Zak George's Dog Training Revolution Zak George,Dina Roth Port,2016-06-07 A revolutionary way to raise and train your dog, with “a wealth of practical tips, tricks, and fun games that will enrich the lives of many dogs and their human companions” (Dr. Ian Dunbar, veterinarian and animal behaviorist). Zak George is a new type of dog trainer. A dynamic YouTube star and Animal Planet personality with a fresh approach, Zak helps you tailor dog training to your pet’s unique traits and energy level—leading to quicker results and a much happier pup. For the first time, Zak has distilled the information from his hundreds of videos and experience with thousands of dogs into this comprehensive dog and puppy training guide that includes: • Choosing the right pup for you • Housetraining and basic training • Handling biting, leash pulling, jumping up, barking, aggression, chewing, and other behavioral issues • Health care essentials like finding a vet and selecting the right food • Cool tricks, traveling tips, and activities to enjoy with your dog • Topics with corresponding videos on Zak’s YouTube channel so you can see his advice in action Packed with everything you need to know to raise and care for your dog, this book will help you communicate and bond with one another in a way that makes training easier, more rewarding, and—most of all—fun!

What Shamu Taught Me About Life, Love, and Marriage Amy Sutherland,2008-02-12 While observing exotic animal trainers for her acclaimed book *Kicked, Bitten, and Scratched*, journalist Amy Sutherland had an epiphany: What if she used these training techniques with the human animals in her own life—namely her dear husband, Scott? In this lively and perceptive book, Sutherland tells how she took the trainers’ lessons home. The next time her forgetful husband stomped through the house in search of his mislaid car keys, she asked herself, “What would a dolphin trainer do?” The answer was: nothing. Trainers reward the behavior they want and, just as important, ignore the behavior they don’t. Rather than appease her mate’s rising temper by joining in the search, or fuel his temper by nagging him to keep better track of his things in the first place, Sutherland kept her mouth shut and her eyes on the dishes she was washing. In short order, Scott found his keys and regained his cool. “I felt like I should throw him a mackerel,” she writes. In time, as she put more training principles into action, she noticed that she became more optimistic and less judgmental, and their twelve-year marriage was better than ever. What started as a goofy experiment had such good results that Sutherland began using the training techniques with all the people in her life, including her mother, her friends, her students, even the clerk at the post office. In the end, the biggest lesson she learned is that the only animal you can truly change is yourself. Full of fun facts, fascinating insights, hilarious anecdotes, and practical tips, *What Shamu Taught Me About Life, Love, and Marriage* describes Sutherland’s Alice-in-Wonderland experience of stumbling into a world where cheetahs walk nicely on leashes and elephants paint with watercolors, and of leaving a new, improved *Homo sapiens*.

Class 11 T. J. Waters,2007-09-25 A gripping insider’s look at the post-9/11 CIA In the weeks following the attacks of 9/11, the Central Intelligence Agency received over 150,000 résumés from people wanting to serve their nation. T. J. Waters became one of more than a hundred students admitted into the CIA's Clandestine Service to become Class 11, the first post- 9/11 training class. Filled with more information about the CIA's Clandestine Service Training Program than has ever been allowed into the public domain, Waters takes readers behind closed doors, where the trainees learned methods of subterfuge, mastering disguises, how to withstand interrogations, and how to cross into hostile territory undetected—and provides a moving portrait of ordinary Americans with the courage and determination to go to any lengths to protect their country.

The First 20 Hours Josh Kaufman,2013-06-13 Forget the 10,000 hour rule— what if it’s possible to learn the basics of any new skill in 20 hours or less? Take a moment to consider how many things you want to learn to do. What’s on your list? What’s holding you back from getting started? Are you worried about the time and effort it takes to acquire new skills—time you don’t have and effort you can’t spare? Research suggests it takes 10,000 hours to develop a new skill. In this nonstop world when will you ever find that much time and energy? To make matters worse, the early hours of practicing something new are always the most frustrating. That’s why it’s difficult to learn how to speak a new language, play an instrument, hit a golf ball, or shoot great photos. It’s so much easier to watch TV or surf the web . . . In *The First 20 Hours*, Josh Kaufman offers a systematic approach to rapid skill acquisition— how to learn any new skill as quickly as possible. His method shows you how to deconstruct complex skills, maximize productive practice, and remove common learning barriers. By completing just 20 hours of focused, deliberate practice you’ll go from knowing absolutely nothing to performing noticeably well. Kaufman personally field-tested the methods in this book. You’ll have a front row seat as he develops a personal yoga practice, writes his own web-based computer programs, teaches himself to touch type on a nonstandard keyboard, explores the oldest and most complex board game in history, picks up the ukulele, and learns how to windsurf. Here are a few of the simple techniques he teaches: Define your target performance level: Figure out what your desired level of skill looks like, what you’re trying to achieve, and what you’ll be able to do when you’re done. The more specific, the better. Deconstruct the skill: Most of the things we think of as skills are actually bundles of smaller subskills. If you break down the subcomponents, it’s easier to figure out which ones are most important and practice those first. Eliminate barriers to practice: Removing common distractions and unnecessary effort makes it much easier to sit down and focus on deliberate practice. Create fast feedback loops: Getting accurate, real-time information about how well you’re performing during practice makes it much easier to improve. Whether you want to paint a portrait, launch a start-up, fly an airplane, or juggle flaming chainsaws, *The First 20 Hours* will help you pick up the basics of any skill in record time . . . and have more fun along the way.

Handball Practice 11 - Extensive and Diverse Athletics Training Jörg Madinger,2017-08-09 The present training units can support you in improving your team's handball-specific fitness, especially in terms of speed, speed endurance, and strength. The strength training units focus on improving core stability with musculoskeletal and

dynamic stabilization exercises. Stability plays an important role in handball, as it is crucial to a high physical performance and can prevent injuries. Considering speed and speed strength, reflexive jumping power, short sprints, and speed endurance are especially important. These skills are essential for succeeding in handball. The training units combine course strength trainings with short contests and handball-specific exercises, thus showing the possibilities for creating a diverse fitness training that is also fun for the team. The present training units are designed for older youth teams and adult teams. Hence, certain physical requirements must be met. The exercises can also be used in the training of younger teams, however, you have to make sure that the difficulty level is appropriate for the younger players. This book contains the following training units: TU 1 - Series of shots with reflexive jumping power training This unit focuses on training the jumping power with handball-specific shooting exercises. After warm-up, a coordination run exercise, and a sprint contest, ball familiarization includes jumping and additional exercises with the ball. After the goalkeeper warm-up shooting, reaction time and jumping power are trained in two individual shooting exercises. A closing game completes this training unit. TU 2 - Intensive speed strength/speed strength endurance training with various running directions This athletics unit focuses on improving speed strength endurance. After warm-up and a short game, five athletics exercises train the various groups of thigh muscles by moving forwards, backwards, and to the side. This training unit is very intense and can thus be incorporated in preparation periods or season breaks. TU 3 - Handball-specific endurance training with fast break movements This unit trains handball-specific endurance focusing on running and jumping exercises. After warm-up including a coordination run exercise, ball familiarization includes a passing and running course across the whole court. Goalkeeper warm-up shooting includes a series of 4 shots combined with a subsequent 2-on-2 fast break. The following endurance unit requires jumping exercises and playing 2-on-2 across the whole court alternately. This intense unit ends with a team exercise and a team fast break contest. TU 4 - Intense athletics training for arms and legs This intense training unit focuses on athletics training. After warm-up including a game with high running intensity and a coordination run exercise, an athletics course is done. An additional jumping and strength exercise for the arms and a running exercise complete this training unit. TU 5 - Handball-specific endurance training in game-like situations This training unit contains a playful, handball-specific endurance unit. Each exercise is characterized by a high running intensity and is directly related to the handball game. After warm-up and ball familiarization as well as goalkeeper warm-up shooting, an endurance course is done. In this, two players have to accomplish a task as opponents. Which team is the first to score eight times? A sprint contest completes this intense training unit.

Deep Learning Ian Goodfellow, Yoshua Bengio, Aaron Courville, 2016-11-10 An introduction to a broad range of topics in deep learning, covering mathematical and conceptual background, deep learning techniques used in industry, and research perspectives. "Written by three experts in the field, Deep Learning is the only comprehensive book on the subject." –Elon Musk, cochair of OpenAI; cofounder and CEO of Tesla and SpaceX Deep learning is a form of machine learning that enables computers to learn from experience and understand the world in terms of a hierarchy of concepts. Because the computer gathers knowledge from experience, there is no need for a human computer operator to formally specify all the knowledge that the computer needs. The hierarchy of concepts allows the computer to learn complicated concepts by building them out of simpler ones; a graph of these hierarchies would be many layers deep. This book introduces a broad range of topics in deep learning. The text offers mathematical and conceptual background, covering relevant concepts in linear algebra, probability theory and information theory, numerical computation, and machine learning. It describes deep learning techniques used by practitioners in industry, including deep feedforward networks, regularization, optimization algorithms, convolutional networks, sequence modeling, and practical methodology; and it surveys such applications as natural language processing, speech recognition, computer vision, online recommendation systems, bioinformatics, and videogames. Finally, the book offers research perspectives, covering such theoretical topics as linear factor models, autoencoders, representation learning, structured probabilistic models, Monte Carlo methods, the partition function, approximate inference, and deep generative models. Deep Learning can be used by undergraduate or graduate students planning careers in either industry or research, and by software engineers who want to begin using deep learning in their products or platforms. A website offers supplementary material for both readers and instructors.

Twelve Hours' Sleep by Twelve Weeks Old Suzy Giordano, Lisa Abidin, 2006-01-19 There is no bigger issue for healthy infants than sleeping through the night. In this simple, straightforward book, Suzy Giordano presents her amazingly effective "Limited-Crying Solution" that will get any baby to sleep for twelve hours at night—and three hours in the day—by the age of twelve weeks old. Giordano is the mother of five children and one of the most sought-after baby sleep specialists in the country. The Washington Post calls her a baby sleep guru and an underground legend in the Washington area for her ability to teach newborns how to achieve that parenting nirvana: sleeping through the night. Her sleep plan has been tested with singletons, twins, triplets, babies with special needs, and colicky babies—and it has never failed. Whether you are pregnant, first-time parents, or parents who seek a different path with your second or third child, anyone can benefit from the Baby Coach's popular system of regular feeding times, twelve hours of sleep at night and three hours of sleep during the day, and the peace of mind that comes with taking the parent and child out of a sleep-deprived world.
