**Discovering the Brain** National Academy of Sciences,Institute of Medicine,Sandra Ackerman,1992-01-01 The brain ... There is no other part of the human anatomy that is so intriguing. How does it develop and function and why does it sometimes, tragically, degenerate? The answers are complex. In Discovering the Brain, science writer Sandra Ackerman cuts through the complexity to bring this vital topic to the public. The 1990s were declared the Decade of the Brain by former President Bush, and the neuroscience community responded with a host of new investigations and conferences. Discovering the Brain is based on the Institute of Medicine conference, Decade of the Brain: Frontiers in Neuroscience and Brain Research. Discovering the Brain is a field guide to the brain—an easy-to-read discussion of the brain's physical structure and where functions such as language and music appreciation lie. Ackerman examines: How electrical and chemical signals are conveyed in the brain. The mechanisms by which we see, hear, think, and pay attention—and how a gut feeling actually originates in the brain. Learning and memory retention, including parallels to computer memory and what they might tell us about our own mental capacity. Development of the brain throughout the life span, with a look at the aging brain. Ackerman provides an enlightening chapter on the connection between the brain's physical condition and various mental disorders and notes what progress can realistically be made toward the prevention and treatment of stroke and other ailments. Finally, she explores the potential for major advances during the Decade of the Brain, with a look at medical imaging techniques—what various technologies can and cannot tell us—and how the public and private sectors can contribute to continued advances in neuroscience. This highly readable volume will provide the public and policymakers—and many scientists as well—with a helpful guide to understanding the many discoveries that are sure to be announced throughout the Decade of the Brain.

**The Notable Brain of Maximilian Ponder** John Ironmonger, 2012-03-29 SHORTLISTED FOR THE COSTA FIRST NOVEL AWARD 'Maximilian Ponder is lying face up, dead, on the dining table in his own front room. This is something you really should know, right from the start. 'Max would also have wanted you to know that this is a Henri II style, French, walnut extending dining table, standing on solid turned legs with fretwork decor to the middle, also with ebony and sandalwood inlay, designed by the French furniture maker Nicolas Rastin and probably dating from around 1900 ...' Maximilian Ponder shut himself away for thirty years in an attempt to record every memory he ever had. Now he lies dead, surrounded by his magnum opus - The Catalogue - an exhaustive set of notebooks and journals that he hopes will form the map of one human mind. But before his friend Adam Last can call the police and inform them of Max's death, one rather gruesome task remains in order for Max's project to be complete. Interspersed with sections from The Catalogue, Adam tells the story of the man he knew - a man whose life changed dramatically the day he buried a dead labrador and fought a duel with his father. What emerges is both the story of a friendship, and also of a lifelong obsession, a quest to understand the human mind, memory and what constitutes a life.

**Futile Motility** Andrej Motyl, 2020-09-30 Aluk is a young Kurdish woman who gets adopted by a childless European academic couple, after a common climb to the summit of the biblical mountain Ararat. She follows her new parents to Crecheville, where she starts Law studies. She is intrigued by the idea that humans' destiny is to permanently desire more: that is a blessing and curse at the same time. She starts her career joining the ICRC (Inter. Committee of the Red Cross), serving in Iraq, Eastern Sudan, and Jerusalem. Three years later Aluk metamorphoses into a Diplomat for her adoptive country working in Israel, Morocco, Nigeria, Russia, Caucasus, Iran, Uzbekistan/Tajikistan, a peace mission to Afghanistan introduces her to a cosmos following its own rules. Negotiating with the Taliban and their nemesis, Ahmad Shah Massoud, gives her a lasting lesson: “if you can, trust in God, if not, trust nobody.” Her defence ministry calls her to help out in coordinating its intelligence services, but soon her ministry needs Aluk in Kenya, where she discovers a powerful motivator “greed without borders”. Aluk continues her career in Israel again and then as Ambassador to Sudan/Eritrea, Vietnam and Poland. Once in retirement Aluk tries to give something back to her Kurdish roots. She happens to know a key aid to Boris Johnson, Ambassador Tim Barrow, so she gets an appointment with the PM. She is not trying to get another (this time Kurd oriented) “Balfour declaration” from London: hence she is not aiming at a Kurdish State but more realistically for promising cooperation domains within a Union of Levante. This Union could first, like it happened not so long ago in Europe, start with creating conditions, for the regional countries to cooperate with each other. Exploring political and cultural diversities in many of the worlds most challenged nations, she delivers services with respect and empathy for all humans and other beings giving us on her way a glance into chronic problems of most societies. *My Stroke of Insight* Jill Bolte Taylor, 2008-05-12 Transformative...[Taylor's] experience...will shatter [your] own perception of the world.—ABC News The astonishing New York Times bestseller that chronicles how a brain scientist's own stroke led to enlightenment On December 10, 1996, Jill Bolte Taylor, a thirty-seven- year-old Harvard-trained brain scientist experienced a massive stroke in the left hemisphere of her brain. As she observed her mind deteriorate to the point that she could not walk, talk, read, write, or recall any of her life-all within four hours-Taylor alternated between the euphoria of the intuitive and kinesthetic right brain, in which she felt a sense of complete well-being and peace, and the logical, sequential left brain, which recognized she was having a stroke and enabled her to seek help before she was completely lost. It would take her eight years to fully recover. For Taylor, her stroke was a blessing and a revelation. It taught her that by stepping to the right of our left brains, we can uncover feelings of well-being that are often sidelined by brain chatter. Reaching wide audiences through her talk at the Technology, Entertainment, Design (TED) conference

and her appearance on Oprah's online Soul Series, Taylor provides a valuable recovery guide for those touched by brain injury and an inspiring testimony that inner peace is accessible to anyone.
