Paint by Sticker Kids: Under the Sea Workman Publishing, 2017-05-16 Paint by Sticker is the most exciting new idea in activity books, both for grown-ups and kids. A compelling activity for

crafters and artists, doodlers and colorers of all ages, each Paint by Sticker Kids book includes everything you need to create ten vibrant, full-color “paintings.” The original images are rendered in low-poly, a computer graphics style using geometric polygon shapes to create a 3D effect. As in paint-by-number, each template is divided into spaces, each with a number that corresponds to a particular sticker. Find the sticker, peel it, and place it in the right space. Add the next, and the next, and the next—it’s an activity that’s utterly absorbing, both in the pleasure of peeling and sticking and the growing satisfaction of watching a “painting” come to life, emerging from a flat black-and-white illustration to a dazzling image with color, body, and spirit. Paint by Sticker Kids: Under the Sea is a journey into the world beneath the waves. Kids will create a dolphin, a shark, an octopus, and other denizens of the watery world. The card stock pages are perforated so kids can remove them easily and display, or share, their finished works of art.

Architecture of Resistance Yara

Sharif, 2017-05-08 Architecture of Resistance investigates the relationship between architecture, politics and power, and how these factors interplay in light of the Palestinian/Israeli conflict. It takes Palestine as the key ground of spatial exploration, looking at the spaces between people, boundary lines, documents and maps in a search for the meaning of architecture of resistance. Stemming from the need for an alternative discourse that can nourish the Palestinian spaces of imagination, the author reinterprets the land from a new perspective, by stripping it of the dominant power of lines to expose the hidden dynamic topography born out of everyday Palestine. It applies a hybrid approach of research through design and visual documentary, through text, illustrations, mapping techniques and collages, to capture the absent local narrative as an essential component of spatial investigation.
