Magic Piano Book for 4 Year Olds - Primer Level B Lucia Timkova,2013-07-14 This method provides solid training for beginners, from the youngest to the oldest, using easy ways to make quick progress without difficulties in understanding. To help with the teaching process, many colored pictures and graphics use the student's visual memory to get a strong and secure grasp of the basics uses. Students gain an understanding of the basic important theory using many coloured pictures to prompt their visual memory to help them understand and use it in their exercises in practice songs and to practice/test it in the workbook.Note-reading skills. The students are to say the names of the notes aloud and count them while they play the exercises on the piano. This makes students realize what notes they are playing, which is not easy. They don't learn it by memorising using the finger guide or by memorising the melody. Rather, they have to know the exact note names. They read notes from the very start.Each finger or a new note is individually and strongly developed using a lot of exercises for particular subjects from the beginning with a graduated, consistent method. Another strength is the introduction of ensemble playing from the very beginning. Beginner students have to play each exercise three times: say letter names while they play, count while they play, and play with a teacher. This is important for the teacher to help guide the student and to make sure that students understand the individual notes and already know how to play each exercise before they go home. When the students can read music, performing becomes a joy rather than a dreaded experience. In the workbook, which is included for each level you are going to confirm the notes and the theory/terminology you have learned during the lesson in three steps, which should be done in each lesson. Writing the notes, finding the notes on the staff/stave in different orders and playing the game Noughts and Crosses where students are drawing and explaining the symbols to help them remember it.After students have completed books A/B for four year olds, 1A/1B and 2A/2B, they are competent in music terminology and sight reading. They have a solid enough understanding to begin studying books of other composers; Classical or Christmas books at that particular level. Magic Piano book 1A begins by reviewing the same concepts taught in Magic Piano A/B for four year olds and also introduces new concepts for the left hand, with progression to book 1B. Using CD

Here's what you will learn inside this guide: • A chapter-by-chapter guide through the process you will use to start your own piano tutoring/teaching business, first in your spare time, moving in steps to a full time career! • Have more students on your weekly teaching roster than any other local teacher • All you need to know to teach, including music theory, and sites on the web for a refresher course. • Key insights into establishing yourself and getting recognition in communities where you'll teach • How to increase your business in quick and easy logical steps • Holding on to your students for years, not months: Inside you'll find methods to maintain your students well beyond the teaching industry average: a tried and true approach for success! • A philosophy for teaching that is wholly unique, based on the writer's years of attempts and trial and error to create a system of individualized teaching • An approach that makes both you and the students entirely satisfied • There is no reason for any piano instructor to work a second job when they use this approach • Included are vital links to help you move to the top and remain successful About the Expert: Joseph DeGregorio is a piano teacher who has also advised music teaching establishments about the best way in which to teach, which garnered praise and success in one-on-one piano instruction. DeGregorio established his "School of Piano" in Portland, Oregon, and his roster of students rose within the span of a year

from a handful to forty-five weekly students, which included both children and adults. His approach to teaching avoids using heavily marketed teaching books and courses in favor of an individual approach. Instead of the dull weekly repetition of study from the books that are only a continuation of school for children, DeGregorio creates a lesson plan for each student based on their unique aptitudes and interests. His students, for the most part play from memory. He has sparked an interest in several of his students to perform professionally. HowExpert publishes quick 'how to' guides on all topics from A to Z by everyday experts.
