Truth, Love & A Little Malice Khushwant Singh, 2003-02-10 Born in 1915 in pre-Partition Punjab, Khushwant Singh, perhaps India's most widely read and controversial writer has been witness to most of the major events in modern Indian history from Independence and Partition to the Emergency and Operation Blue Star and has known many of the figures who have shaped it. With clarity and candour, he writes of leaders like Jawaharlal Nehru and Indira Gandhi, the terrorist Jarnail Singh Bhindranwale, the talented and scandalous painter Amrita Shergil, and everyday people who became butchers during Partition. Writing of his own life, too, Khushwant Singh remains unflinchingly forthright. He records his professional triumphs and failures as a lawyer, journalist, writer and Member of Parliament; the comforts and disappointments in his marriage of over sixty years; his first, awkward sexual encounter; his phobia of ghosts and his fascination with death; the friends who betrayed him, and also those whom he failed.

Operative Dictations in Ophthalmology Eric D. Rosenberg, Alanna S. Nattis, Richard J. Nattis, 2021-03-10 This timely second edition expands upon the first edition, working to provide physicians with a comprehensive review of surgical cases within the field of ophthalmology. Extensive updates have been made to existing chapters, along with new chapters on hot topics in ophthalmology inserted throughout the existing text. Featuring important steps within each surgical case, indications for the procedure, possible complications, and a sample dictation – the review serves as both a preparation and debriefing for each surgeon, or surgeon in training, by improving comprehension time, cultivating surgical forethought, and refining post-operative dictations.

Patched Jarrod Gilbert, 2013-11-01 For more than five decades, gangs have played a pivotal role in New Zealand crime life, beginning with the bodgies and widgies of the 1950s. Based on 10 years of gang research, this book chronicles the rise of the Hell's Angels and other bike gangs in the 1960s, the growth of the Mongrel Mob and Black Power in the 1970s, and organized crime during the last decade. With descriptions of such events as the

Devil's Henchmen throwing Molotov cocktails at the Epitaph Riders in Christchurch's first gang war and Black Power members surrounding Prime Minister Rob Muldoon at Wellington's Royal Tiger Tavern, it also discusses the significance of colors and class. With accounts from gang members, police, and politicians, this violent and sometimes horrifying book transports its readers to a tough yet revealing part of New Zealand life.

Seize the Daylight David Prerau, 2009-04-28 Benjamin Franklin conceived of it. Sir Arthur Conan Doyle endorsed it. Winston Churchill campaigned for it. Kaiser Wilhelm first employed it. Woodrow Wilson and Franklin Roosevelt went to war with it, and more recently the United States fought an energy crisis with it. For several months every year, for better or worse, daylight savings time affects vast numbers of people throughout the world. And from Ben Franklin's era to today, its story has been an intriguing and sometimes-bizarre amalgam of colorful personalities and serious technical issues, purported costs and perceived benefits, conflicts between interest groups and

government policymakers. It impacts diverse and unexpected areas, including agricultural practices, street crime, the reporting of sports scores, traffic accidents, the inheritance rights of twins, and voter turnout. Illustrated with a popular look at science and history, *Seize the Daylight* presents an intriguing and surprisingly entertaining story of our attempt to regulate the sunlight hours.

Psychology and Experience Benjamin Bradley,2005-06-30 If personal experience is the basic raw material for psychology, why do all the major psychologies of the past century marginalise or deny it? In this thought-provoking new book Benjamin Bradley shows how our everyday experiences need to be at the core of the scientific discipline. He calls for a move away from attempts to reconcile the many contrasting and often opposing theories and philosophies of contemporary psychology, and instead puts forward a scholarly and exciting new vision for psychology which focuses on the 'here-and-now' and the importance of others as equals in teaching and research. He encourages the reader to reconsider the very basis of our understanding of what experience is. This uniquely inspiring and practical text will prove an invaluable resource for all those interested in teaching, learning and researching about the mind.
