

Myanmar Currency

N Ganesan, Kyaw Yin Hlaing

Myanmar's Foreign Exchange Market Koji Kubo,2018-09-27 This is the first book dedicated to the scrutinization of Myanmar's unofficial foreign exchange market, its roots in restrictive administrative controls on foreign exchange and international trade, and its effects on the country's economic performance. This book integrates vast pieces of records and data with first-hand information from extensive fieldwork to create an overall picture of the chaotic but seemingly efficient foreign exchange market in Myanmar, a transitional economy in Southeast Asia whose economic systems had been less known due to its isolation until recently. This book illustrates how the unofficial foreign exchange market emerged during the country's transition to a market-based economy, how informal currency deals proliferated under restrictive controls, and why they persist despite the significant economic reforms since 2011. Refuting the conventional wisdom of foreign exchange policy reforms, this research clarifies path-dependent features of foreign exchange market systems, and it discusses possible solutions for modernizing economic systems. This book is highly recommended to readers who seek an in-depth analytical narrative about informal economic activities and foreign exchange policy reforms in a fragile state.

The Money Trail Marilyn V. Longmuir,2002 The money trail outlines the rapid succession of currencies used in Burma in the 1930s and 1940s, recounts the economic effects of the wartime currency crises, and details the considerations in the formulation of the British financial policies during and after the Japanese occupation. --book cover.

Efficiency Costs of Myanmar's Multiple Exchange Rate Regime
Masahiro Hori,Yu Ching Wong,2008-08-01 Myanmar's multiple

exchange rate system creates various economic distortions. This paper describes the exchange rate practices in Myanmar, develops a model of foreign exchange markets, and presents the efficiency costs imposed by quasi-fiscal operation under the current exchange rate regime. The results of our model-based analyses indicate that the equilibrium exchange rate under the unified market could be at around K 400-500 per U.S. dollar, and using the equilibrium exchange rate (instead of the official exchange rate) as the accounting rate increases trade openness to more than 20 percent from less than 1 percent measured by official statistics. The total efficiency loss caused by the current multiple exchange rate regime is estimated at about 14-17 percent of GDP in 2006/07.

The Coins and Banknotes of Burma Michael Robinson, Lewis A. Shaw, 1980

Evolution of Money and Banking in Myanmar ,2020

Burma's Currency and Credit Tun Wai (U.), 1953

Myanmar International Monetary Fund. Asia and Pacific Dept, 2017-02-03 Myanmar: Selected Issues

Fiery Dragons Sean Turnell, 2009 This book tells the story of Burma's financial system - of its banks, moneylenders and 'microfinanciers' - from colonial times to the present day. It argues that Burma's financial system matters, and that the careful study of this system can tell us something more general about Burma - not least about how the richest country in Southeast Asia at the dawn of the twentieth century, became the poorest at the dawn of the twenty-first. While financial systems and institutions matter in all countries, Turnell argues that they especially count in Burma as events in the financial and monetary sphere have been unusually, spectacularly, prominent in Burma's turbulent modern history. The story of

Burma's financial system and its players is one that has shaped the country. It is a dramatic story of interest beyond the confines of economics and development studies.

Myanmar International Monetary Fund, 1999-12-10 This paper reviews economic developments in Myanmar during the 1990s. The economic performance of Myanmar in the 1990s has fallen short of other countries in the region. The Asian crisis has had an unexpectedly limited impact on Myanmar. Following the floating of the Thai baht in June 1997, the free market exchange rate depreciated rapidly, leading to a surge in inflation. Other effects of the crisis have included a slowing in growth of tourist arrivals and delayed receipt of gas export revenues.

On Money and Mettā Laura Hornig, 2021-01-25 Money and Mettā symbolize the interconnectedness of economic processes and moral ideas in a Buddhist context ☐ mettā , 'loving kindness', constitutes a core concept of Buddhism. Based on eighteen months of research in the lowland Myanmar town of Patheingyi, this book investigates manifold economic activities on the ground. Particular attention is paid to the self-employed and their relationships with relatives, workers, and community members. The ethnography covers a range of topics, including business formation and succession, recruitment, child labour, ethnicity, indebtedness and charity. It is demonstrated that, amidst rapidly changing socio-economic conditions, values rooted in kinship morality and Buddhism remain significant and continue to shape people's economic reasoning and activities.

On Money and Mettā Laura Hornig, 2020 Based on eighteen months of research in the lowland Myanmar town of Patheingyi, this book investigates manifold economic activities on the ground. Particular attention is paid to the self-employed and their relationships

It is demonstrated that, amidst rapidly changing socio-economic conditions, values rooted in kinship morality and Buddhism remain significant and continue to shape people's economic reasoning and activities. These values and moral aspects stand in a dialectical relationship with changing economic realities.

Economic Development of Myanmar Myat Thein, 2004 There are a number of excellent studies by eminent Myanmar economists as well as scholars from abroad covering different post-war periods and/or various aspects of development in Myanmar. What this book does is to bring them altogether, as it were, under one roof by recasting bits and pieces of their work according to the author's own understanding. In doing so, a holistic approach was adopted in order to have a well-rounded account of developments over the past fifty years or more. In addition, an attempt has also been made to present the major developments at different periods of time between 1948 and 2000 in a simple, but not over simplified, reader-friendly format so as to reach as wide an audience as possible. It is the author's ardent wish that not only students and policy-makers, but Myanmar people in all walks of life will read the book, discuss it, and work together for a better future.

Myanmar International Monetary Fund, 2012-05-07 This Article IV Consultation reports that Myanmar's authorities are moving forward with reforms of the exchange rate system. Priorities are establishing the market infrastructure for the planned move to a managed float, and monetary and foreign exchange policy capacity to complement plans to unify the exchange rates. Financial sector

modernization remains essential to support the reform process and improve financial intermediation. Fiscal policy priorities include ending deficit monetization, reprioritizing spending, and increasing nonresource revenues for development spending within a medium-term fiscal framework.

Rough Guide Snapshot Myanmar (Burma) John Oates,2013-07-11 The Rough Guide Snapshot to Myanmar (Burma) is the essential travel guide to this intriguing and once-isolated country. For so long off the tourist map, Myanmar's recent tentative steps on the road to democracy have opened the door to a beautiful and beguiling destination. And whether you're exploring the temple-strewn plains of Bagan, trekking through remote villages in Hsipaw or being punted around the stilt villages of magnificent Inle Lake, this digital guide has all the advice you'll need - with detailed maps and up-to-date listings pinpointing the best (and best-value) hotels, restaurants, shops and bars. Also included is a Basics section with practical information on transport, food, drink, costs and health, and a handy Burmese language section. (Equivalent printed page extent 70 pages).

Myanmar Business and Investment Opportunities Yearbook
Volume 1 Practical Information and Opportunities IBP, Inc.,

Myanmar N Ganesan,Kyaw Yin Hlaing,2007 Covers issues of historical influence and political considerations that have shaped the dominant thinking within the state and the military. Examines the three major ethnic groups in the country - Karen, Kachin, and Shan. Deals with how the various ethnic groups are trying to cope with decades of conflict and reconstruct their communities.

Annual Report on Exchange Arrangements and Exchange Restrictions 2004 International Monetary Fund. Monetary and Capital Markets Department,2004-09-23 This 2004 Annual Report on

Exchange Arrangements and Exchange Restrictions provides a detailed description of the exchange arrangements and exchange/trade restrictions of individual IMF member countries and Hong Kong Special Administrative Region, as well as Aruba and the Netherlands Antilles. The report highlights that the exchange rate of the kuna is determined in the foreign exchange market. The Croatian National Bank may set intervention exchange rates, which it applies in transactions with banks outside the interbank market to smooth undue fluctuations in the exchange rate.

Monitoring the agri-food system in Myanmar: Rice millers – August 2022 survey round Myanmar Agriculture Policy Support Activity (MAPSA), 2022-11-16 In August 2022, we surveyed 467 active rice millers from 13 states and regions across Myanmar to learn more about the impacts of the current political and COVID-19 crises. This report presents the key results and analysis from those interviews. Key findings ☐ Electricity and fuel disruptions were cited as the most significant disruption by 91 percent of millers in August 2022. Rising fuel prices and access issues afflicted smaller, local mills while larger mills were more affected by interruptions in electricity supplies. ☐ Continuing a trend from March 2022, banking and credit disruptions were less prevalent in August. Lending and borrowing show only minor changes relative to 2021. ☐ Average milling throughput declined by more than 20 percent compared to a year prior, and stored volumes of both paddy and rice showed similar declines. ☐ Rice prices and milling margins increased sharply by

about 40 percent compared to last year, driven by rising global prices, and, most importantly, by a rapid devaluation of Myanmar kyat. In USD terms, the price increases are more modest and closer to global changes. At the parallel (unofficial) exchange rate, prices have declined. ☐ Prices of byproducts (in kyats) have also increased sharply from the last year, especially for rice bran which is important to the animal feed industry. Looking forward ☐ Looking forward to the 2022 monsoon harvest and marketing season, over half of all millers expect a decline in paddy production of at least 10 percent in their townships and an additional 22 percent of millers expect a smaller decline. Just 3 percent expect their local paddy production to be higher in 2022 monsoon than in 2021. ☐ Changes in input use (e.g., a decline in fertilizer application) are far and away the most cited reason for lower expected paddy production. Half of millers said that less favorable rainfall patterns compared to 2021 are also a factor in lower paddy production. ☐ On top of lower reported throughput in August 2022 and lower storage volumes, a decline in monsoon paddy production would have large implications for both rural and urban households. Lower supply coupled with the continued and widespread disruptions to utilities and transport, could drive prices even higher. At the same time, unpredictable foreign exchange and export policies could make it difficult for value chain actors to anticipate supply and demand conditions, resulting in higher price volatility.

Myanmar | Shocks, agricultural livelihoods and food security Food and Agriculture Organization of the United Nations, World Food Program, 2022-06-27 This report shares the results of a joint analysis by the Food and Agriculture Organization of the United Nations (FAO) and the World Food Programme (WFP) on the agrifood system in Myanmar based on an assessment conducted from August to

September 2021. The report analyses the effects of a range of natural and human-induced shocks on the agrifood system in Myanmar and shares the results of a field assessment in which 2 708 household interviews were conducted. The assessment covered 147 townships in nine states and regions: Mon, Chin, Kachin, Kayin, Kayah, Rakhine, Sagaing, Shan and Yangon; data were collected between August and September 2021, complemented by a survey of food traders and input retailers.
