Prune Gabrielle Hamilton,2014-11-04 NEW YORK TIMES BESTSELLER From Gabrielle Hamilton, bestselling author of Blood, Bones & Butter, comes her eagerly anticipated cookbook debut filled with signature recipes from her celebrated New York City restaurant Prune. NAMED ONE OF THE BEST BOOKS OF THE YEAR BY PUBLISHERS WEEKLY NAMED ONE OF THE BEST BOOKS OF THE SEASON BY Time • O: The Oprah Magazine • Bon Appétit • Eater A self-trained cook turned James Beard Award–winning chef, Gabrielle Hamilton opened Prune on New York's Lower East Side

fifteen years ago to great acclaim and lines down the block, both of which continue today. A deeply personal and gracious restaurant, in both menu and philosophy, Prune uses the elements of home cooking and elevates them in unexpected ways. The result is delicious food that satisfies on many levels. Highly original in concept, execution, look, and feel, the Prune cookbook is an inspired replica of the restaurant's kitchen binders. It is written to Gabrielle's cooks in her distinctive voice, with as much instruction, encouragement, information, and scolding as you would find if you actually came to work at Prune as a line cook. The recipes have been tried, tasted, and tested dozens if not hundreds of times. Intended for the home cook as well as the kitchen professional, the instructions offer a range of signals for cooks—a head's up on when you have gone too far, things to watch out for that could trip you up, suggestions on how to traverse certain uncomfortable parts of the journey to ultimately help get you to the final destination, an amazing dish. Complete with more than with more than 250 recipes and 250 color photographs, home cooks will find Prune's most requested recipes—Grilled Head-on Shrimp with Anchovy Butter, Bread Heels and Pan Drippings Salad, Tongue and Octopus with Salsa Verde and Mimosa'd Egg, Roasted Capon on Garlic Crouton, Prune's famous Bloody Mary (and all 10 variations). Plus, among other items, a chapter entitled "Garbage"—smart ways to repurpose foods that might have hit the garbage or stockpot in other restaurant kitchens but are turned into appetizing bites and notions at Prune. Featured here are the recipes, approach, philosophy, evolution, and nuances that make them distinctively Prune's. Unconventional and honest, in both tone and content, this book is a welcome expression of the cookbook as we know it. Praise for Prune "Fresh, fascinating . . . entirely pleasurable . . . Since

1999, when the chef Gabrielle Hamilton put Triscuits and canned sardines on the first menu of her East Village bistro, Prune, she has nonchalantly broken countless rules of the food world. The rule that a successful restaurant must breed an empire. The rule that chefs who happen to be women should unconditionally support one another. The rule that great chefs don't make great writers (with her memoir, Blood, Bones & Butter). And now, the rule that restaurant food has to be simplified and prettied up for home cooks in order to produce a useful, irresistible cookbook. . . . [Prune] is the closest thing to the bulging loose-leaf binder, stuck in a corner of almost every restaurant kitchen, ever to be printed and bound between cloth covers. (These happen to be a beautiful deep, dark magenta.)"—The New York Times "One of the most brilliantly minimalist cookbooks in recent memory . . . at once conveys the thrill of restaurant cooking and the wisdom of the author, while making for a charged reading experience."—Publishers Weekly (starred review)

Securing Citrix XenApp Server in the Enterprise Tariq Azad,2008-08-08 Citrix

Presentation Server allows remote users to work off a network server as if they weren't remote. That means: Incredibly fast access to data and applications for users, no third party VPN connection, and no latency issues. All of these features make Citrix Presentation Server a great tool for increasing access and productivity for remote users. Unfortunately, these same features make Citrix just as dangerous to the network it's running on. By definition, Citrix is granting remote users direct access to corporate servers?..achieving this type of access is also the holy grail for malicious hackers. To compromise a server running Citrix Presentation Server, a hacker need not penetrate a heavily defended corporate or government server. They can simply compromise the far more vulnerable laptop, remote office, or home office of any computer connected to that server by Citrix Presentation Server. All of this makes Citrix Presentation Server a high-value target for malicious hackers. And although it is a high-value target, Citrix Presentation Servers and remote workstations are often relatively easily hacked, because they are often times deployed by overworked system administrators who haven't even configured the most basic security features offered by Citrix. The problem, in other words, isn't a lack of options for securing Citrix instances; the problem is that administrators aren't using them. (eWeek, October 2007). In support of this assertion Security researcher Petko D. Petkov, aka pdp, said in an Oct. 4 posting that his recent testing of Citrix gateways led him to tons of wide-open Citrix instances, including 10 on government domains and four on military domains. The most comprehensive book published for system administrators providing step-by-step instructions for a secure Citrix Presentation Server Special chapter by Security researcher Petko D.
