The Bug Girl Sophia Spencer,Margaret McNamara,2020-02-11 Real-life 7-year-old Sophia Spencer was bullied for loving bugs until hundreds of women scientists rallied around her. Now Sophie tells her inspiring story in this picture book that celebrates women in science, bugs of all kinds, and the importance of staying true to yourself. Makes a perfect gift for nature lovers on Earth Day and every day! Sophia Spencer has loved bugs ever since a butterfly landed on her shoulder--and wouldn't leave!--at a butterfly conservancy when she was only two-and-a-half years old. In preschool and kindergarten, Sophia was thrilled to share what she knew about grasshoppers (her very favorite insects), as well as ants and fireflies... but by first grade, not everyone shared her enthusiasm. Some students bullied her, and Sophia stopped talking about bugs altogether. When Sophia's mother wrote to an entomological society looking for a bug scientist to be a pen pal for her daughter, she and Sophie were overwhelmed by the enthusiastic response--letters, photos, and videos came flooding in. Using the hashtag BugsR4Girls, scientists tweeted hundreds of times to tell Sophia to keep up her interest in bugs--and it worked! Sophia has since appeared on Good Morning America, The Today Show, and NPR, and she continues to share her love of bugs with others.

Bugs Bugs Bugs Everywhere There Are Bugs Peter Richards,2014-11-18 Bugs Bugs Bugs High or low Friends or foes Squeals or tears Phobias or fears They get in your hair They get in your eyes Find here or find them there Little bugs are found everywhere . . . This is a fun children's picture book, which adults can easily relate too and enjoy with their children. It helps children of a early age to realise that bugs are all around and hopefully teaches them something about bugs habitats and there is no real need to fear bugs. But also to be aware that some bugs can be harmful to them. I have used the word Bugs loosely in this book and this needs to be taken into account when considering this book. Some of the creatures I have used are not true Bugs, but are generally considered as Bugs or Insects by the general public. An example of this is my use of spiders, which are not true Bugs.

Bugs Bold Kids,2022-02-20 Everywhere you turn, you'll find bugs. They're cute and sometimes bothersome, but kids love them. As parents, we want to teach our kids everything we can about them, but teaching science to little ones is no easy task. So we've come up with some fun facts about bugs to make science a bit more fun! These are just a few of the many facts that make bugs fun for kids to learn. There are three main parts of a bug's body: the head, the thorax, and the abdomen. Like humans, bugs have an exoskeleton and senses that enable them to smell, hear, and feel the weather. Most bugs live in colonies. There are few exceptions to this rule, such as when two insects fight. This is known as an insect safari. Insects make lots of noise and can be a nuisance, but they are not harmful to humans! Did you know that stag beetles are the largest creatures in the UK? A single honeybee colony can produce up to 100kg of honey each year, which is enough to fill more than two hundred jars. A dung bee can drag up to 1,141 times its weight. During a single season, a honeybee colony can produce up to two hundred and twenty jars of honey. An ant-eating assassin bug piles its victims on its body to scare predators away. Fireflies flash in unison, and a water scorpion breathes through a tube that resembles a snorkel.
