**Key MBA Models** Julian Birkinshaw, Ken Mark, 2015-04-17 Key MBA Models is a one-stop-shop for all business course students and practicing managers. It contains the core management models from each business discipline - from Strategy and Finance to Marketing and Accounting - and distils them into concise summaries of what they are and how to apply them. Written by London Business School Professor Julian Birkinshaw, it covers the essential models that all business students and managers need to know. Themed around the course modules on an MBA, the 60+ models fall into the following categories: Strategy Business Economics Finance Decision Science Accounting Operations Marketing Organisational Behaviour The term 'model' is used loosely - in some cases it might be a framework (The 4 Ps of Marketing, Porter's Five Forces), in some cases it might be an important concept (open innovation or customer orientation), and in some cases it might be a technical model (the Capital Asset Pricing Model). Built on research with academics from the top international business schools, this book is an essential reference guide for every manager and MBA. Education in a Research University Kenneth Joseph Arrow, 1996 The research university is one of the most characteristic and important institutions of our time. It is an extremely complex entity, seeking to achieve a variety of aims and responding to a multiplicity of pressures. Its principal obligation is to educate students and to prepare them to live in and contribute to society. To serve this function, knowledge must be collected, organized, and disseminated, but perhaps even more important, new knowledge must be created. The knowledge so developed and imparted must ultimately be carried out into society, largely through former students but also by other means. The present volume is a collection of 30 essays on the character, administration, and management of research universities, with special emphasis on the perspective of statistics and operations research. It thus concentrates on issues of systematic planning, planning models, teaching approaches, and management associated with the aims and methods of operations research, although it also deals with more general concerns about the management of universities and university resources, and with some of the applications of operations-research and statistical tools that have moved outside university settings.

**Project-Based Learning** Harm-Jan Steenhuis, Lawrence Roland, 2018-09-20 This book provides students guidance on how to deal with the project-based instruction form. Project-based learning is different from traditional lectures and requires students to behave different from the traditional classroom. Different types of projects such as projects that contribute to theory and projects that contribute to practice are covered, to explain to students what to expect, how to approach the project, how to interact with students in groups, and how to interact with the instructor. The discussion includes many useful examples.

**The World of Business Management** Jane Goretskaya, Marina Bichinsky, 2015-04-29 The World of Business Management: Theories, Models, and Best Practices is a book, designed as the hands-on program to provide business executives with a chance to refresh and up-date their knowledge to succeed in running, managing, and operating practically any business with a little adjustment to a business size and type. Discussions lead leaders and managers with deep understanding of the connection between theories and models, based on a sound research, and practical implications, varied from business issues, situations, and cases, occurred in organizations quite often. Examples from the real-world scenarios provide support to the theoretical framework and set-up shift to the new paradigm of making decision and creating solutions for improvement. The seven books, incorporated in the all-in-one book serve as the courses of the professional development for administrators, managers of all levels, and leaders performed in small business (both profit and non-profit), middle-sized firms, educational institutions, and global corporations. The book also serves as a Capstone course for graduate students, purchasing their degree in the leadership and management field. The purpose of the book is to provide a guidance for business leaders how to run, manage, and operate in the rapidly changed world through the waves of disruptions. Students may use the book as a foundation for the literature review for the study of their choice, find the most vulnerable issue for deeper investigation within their thesis or dissertation, refresh or up-date their memory about what they learned during the entire course, prepared them to become executives. Unique context, provided in examples and practical implications, may assist both students and executives apply strategies and initiatives used by the leaders of other organizations to handle situations and cases in their organizations. Material, incorporated in each chapter, facilitates discussions and inspires business leaders, managers, and graduate students purchasing their degrees in business and educational administration, leadership, and management field in the process of developing a strong foundation how to operate in a variety of business approaches. Articles in the book are based on widely-recognized research and research provided by the authors of this book for working purposes as the organizational development consultants. The authors are invited the wide audience of leaders, managers, and graduate students to expand their knowledge how to operate in a variety of business approaches and resolve problems in practice. Multiple perspectives, provided in this book, make its context a powerful source of guidance how to meet and survive through the challenges of the 21st century. The authors believe that the guidance, provided in this book, may assist leaders and managers of the contemporary organizations in nearly of each industry to operate in increasingly challenging fast-paced and often revolutionary updated environment. The original idea for creating this book evolved the authors' willingness to share their knowledge, obtained from the research conducted for both their education within doctoral study and work-related purposes. Operating own consulting firm Lifelong Approaches, both Dr. Goretskaya and Dr. Bichinsky have performed also as educational and organizational development consultants and have helped many executives in the business and educational organizations of any size to resolve the organizational issues. Collaborating with the organizational representative, the consulting team has helped executives to find solutions within the diagnostic stages and has coached them during an implementation process. The most substantial leadership and management philosophies, perceptions, activities, technologies, changes in organizational structures and cultures, and stories, described in this book, were drowned from both research and real-life scenarios.

*The Theory of the Business (Harvard Business Review Classics)* Peter F. Drucker, 2017-04-18 Peter F. Drucker argues that what underlies the current malaise of so many large and successful organizations worldwide is that their theory of the business no longer works. The story is a familiar one: a company that was a superstar only yesterday finds itself stagnating and frustrated, in trouble and, often, in a seemingly unmanageable crisis. The root cause of nearly every one of these crises is not that things are being done poorly. It is not even that the wrong things are being done. Indeed, in most cases, the right things are being done—but fruitlessly. What accounts for this apparent paradox? The assumptions on which the organization has been built and is being run no longer fit reality. These are the assumptions that shape any organization's behavior, dictate its decisions about what to do and what not to do, and define what an organization considers meaningful results. These assumptions are what Drucker calls a company's theory of the business. The Harvard Business Review Classics series offers you the opportunity to make seminal Harvard Business Review articles a part of your permanent management library. Each highly readable volume contains a groundbreaking idea that continues to shape best practices and inspire countless managers around the world—and will have a direct impact on you today and for years to come.

**Informing with the Case Method** T. Grandon Gill, 2011 There are a number of marvelous books that address the topic of the case method. If you are interested in facilitating cases, you can look to the classic book Teaching and the Case Method by Louis Barnes, C. Roland Christensen and Abby Hansen (1994). The collection of essays on the subject, Education for Judgment: The Artistry of Discussion Leadership by C. Roland Christensen, David Garvin and Ann Sweet (1991) is a wonderful and inspiring read as well. If your interest is case-based research, it would be nearly impossible to find a more authoritative source than Robert Yin's (2009, 4th Edition) Case Study Research:

Design and Methods, which (at last count) has been cited nearly 29,000 times, according to Google Scholar. There is even a new entry to the field, William Ellet’s (2007) The Case Study Handbook: How to Read, Discuss, and Write Persuasively about Cases that is specifically aimed at the student. At first glance, then, the topic of case studies in education and research seems to be pretty well covered. Do we really need another book on the subject? I write this book believing the answer is yes. While I have great affection for the classics, there are a number of issues facing most business faculty—not to mention faculty members from disciplines outside of business—that these books simply do not address. In writing this book, my intention is to offer some thoughts on some of these. Paradoxically, these omissions arise from the very fact that the authors of the classics are undisputed masters of their craft. Why this is a problem should become clear as I identify the three areas of focus for this book. The first issue that I feel must be considered is using the case method with a novice audience. Consider the following. When I was enrolled in the MBA program at Harvard Business School (HBS) in the early 1980s, the curriculum consisted of nearly 900 case discussion (15 per week) and—perhaps—as many as 20 class periods given over to lecture-style presentations. When I teach a case-method graduate course at my own institution, on the other hand, I am constrained to 11 case discussions (a 12 week semester). As it happens, I am also the only course in the entire program that employs pedagogy reasonably faithful to the case method, as it is normally defined. The math is very simple. By the last day of my semester, my students have as much experience discussing cases as I did on Thursday afternoon of the first week of my two year MBA program at HBS. With the exception of faculty teaching at those rare institutions that have chosen to widely adopt the case method, the situation I face is commonplace. The second concern that existing books raise for me is their tendency to focus on isolated topics. Specifically, case facilitation, case writing and case research are treated as separable activities. I would argue that these three aspects of the case method—which I define quite broadly—are inseparable. For institutions that wish to achieve the full set of benefits provided by the case method, all three activities must be pursued in parallel. Perhaps this is why so few institutions have achieved success through the case method. In this book, I will argue that achieving such integration is precisely why those rare institutions have been so successful. Once you start believing that the case method can be a key to institutional success, how you get there becomes a real challenge. At leading institutions featuring the case method, such as HBS, the philosophy is largely learned through a period of apprenticeship. For example, I did not encounter any of the references mentioned in the first paragraph—excepting Yin—at any time during my 5 year doctorate at HBS. Instead, I went out and wrote cases, facilitated discussions and did research under the guidance of faculty members who were masters of the craft. How can someone without the benefit of such an experience acquire such mastery? While I cannot offer any promises in this regard, I will at least provide some examples and easy-to-follow checklists that may be of service to individuals getting started.

*Models and Methods for Management Science* Hao Zhang,2022-08-18 This textbook introduces systems science as an entry point to present a basic introduction to research models and methods in management science (operation research). This textbook selects the classic quantitative models and methods as well as rich cases and detailed examples, which are suitable for students with a certain management and economics knowledge for further study, and helps to develop the abilities of using the basic models in real life.

**Institution-independent Model Theory** Razvan Diaconescu,2008-08-01 This book develops model theory independently of any concrete logical system or structure, within the abstract category-theoretic framework of the so called ‘institution theory’. The development includes most of the important methods and concepts of conventional concrete model theory at the abstract institution-independent level. Consequently it is easily applicable to a rather large diverse collection of logics from the mathematical and computer science practice.
