On My Radar Stephen Blumenthal, 2021-01-12 HOW TO GROW AND DEFEND YOUR WEALTH What matters when it comes to investing? It's not what you may think. Trade deals, tweets, and more may affect the market for a moment in time, but the reality is most news is just noise-- sound bites that ultimately don't matter. So, what does? Steve Blumenthal has spent his career studying just that. He's seen how that noise encourages investors to behave badly. But you don't have to fall prey to the same mistakes investors routinely make. *On My Radar: Navigating Stock Market Cycles* explains the ins and outs of what matters: from long- and short-term debt cycles to the merciless math of loss--the concept that compounding interest works differently on the way up than it does on the way down--and the impact of recessions. Then it provides a plan: when to play offense, when to play defense, and how to carefully grow and defend your core wealth in a way that enables you to explore select investment opportunities that may further enhance your wealth. It is a must read for anyone seeking an actionable investment process.

Weather Radar Polarimetry Guifu Zhang, 2016-08-19 This book presents the fundamentals of polarimetric radar remote sensing through understanding wave scattering and propagation in geophysical media filled with hydrometers and other objects. The text characterizes the physical, statistical, and electromagnetic properties of hydrometers and establishes the relations between radar observables and physical state parameters. It introduces advanced remote sensing techniques (such as polarimetric phased array radar) and retrieval methods for physical parameters. The book also illustrates applications of polarimetric radar measurements in hydrometer classification, particle size distribution retrievals, microphysical parameterization, and weather quantification and forecast.

Chandrasekar, 2001-08-30 This 2001 book provides a detailed introduction to the principles of Doppler and polarimetric radar, focusing in particular on their use in the analysis of weather systems. The Feasibility of Detecting Shock Waves by Pulse Doppler Radar Kenneth M. Glover, 1966 Classical geometric optics estimates of the echo characteristics from both isotropic and directed acoustic shocks are presented together with the detection capability of a typical sensitive pulse Doppler radar (AFCRL Porcupine Doppler) in order to determine the feasibility of detecting large well defined boundaries of refractive index. Both the radar cross-section and the Doppler spectrum of an acoustic shock are sensitive to wind and temperature induced perturbations of the shock surface. For standard deviations in wind and temperature of 0.5 m/sec and 1C, the theoretical values of the maximum radar cross-section and minimum Doppler spectral width of a typical directed shock of 50 meters radius are found to be 0.0008 sq cm and 58 cps respectively. This target cross-section is about 6 dB stronger than the minimum cross-section detectable by the Porcupine radar at a range of only 1.8 kilometers. At this range, the presence of a weak signal may be completely masked by the presence of strong ground clutter signals. Signal processing techniques which improve the mean square to noise ratio and provide

sub-clutter visibility are therefore crucial to the success of the experiment. Moreover, the sensitivity of the radar cross-section and the Doppler spectrum to wind and temperature perturbations restricts the experiments to calm conditions. (Author).

War Stories for My Grandchildren H.F. Jansen Estrup, 2007-03-15 Storytelling at its best, this compelling memoir graphically portrays the scarred emotional landscape of young men who seek a place in the world by way of a military career. Exhausted shadows of the past are brought alive with uncommon eloquence as the author looks back on his youth brimming with innocence, idealism and patriotism. A page turner, the book explores the complex nature of a man whose brave, daring and sometimes foolhardy exploits led to the essential task; building a scaffold of choices and attitudes by rendering meaning from the intractable depths of experience. What in other hands might be a dreary tale of adolescent angst, betrayal and disillusion, takes on truly pyrotechnic energy, lifting his coming of age from the mundane to the profound. Reviews Rating=Excellent (top rating) by Writer's Digest ...What I like best is the humanity of the speaker. Narrators often glorify themselves or the people they love and consequently attack those who might have ever hurt them slightly. It seems those authors do not approach their lives from a position of power. But this book is filled with real people with distinctive voices, made human and vulnerable by their standards and faults and are loved all the more for them by the reader. Especially wonderful is the perspective on the world, the philosophies and stories presented with reasoning throughout, as well as the various layers of actual war and the psychology of boy and manhood ... the raw, relatable, vivid voice that is found inside ... the project is quite necessary and brilliant, and I hope it will come under the gaze of many a person interested at all in our world's history or the intelligent wisdom of one who has lived. Rating=5 Stars By jd2 (ID) In *War Stories For My Grandchildren*, the author vividly portrays how war is not always on the military battlefield. This unique book tells of war in all walks of life, be it young, old, personal, social or military. It connects the reader to war through the eyes and mind of the author who experienced these events as they unfolded. With a poignant view of the military, gained from a combined total of twenty plus years in the Air Force and Navy, he writes with the technical expertise of an insider and the wisdom acquired after five tours in Southeast Asia. Here's a bargain if I ever read one. The book contains about twenty different stories for the price of one book. Each story filled with a refreshingly honest point of view. Not just the blood and guts side of war but a deeper philosophical understanding of what it is, what it does, and how humanity can't

seem to detach itself from it. Real life danger and excitement await the reader in stories like *The Drowning of Helen Lee* and *Sea Dragon*, as well as others. I'm sure his Grandchildren will enjoy them all. I did! Highly recommended from a satisfied reader.

International Weather Radar Networking C.G. Collier, 1992-04-30 International Weather Radar Networking covers all aspects of the subject in a collection of contributions drawn from all over the world. Of particular interest are the papers describing work in Eastern Europe and papers reviewing of the achievements of the Commission of the European Communities COST-73 project. During the last twenty years there has been a rapid growth in the number of digital radars deployed for operational use in Western Europe. There are now around 100, of which about half have a Doppler capability, providing wind as well as reflectivity information. The international exchange of the data from these systems promises a great enhancement of the benefits to weather forecasting and commercial users. This volume reports work being undertaken to realize those benefits and points the way to future developments of radar technology.
