Herman Hamburger is an awkward fellow with a passion for science. Herman has been building a time machine for several months in the basement of his home. One day he receives his final part by courier, a green dental chair that will seat the time traveler. The chair turns out to be smaller than what he thought he had ordered, requiring him to make some quick adjustments to his design. Herman eventually completes the unusually small time travel device, and sits in it, hoping to travel to the period when the Great Pyramids of Egypt were being constructed. He launches the machine and following some loud bangs and puffs, he is disappointed to find his time travel device has failed to take him anywhere. Herman gets up from the chair and walks upstairs to the kitchen where he left his family to clean up after dinner. He finds that the house is completely empty. After becoming concerned, Herman decides to contact the police. As he is about to pick up the phone, the door bell rings. A mailman hands him a letter which, much to Herman's surprise, is addressed 'To Dad.' After opening the letter he finds it is dated the year 1945. Herman quickly realizes his time travel device has sent, not him, but his entire family through time. He must now figure out how to get them back home safely, in present day time.

*The Time Machine* illustrated H. G.

Wells, 2022-06-22 *The Time Machine* by H. G. Wells is a science fiction classic, which lends itself well to visualization. This version, illustrated

by Yoann Laurent-Rouault, an illustrator master who graduated from the Beaux-Arts, and published in the international literary collection Memoria Books, is a reference on the time travel theme. Wells transports us in the year 802 701, in a society made up of the "Elois", who live peacefully in a kind of big Garden of Eden, eating fruits and sleeping high up, while underground lives another species, also descending from men, the "Morlocks", who do not stand the light anymore, living in the dark for too long now. At night, they return to the surface, going back up by the wells, in order to kidnap some Elois that they eat ; these last became livestock unknowingly. In The Time Machine, made into a movie several times, the last of them in 2002 by Simon Wells, the great-grandson of H. G. Wells, time is both a pretext to move the class struggle and warn... and also, in a way, a full character, who fascinates, arbitrates, transcends... The illustrations come to reinforce the time travel and provide a new experience to the reader.

\*\*\*\*\* A new high-concept idea for time travel! - Reader review Josh and Meg and the Tiny Time Machine are back in a brand new book! And this time it's personal. They will travel to the past to save Meg's father, or die trying. A new adventure from Amazing Stories. John E. Stith is a Nebula Award finalist for Redshift Rendezvous. Aboard the hyperspace liner Redshift, the speed of light is ten meters per second. In Tiny Time Machine 1, Meg and Josh, two loners on the run from the cops, discovered a time machine built

into a cellphone and used it to avert a disastrous future. But along the way, Meg's father, the inventor, was killed. Now, Meg and Josh are back in a second stand-alone adventure. Their challenge: to decipher Meg's father's cryptic notes and enhance the time machine, so it can not only visit their future, but also open the door to their past. But even as they race to get far enough into the past to save dad, they must battle dad's ex-partner, who will do anything to snatch the tiny time machine back from them. And as if that's not enough, a powerful billionaire and his daughter may be allies--or not. TTM2 revisits the characters and time machine introduced in TTM1. Like TTM1, this is also a stand-alone adventure, one that can be enjoyed without having read TTM1. But why not double your fun and try both? Tiny Time Machine 2: Return of the Father An

**The Ultimate Boston Red Sox Time Machine Book**  
Martin Gitlin, 2020-01-24 The Ultimate Boston Red Sox Time Machine presents a timeline format that not only includes the Red Sox's greatest moments—including its nine World Series wins and individual achievements—but focuses also on some very unusual seasons and events, such as the refusal of the New York Yankees to go up against them in the 1904 World Series, the derivation of its name, and of course the famous Curse of the Bambino. There are dozens of impressive, wild, wacky and wonderful stories over the years regarding Red Sox history and Gitlin is the perfect person to write it with his trademark humor and thorough knowledge of Red Sox lore.

**Time Travel** Sourabh De, 2021-12-02 33000 years back, humans turned one of their bitter enemies into a loyal friend. Who was this enemy? And how

did this 'enemy' help Homo sapiens to get to the top of the food chain? A ball of dung rolled by a beetle transformed humanity. How did that happen? A human being riding a bicycle is the second most efficient locomotive on Earth. What is the first? How did humans survive the Toba Super-Volcano eruption 70,000 years ago? What's the connection between a prehistoric hominid fossil to the music band Beatles? Why has no one been able to find the tomb of Alexander the Great? Was it really Columbus who discovered the Americas? Who is the 'loneliest man and the 'oldest surviving human tribe'? When a playful tweenage daughter asked umpteen, incessant questions to her dad, the only way to answer was to embark on an adventurous journey across continents and millennia to put the pieces of human civilization and rediscovering oneself. From a one-million-year-old fireplace to treks through jungles and caves, from being hunted to becoming the hunter; the journey of knowing nothing to questioning everything and then back to knowing nothing. Would the father-daughter duo get their answers? Can she find her place in history and the universe?

*The Time Machine* H. G. Wells, 2023-08-31 *The Time Machine* by H. G. Wells - *The Time Machine* by H. G. Wells - *The Time Machine* is a science fiction novella by H. G. Wells, published in 1895. The work is generally credited with the popularization of the concept of time travel by using a vehicle

or device to travel purposely and selectively forward or backward through time. The term time machine, coined by Wells, is now almost universally used to refer to such a vehicle or device. Utilizing a frame story set in then-present Victorian England, Wells' text focuses on a recount of the otherwise anonymous Time Traveller's journey into the far future. A work of future history and speculative evolution, *Time Machine* is interpreted in modern times as a commentary on the increasing inequality and class divisions of Wells' era, which he projects as giving rise to two separate human species: the fair, childlike Eloi, and the savage, simian Morlocks, distant descendants of the contemporary upper and lower classes respectively. It is believed that Wells' depiction of the Eloi as a race living in plentitude and abandon was inspired by the utopic romance novel *News from Nowhere* (1890), though Wells' universe in the novel is notably more savage and brutal.
