Voting Unity of National Parties in Bicameral EU Decision-Making Monika Mühlböck, 2016-12-10 This book provides a detailed study into whether Ministers in the Council vote the same way as Members of the European Parliament if they are from the same national party. The author explores the voting behavior of national representatives at the EU level, and this analysis is combined with insights from interviews with practitioners to shed light on the influence of national parties in the legislative process of the EU. This influence is found to be limited, as ministers in the Council and Members of the European Parliament submit to the constraints in their respective institutions rather than strictly voting along party lines. The study enhances our knowledge not only with regard to the role of national parties at the EU level, but also concerning the inter- and intra-institutional decision-making processes in the European Union. This book will particularly be of use to scholars and upper-level students interested in EU studies, legislative behaviour, and party politics.

The Influence of Public Opinion on Post-Cold War U.S. Military Interventions Helene Dieck, Richard J Finneran, 2016-01-18 Based on interviews with political decision-makers involved in post-Cold War case studies, this research reassesses the prevalent conclusion in the academic literature, according to which American public opinion has limited influence on military interventions, by including the level of commitment in the study of the decision-making process.

Better Off Without 'Em Chuck Thompson, 2013-07-16 Describes the author's road trip investigation into the cultural divide of the United States during which he met possum-hunting conservatives and prayer warriors before concluding that both sides might benefit if the South seceded.

Reconsidering National Plays in Europe Suze van der Poll, Rob van der Zalm, 2018-05-04 This volume frames the concept of a national play. By analysing a number of European case studies, it addresses the following question: Which play could be regarded as a country's national play, and how does it represent its national identity? The chapters provide an in-depth look at plays in eight different countries: Germany (Die Räuber, Friedrich Schiller), Switzerland (Wilhelm Tell, Friedrich Schiller), Hungary (Bánk Bán, József Katona), Sweden (Gustav Vasa, August Strindberg), Norway (Peer Gynt, Henrik Ibsen), the Netherlands (The Good Hope, Herman Heijermans), France (Tartuffe, Molière), and Ireland. This collection is especially relevant at a time of socio-political flux, when national identity and the future of the nation state is being reconsidered.

From Citizenship Education to National Education King Man Eric Chong, 2017-06-14 This book makes a timely contribution to understanding perceptions on national identity and National Education, with both of them have become controversial topics in Hong Kong Special Administrative Region (SAR) of China. In a so-called globalization era, national identity and National Education, with the latter having an aim of fostering a Chinese national identity in education, have been significantly pushed ahead by the Hong Kong SAR government since the early 2000s as a response to the return of sovereignty to China in 1997. Teacher perception matters to what they select and how they teach in the schools. By incorporating fieldworks of teacher interviews, observation and documentary analysis, this book argues for a multi-layered conception of identity, different aims, contents and diversified methods of National Education

should be recognized. This book is likely to become a useful account of teacher perception on national identity and National Education in citizenship education literature, and it will be relevant to policymakers, teachers, trainers and researchers. Chapters include, 1. Different meanings of national identity of teachers and aims, contents and methods of National Education 2. From Citizenship Education to National Education in a Chinese society 3. Implications for understanding National Education in a globalization era: mixed identification, multi-layered identities, knowledge transmission, and 'global identity'

Politicizing Islam in Central Asia Kathleen Collins, 2023-06-06 A sweeping history of Islamism in Central Asia from the Russian Revolution to the present through Soviet-era archival documents, oral histories, and a trove of interviews and focus groups. Few observers anticipated a surge of Islamism in Central Asia, after seventy years of forced communist atheism. Muslims do not inevitably support Islamism, a modern political ideology of Islam. Yet, Islamism became the

dominant form of political opposition in post-Soviet Uzbekistan and Tajikistan. In *Politicizing Islam in Central Asia*, Kathleen Collins explores the causes, dynamics, and variation in Islamist movements--first within the USSR, and then in the post-Soviet states of Tajikistan, Uzbekistan, and Kyrgyzstan. Drawing upon extensive ethnographic and historical research on Islamist mobilization, she explains the strategies and relative success of each Central Asian Islamist movement. Collins argues that in each case, state repression of Islam, by Soviet and post-Soviet regimes, together with the diffusion of religious ideologies, motivated Islamist mobilization. Sweeping in scope, this book traces the dynamics of Central Asian Islamist movements from the Soviet era through the Tajik civil war, the Afghan jihad against the US, and the foreign fighter movement joining the Syrian jihad.

Touched by God Diego Maradona, Daniel Arcucci, 2017 The story of the most remarkable--and controversial--World Cup triumph in history, told in a long-awaited firsthand account from Diego Maradona, its most legendary player. This is Diego Armando Maradona speaking, the man who scored two goals against England and one of the few Argentines who knows how much the World Cup actually weighs. In June 1986, Diego Maradona--one of soccer's greatest and most polarizing figures--proudly hoisted the World Cup above his head. Since then, Argentina's World Cup victory has become the stuff of legend, particularly their infamous victory over England--only four years after the country's defeat in the Falklands War--which featured arguably the best goal in history (Maradona's Goal of the Century) and the worst (the notorious Hand of God). But Argentina's victory came after months of struggle and discord within the team, including the Argentine government's attempt to remove the team's

management, a lack of equipment that forced the players to buy their own uniforms, and an argument that caused the team's captain to quit on the eve of the tournament. Now, thirty years after Argentina's magical victory, Maradona tells his side of the story, vividly recounting how he led the team to win one of the greatest World Cup triumphs of all time.

HM Revenue & Customs accounts 2010-11 Great Britain: Parliament: House of Commons: Committee of Public Accounts, 2011-12-20 The Commons Public Accounts Committee publishes its 61st Report of the Session which, on the basis of evidence from the Cabinet Office and HM Revenue and Customs (HMRC), examined tax disputes. At 31 March 2011 HM Revenue & Customs was seeking to resolve tax issues valued at over £25 billion with large companies, some of which included disputes over outstanding tax. In this report, the Committee expresses concern about how the Department handled some cases involving large settlements and that there needs to be proper separation between the negotiation of tax settlements and the authorization of such settlements. The Committee also states that HMRC made matters worse by trying to avoid scrutiny of these settlements, keeping confidential the details of specific settlements with large companies. This effects Parliament's ability to establish value for money, compounded further by imprecise, inconsistent and potentially misleading answers given by senior departmental officials, including the Permanent Secretary for Tax in particular over his evidence on his relationship with Goldman Sachs, in facilitating a settlement with the company over their tax dispute. HMRC governance processes in these matters were inconsistent and it has now appointed two new Commissioners with tax expertise, and plans to introduce a new assessor role to permit independent review of large settlements before

they are finalised. The Committee further states that it saw little evidence of personal accountability within the Department, and that a perception has developed that large companies are treated more favourably, receiving preferential treatment compared to small businesses and individuals.

Safeer Tariq Bhatti, 2015-12-03 This book analyzes the ideological relationship of the Muslim identity to its perceived practice of Islam among the Shia and Deobandi sects. Energy and Sustainability V: Special

Contributions C.A. Brebbia, S.S. Zubir, 2015-03-19 This volume contains special contributions presented at the 5th International Conference on Energy and Sustainability, held by the Wessex Institute of Technology. It is a companion to the Volume containing most of the contributions (Vol. 186 of WIT Transactions on Ecology and the Environment) and comprises papers presented orally during the Conference. The modern world is highly dependent on the exploitation of fossil fuels. More recently, resources depletion and severe environmental effects deriving from the continuous use of these fuels has resulted in an increasing amount of interest in renewable energy resources and the search for sustainable energy policies. The changes required to progress from an economy mainly based on hydrocarbons to one taking advantage of sustainable energy resources are massive and require considerable scientific research as well as engineering systems. The effect also involves collaboration between different disciplines in order to arrive at optimum solutions, including buildings, energy networks, convenience systems, new energy storage

solutions, waste to energy technologies, and many others. This book, along with its companion volume, covers topics related to sustainability in energy and power production, storage, distribution and management. These include: Energy Policies; Renewable Energy Resources; Sustainable Energy Production; Environmental Risk Management; Green Buildings; Energy Storage; Biofuels; Processing of Oil and Gas; Drilling and Well Design; CO2 Capture and Management; Pipelines; Energy Efficiency; Energy from Waste; Energy and Transportation.

Intelligent Policing Simon Guilfoyle, 2013-03-28
Policing is at a crossroads. At a time of unprecedented cuts and increasing levels of demand, the British police service (like many others) faces enormous challenges. Under the most radical reforms the service has ever experienced, its leadership is looking for new approaches that can maintain levels of service delivery and secure efficiency, accountability and public confidence. Recent history shows that applying private sector business models to the public sector often generates hidden costs and unintended consequences that damage productivity and morale. In spite of this evidence, reform programmes and prevailing management practices still seek to enforce approaches that have demonstrably failed. In *Intelligent Policing*, Simon Guilfoyle proposes a simple and elegant solution that refocuses organisational activity on the service user. Drawing on his own experience as a police officer, he uses a range of evidence to explore the possibilities that systems thinking offers. He clearly outlines how a systems-based approach can bring greater efficiency, improved service delivery, enhanced morale and reduced cost. He shows that the practices and models proposed in

the book can be implemented immediately and insists that senior police leaders and policy makers have an ideal opportunity to make lasting improvements today that will resonate throughout policing and leave a positive legacy for the future.. Intelligent Policing is a rich resource for those - in the UK and around the world - who care about delivering an effective policing service in the 21st Century. It will also interest systems theorists for its practical approach to policing and inform academic debate in the fields of management and human behaviour.
