Attached Amir Levine, Rachel Heller, 2010-12-30 Is there a science to love? In this

groundbreaking book, psychiatrist and neuroscientist Amir Levine and psychologist Rachel S. F. Heller reveal how an understanding of attachment theory-the most advanced relationship science in existence today-can help us find and sustain love. Attachment theory forms the basis for many bestselling books on the parent/child relationship, but there has yet to be an accessible guide to what this fascinating science has to tell us about adult romantic relationships-until now. Attachment theory owes its inception to British psychologist and psychoanalyst John Bowlby, who in the 1950s examined the tremendous impact that our early relationships with our parents or caregivers has on the people we become. Also central to attachment theory is the discovery that our need to be in a close relationship with one or more individuals is embedded in our genes. In *Attached*, Levine and Heller trace how these evolutionary influences continue to shape who we are in our relationships today. According to attachment theory, every person behaves in relationships in one of three distinct ways: *ANXIOUS people are often preoccupied with their relationships and tend to worry about their partner's ability to love them back. *AVOIDANT people equate intimacy with a loss of independence and constantly try to minimize closeness. *SECURE people feel comfortable with intimacy and are usually warm and loving. *Attached* guides readers in determining what attachment style they and their mate (or potential mates) follow. It also offers readers a wealth of advice on how to navigate their relationships more wisely given their attachment style and that of their partner. An insightful look at the science behind love, *Attached* offers readers a road map for building stronger, more fulfilling connections.

How to Not Die Alone Logan Ury, 2021-02-02 A “must-read” (The Washington Post) funny and

practical guide to help you find, build, and keep the relationship of your dreams. Have you ever looked around and wondered, “Why has everyone found love except me?” You’re not the only one. Great relationships don’t just appear in our lives—they’re the culmination of a series of decisions, including whom to date, how to end it with the wrong person, and when to commit to the right one. But our brains often get in the way. We make poor decisions, which thwart us on our quest to find lasting love. Drawing from years of research, behavioral scientist turned dating coach Logan Ury reveals the hidden forces that cause those mistakes. But awareness on its own doesn’t lead to results. You have to actually change your behavior. Ury shows you how. This “simple-to-use guide” (Lori Gottlieb, New York Times bestselling author of *Maybe You Should Talk to Someone*) focuses on a different decision in each chapter, incorporating insights from behavioral science, original research, and real-life stories. You’ll learn: -What’s holding you back in dating (and how to break the pattern) -What really matters in a long-term partner (and what really doesn’t) -How to overcome the perils of online dating (and make the apps work for you) -How to meet more people in real life (while doing activities you love) -How to make dates fun again (so they stop feeling like job interviews) - Why “the spark” is a myth (but you’ll find love anyway) This “data-driven” (Time), step-by-step guide to relationships, complete with hands-on exercises, is designed to transform your life. *How to Not Die Alone* will help you find, build, and keep the relationship of your dreams.

How to Fall in Love with Anyone Mandy Len Catron, 2017-06-27 "A beautifully written and well-researched cultural criticism as well as an honest memoir" (Los Angeles Review of Books) from the author of the popular New York Times essay, "To Fall in Love with Anyone, Do This," explores

the romantic myths we create and explains how they limit our ability to achieve and sustain intimacy. What really makes love last? Does love ever work the way we say it does in movies and books and Facebook posts? Or does obsessing over those love stories hurt our real-life relationships? When her parents divorced after a twenty-eight year marriage and her own ten-year relationship ended, those were the questions that Mandy Len Catron wanted to answer. In a series of candid, vulnerable, and wise essays that takes a closer look at what it means to love someone, be loved, and how we present our love to the world, “Catron melds science and emotion beautifully into a thoughtful and thought-provoking meditation” (Bookpage). She delves back to 1944, when her grandparents met in a coal mining town in Appalachia, to her own dating life as a professor in Vancouver. She uses biologists’ research into dopamine triggers to ask whether the need to love is an innate human drive. She uses literary theory to show why we prefer certain kinds of love stories. She urges us to question the unwritten scripts we follow in relationships and looks into where those scripts come from. And she tells the story of how she decided to test an experiment that she’d read about—where the goal was to create intimacy between strangers using a list of thirty-six questions—and ended up in the surreal situation of having millions of people following her brand-new relationship. “Perfect fodder for the romantic and the cynic in all of us” (Booklist), *How to Fall in Love with Anyone* flips the script on love. “Clear-eyed and full of heart, it is mandatory reading for anyone coping with—or curious about—the challenges of contemporary courtship” (The Toronto Star).

For Better Tara Parker-Pope, 2010-05-06 One of the New York Times' most popular journalists presents groundbreaking scientific news about marriage. And, surprise: It's good news. We've all heard the statistic: Fifty percent of marriages end in divorce. It's enough to make many couples give

up when the going gets rough, thinking that's what everybody else does. But what if it weren't true? What if, in fact, it's not only possible but often easier than you think to save a seemingly troubled relationship? These are the questions Tara Parker-Pope asked herself after her own divorce. An investigative journalist on the health and wellness beat, she turned to some of the top biologists, neuroscientists, psychologists, and other scientists for the facts about marriage and divorce. Those facts were more positive and provocative than she'd ever expected, and For Better offers page after page of astonishing, eye-opening good news. Parker-Pope presents the science behind why some marriages work and others don't; the biology behind why some spouses cheat and others remain faithful; the best diagnostic tools created by the most cutting-edge psychologists to assess the probability of success in getting married, staying married, or remarrying. There are questionnaires to uncover potentially damaging hidden attitudes toward spouses. There are tools to show the impact of routine, fresh activity and how small adjustments can make a huge difference. Tara Parker-Pope's genius is for exploring the science behind the big issues that affect our lives every day and translating that science into advice that we can use-every day. For Better is the definitive guide to the most profound relationship of our lives.

Fierce Marriage Ryan Frederick, Selena Frederick, 2018-04-17 Ryan and Selena Frederick were newlyweds when they landed in Switzerland to pursue Selena's dream of training horses. Neither of them knew at the time that Ryan was living out a death sentence brought on by a worsening genetic heart defect. Soon it became clear he needed major surgery that could either save his life--or result in his death on the operating table. The young couple prepared for the worst. When Ryan survived, they both realized that they still had a future together. But the near loss changed the way they saw all that would lie ahead. They would live and love fiercely, fighting for each other and for a Christ-

centered marriage, every step of the way. *Fierce Marriage* is their story, but more than that, it is a call for married couples to put God first in their relationship, to measure everything they do and say to each other against what Christ did for them, and to see marriage not just as a relationship they should try to keep healthy but also as one worth fighting for in every situation. With the gospel as their foundation, Ryan and Selena offer hope and practical help for common struggles in marriage, including communication problems, sexual frustration, financial stress, family tension, screen-time disconnection, and unrealistic expectations.

Dignity Chris Arnade, 2019-06-04 NATIONAL BESTSELLER A profound book.... It will break your heart but also leave you with hope. —J.D. Vance, author of *Hillbilly Elegy* [A] deeply empathetic book. —The Economist With stark photo essays and unforgettable true stories, Chris Arnade cuts through expert pontification on inequality, addiction, and poverty to allow those who have been left behind to define themselves on their own terms. After abandoning his Wall Street career, Chris Arnade decided to document poverty and addiction in the Bronx. He began interviewing, photographing, and becoming close friends with homeless addicts, and spent hours in drug dens and McDonald's. Then he started driving across America to see how the rest of the country compared. He found the same types of stories everywhere, across lines of race, ethnicity, religion, and geography. The people he got to know, from Alabama and California to Maine and Nevada, gave Arnade a new respect for the dignity and resilience of what he calls America's Back Row--those who lack the credentials and advantages of the so-called meritocratic upper class. The strivers in the Front Row, with their advanced degrees and upward mobility, see the Back Row's values as worthless. They scorn anyone who stays in a dying town or city as foolish, and mock anyone who clings to religion or tradition as naïve. As Takeesha, a woman in the Bronx, told Arnade, she wants to be seen she sees herself: a prostitute, a mother of six, and a child of God. This book is his attempt to help the rest of us truly see, hear, and respect millions of people who've been left behind.
