Religion, Identity and Conflict in Britain: From the Restoration to the Twentieth Century Dr Frances Knight, Dr John Morgan-Guy, Professor Stewart J Brown, 2013-08-28 The British state between the mid-seventeenth century to the early twentieth century was essentially a Christian state. Christianity permeated society, defining the rites of passage - baptism, first communion, marriage and burial - that shaped individual lives, providing a sense of continuity between past, present and future generations, and informing social institutions and voluntary associations. Yet this religious conception of state and society was also the source of conflict. The Restoration of the monarchy in 1660 brought limited toleration for Protestant Dissenters, who felt unable to worship in the established Church, and there were challenges to faith raised by biblical and historical scholarship, science, moral questioning and social dislocations and unrest. This book brings together a distinguished team of authors who explore the interactions of religion, politics and culture that shaped and defined modern Britain. They consider expressions of civic consciousness in the expanding towns and cities, the growth of Welsh national identity, movements for popular education and temperance reform, and the influence of organised sport, popular journalism, and historical writing in defining national life. Most importantly, the contributors highlight the vital role of religious faith and religious institutions in the understanding of the modern British state.

The Event That Changed Everything Paul Sorgule, 2015-01-12 It is fall of 2015, and Jake is a line cook—or at least he was, until he and his entire team were let go from their jobs following a suspected E.coli outbreak traced to their restaurant. Jake—who has always been a stickler for food safety—suspects that the outbreak is actually part of a larger problem that the news has been referring to as The Event, a series of changes encompassing dramatic shifts in weather and decline in the integrity of the nation's food supply. The deaths were in fact caused by a new deadly strain of bacteria, and its reach is expanding, affecting people all over the United States. As the Event sweeps the country, killing first thousand and then tens of thousands, Jake recalls his culinary career—particularly his life with fellow chef, Carla—and struggles desperately to determine how he can make a difference. A novel based on the reality of our food supply's truly fragile nature, *The Event That Changed Everything* explores environmental issues, farming, and restaurant life through the eyes of two chefs doing their best to meet the challenges of a changing world.

Dishing It Out Robert Appelbaum,2011-12-20 From the hamburger haven to the temple of gastronomy, the restaurant is a fixture of modern life. But why is that so? What needs has the restaurant come to satisfy, and what needs has it come to impose upon the experience of the modern world? In Dishing It Out, Robert Appelbaum travels around America and Europe and through the annals of literature and history to explore the social meaning of the restaurant—and to discover what we ought to be asking of the restaurant experience today. Since its founding in pre-Revolutionary France, the restaurant has always inspired contradictory feelings and served contradictory purposes. It has stood for a kind of liberation: the embrace of pleasure and sociability for their own sake. But it has also encouraged narcissistic consumerism at the cost of the exploitation of restaurant workers, and the self-deception of restaurant-goers. Drawing on the work of such writers as Grimod de la Reynière, Jean-Paul Sartre, Isak Dinesen and M.F.K. Fisher, and sampling fare from macaroni cheese in workaday London to oysters and sausages in seaside France, Appelbaum argues that though restaurants are inherently problematic as social institutions, they are characteristic of who and what we are. They are expressions of what we need as human beings. And for that reason, though they contribute to inequality they can also be used to promote the interests of cultural democracy. A unique rethinking of the restaurant experience, at once entertaining and learned, Dishing it Out is an important contribution to our knowledge of food, literature, history and society.

True Cost Accounting for Food Barbara Gemmill-Herren,Lauren E. Baker,Paula A. Daniels,2021-06-22 This book explains how True Cost Accounting is an effective tool we can use to address the pervasive imbalance in our food system. Calls are coming from all quarters that the food system is broken and needs a radical transformation. A system that feeds many yet continues to create both extreme hunger and diet-related diseases, and one which has significant environmental impacts, is not serving the world adequately. This volume argues that True Cost Accounting in our food system can create a framework for a systemic shift. What sounds on the surface like a practice relegated to accountants is ultimately a call for a new lens on the valuation of food and a new relationship with the food we eat, starting with the reform of a system out of balance. From the true cost of corn, rice and water, to incentives for soil health, the chapters economically compare conventional and regenerative, more equitable farming practices in and food system structures, including taking an unflinching look at the true cost of cheap labour. Overall, this volume points towards the potential for our food system to be more human-centred than profit-centred and one that has a more respectful relationship to the planet. It

sets forth a path forward based on True Cost Accounting for food. This path seeks to fix our current food metrics, in policy and in practice, by applying a holistic lens that evaluates the actual costs and benefits of different food systems, and the impacts and dependencies between natural systems, human systems, agriculture and food systems. This volume is essential reading for professionals and policymakers involved in developing and reforming the food system, as well as students and scholars working on food policy, food systems and sustainability.
