, United States ABSTRACT What follows are my recollections of how international education evolved in the nearly 50 years of my engagement in the field. This personal view of what happened in the development of the field comes from my experiences before and after starting my career. I will also include my recollections of how the term “international educators” arose, technological changes, events, and circumstances along the way that influenced our thinking about the field and its members: international educators. Spoiler Alert: We got here because people and organizations in the field before and after the year 2000 had a vision and displayed both an urgency and patience that required pivoting and resilience to deliver the knowledge and processes to make the field stable and viable. Keywords: Concepts, Definitions, Events, International Education Evolution, Leadership, Profession

*Influences of the IEA Civic and Citizenship Education Studies* Barbara Malak-Minkiewicz,Judith Torney-Purta,2021-05-26 This open access book identifies the multiple ways that IEA’s studies of civic and citizenship education have contributed to national and international educational discourse, research, policymaking, and practice. The IEA International Civic and Citizenship Education Study (ICCS), first conducted in 2009, was followed by a second cycle in 2016. The project was linked to the earlier IEA Civic Education Study (CIVED 1999, 2000). IEA’s ICCS remains the only large-scale international study dedicated to formal and informal civic and citizenship education in school. It continues to make substantial contributions to understanding the nature of the acquired civic knowledge, attitudes, and participatory skills. It also discusses in-depth how a wide range of countries prepare their young people for citizenship in changing political, social, and economic circumstances. The next cycle of ICCS is planned for 2022. In this book, more than 20 national representatives and international scholars from Europe, Latin America, Asia, and North America assess how the processes and findings of the 2009 and 2016 cycles of ICCS and CIVED 1999/2000 have been used to improve nations’ understanding of their students’ civic knowledge, beliefs, attitudes, current civic-related behaviors, and intentions for future participation in a comparative context. There are also chapters summarizing the secondary analysis of those studies’ results indicating their usefulness for educational improvement and reflecting on policy issues. The analyses and reflections in this book provide timely insight into international educational discourse, policy, practice, and research in an area of education that is becoming increasingly important for many societies.

*Identities and Education* Stephen Carney,Eleftherios Klerides,2021-01-28 Education is central to the project of individual and collective identity formation, national development and international relations, and is crucial in moments of crisis. What should be the agenda of study and action for education in such times? Identities and Education engages with this crucial question, seeking to examine and problematise our contemporary moment. Through the heuristic of the concept of identity, it specifically aims at creating a space for understanding our current challenges and considering the potential of education to address them. Contributors in this volume explore identity, crisis and education, not only in interdisciplinary, inter-sectional, relational and eclectic ways, but also through comparative lens. The book includes contributions from leading scholars from Austria, Cyprus, Germany, Greece, Portugal, the UK, and the USA and covers issues and themes including fear, hope, refugee education and global citizenship education.

Vaubel felt it would be useful to have a coeditor from the United States, and Thomas D.

Willett enthusiastically agreed to take on these duties.

An Incurable Academic Torsten Husen,2014-05-20 In these memoirs, Torsten Husen, Professor Emeritus of Education at the University of Stockholm, conveys a fascinating picture of the academic world from the 1940s onwards and of the extraordinary developments in education and psychology. Professor Husen is an internationally acknowledged expert on school affairs. As the first holder of the Chair of Educational Research at the Stockholm School of Education, he became deeply involved in policy research tied to the school reforms and his research and writing have directly affected the worldwide debate on the structure and content of secondary and upper secondary schooling. He was a founder member of the International Association for the Evaluation of Educational Achievement (IEA) and as Chairman of the Board of the International Institute for Education Planning (IIEP) in Paris he became increasingly concerned with educational problems in the developing countries. This is an account of a remarkable man whose dedication to research into educational problems worldwide should be an inspiration to others.

**Spiritual Empires in Europe and India** Perry Myers,2021-10-30 This book provides a comparative analysis of cosmopolitan (esoteric) religious movements, such as Theosophy, Groupe Independent des Études Ésotériques, Anthroposophy, and Monism, in England, France, Germany, and India during the late nineteenth-century to the interwar years. Despite their diversity, these factions manifested a set of common features—anti-materialism, embrace of Darwinian evolution, and a belief in universal spirituality—that coalesced in a transnational field of analogous cosmopolitan spiritual affinities. Yet, in each of their geopolitical locations these groups developed vastly different interpretations and applications of their common spiritual tenets. This book explores how such religious innovation intersected with the social (labor and economic renewal), cultural (education and religious innovation) and political (Empire and anti-colonial) dynamics in these vastly different national domains. Ultimately, it illustrates how an innovative religious discourse converged with the secular world and became applied to envision a new social order—to spiritually re-engineer the world.
